

2023 PRODUCT CATALOG

FINDING FOCUS THROUGH MOVEMENT™

CREATE A SENSORY SOLUTION

Each setup designed by our team includes a support structure, sensory attachments, accessories, and programming.

SUPPORT STRUCTURE

SensoryRx Systems are made of steel and designed with versatility in mind. Move attachments around with ease and keep your setup fresh.

SENSORY ATTACHMENTS

Ladders, swings, ziplines, and more! We won't stop creating attachments until everyone can find focus through movement.

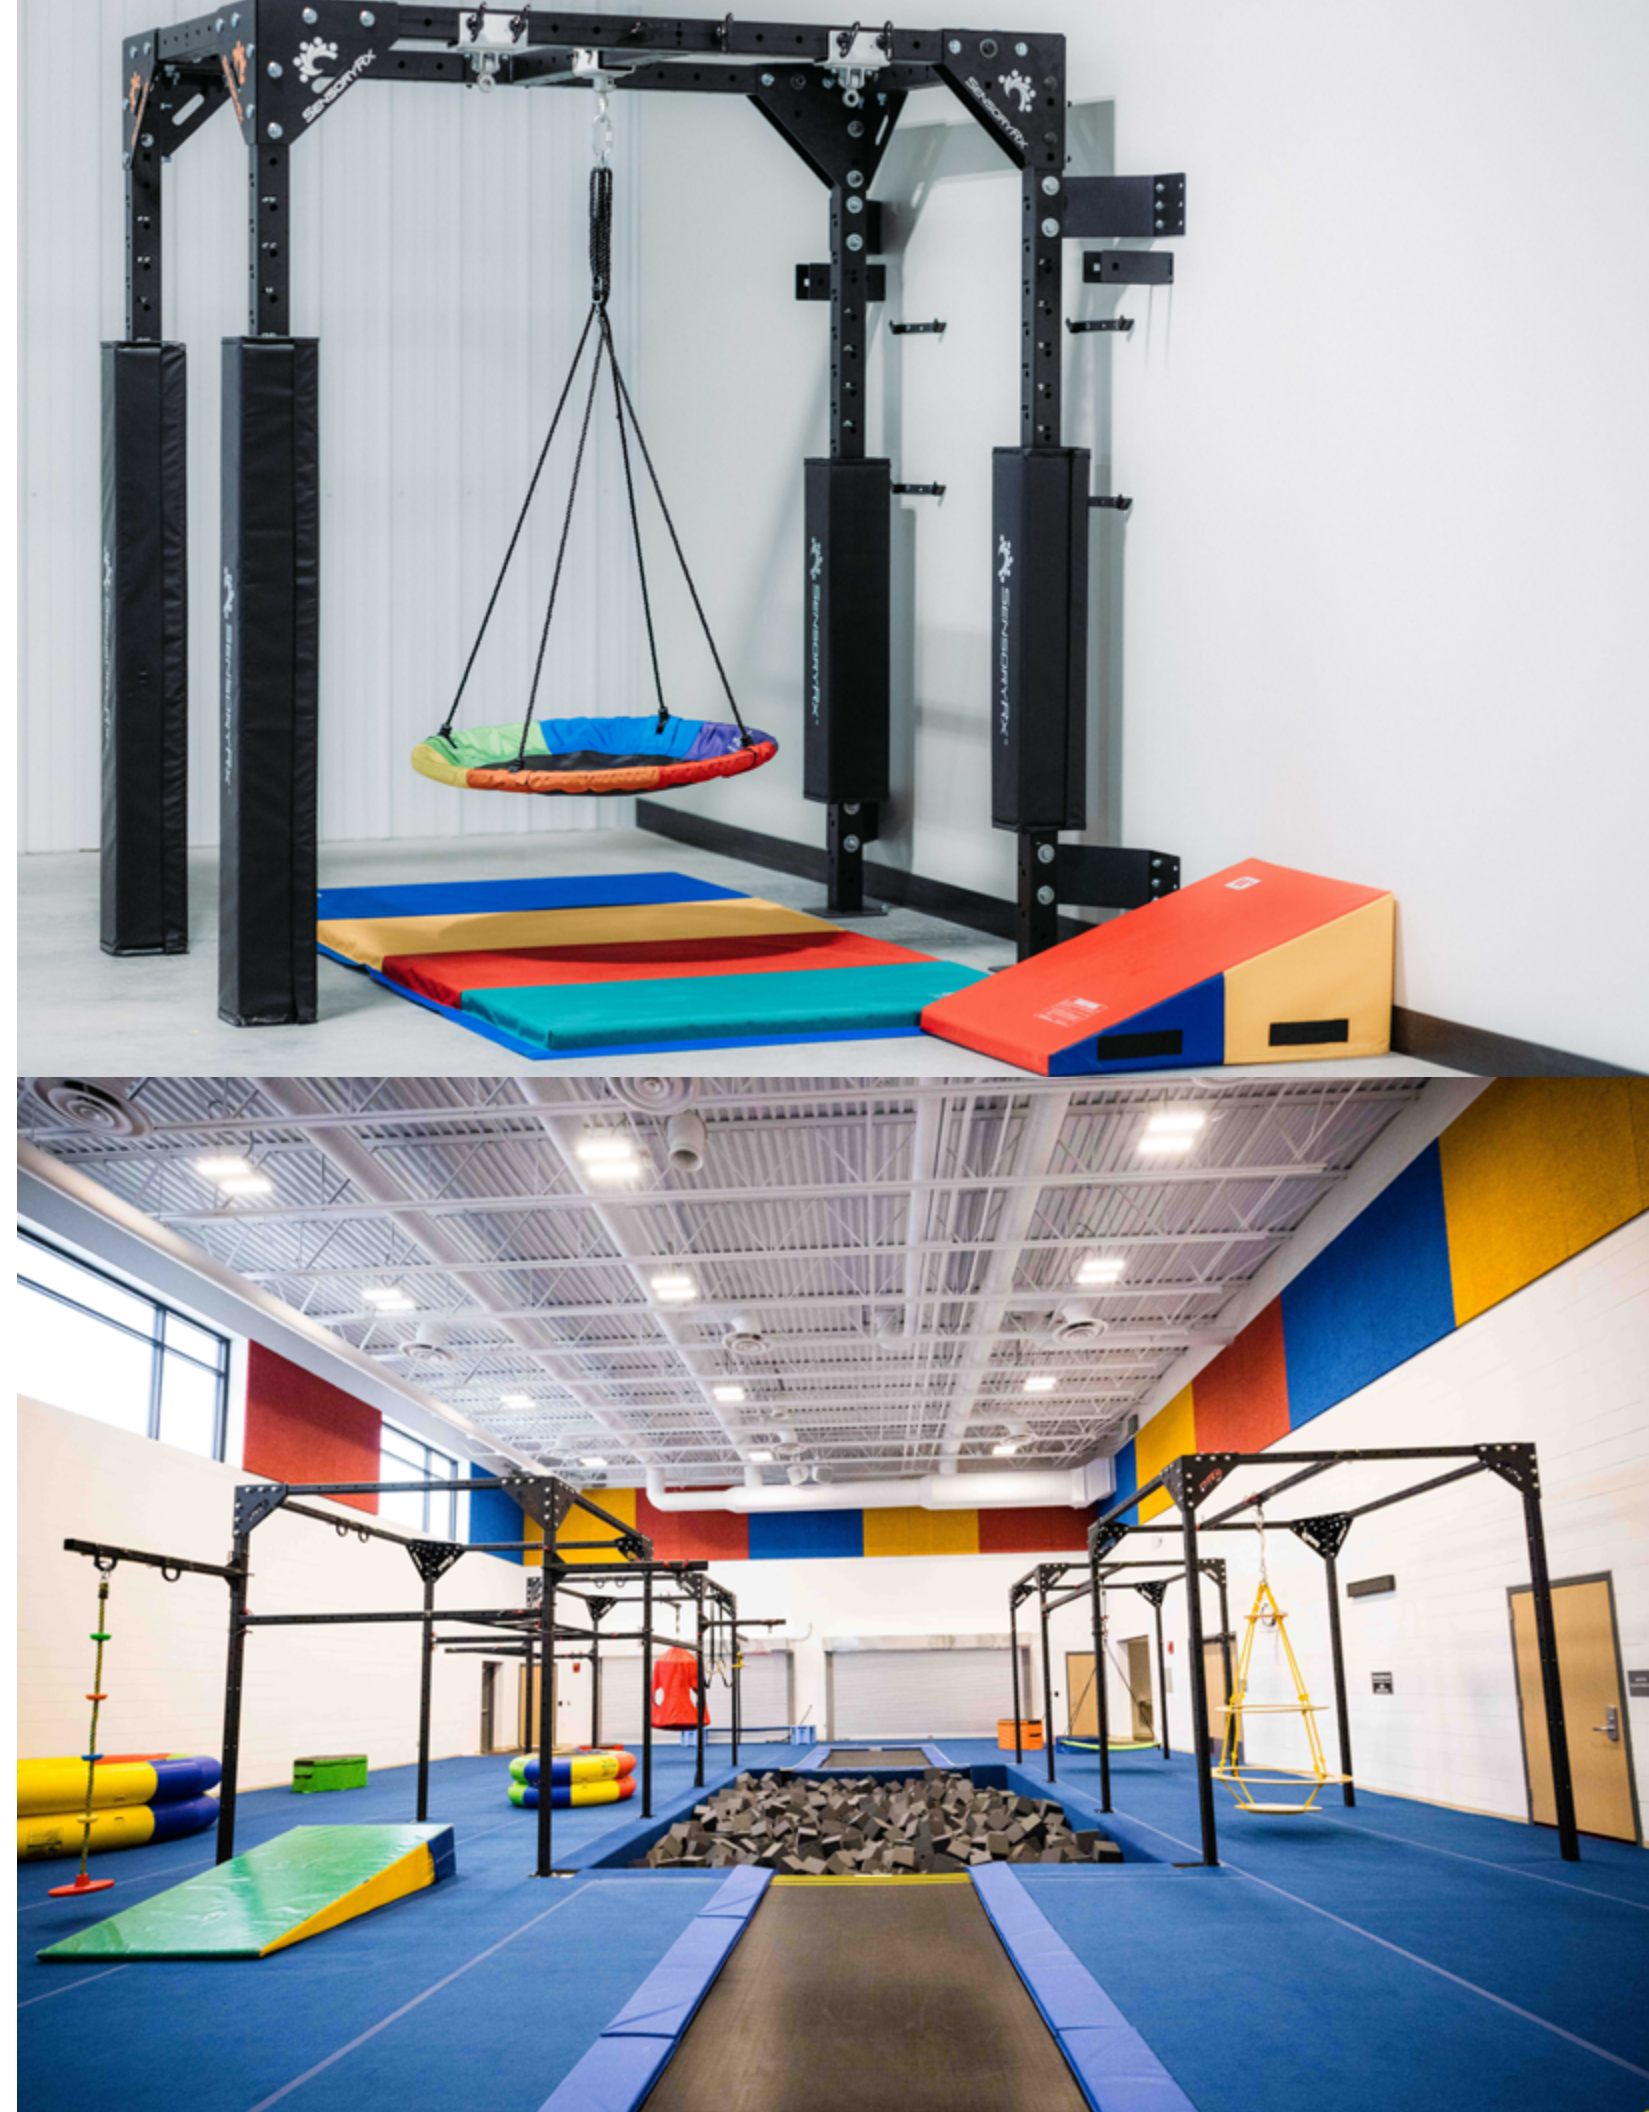

ACCESSORIES

Make sure your setup is safe and easy to use. The little things like protective padding, crash mats, and storage make all the difference.

PROGRAMMING

Put your sensory equipment to work. All purchasers receive education on best practices and creative uses.

We can help you navigate use of any grants, financial assistance, or state waivers.

CREATE A SENSORY SOLUTION

COMMERCIAL SYSTEM

The Commercial Sensory System™ was designed with versatility and inclusivity in mind. Swings, ziplines, ladders, and more can be simultaneously attached and in use. Changing your set up only takes a matter of minutes so you can serve a variety of individuals.

System components and pricing are based on the overall layout and program needs.

Key Features:

- Fits rooms as small as 10' x 10'
- Height options for ceilings 8' - 12'+
- Custom configurations for each space
- Anchors to concrete floor
- Handles multiple users at the same time
- Complete versatility – attach anything, anywhere within minutes

“SensoryRx offers high-quality and unique products to fill this void in the [neurodivergent] market. They are a team of innovators continually seeking to improve and expand their offerings. In addition to one-of-a-kind equipment, their customer service is top-notch.”

- Tiffany S. (Empowering Kids)

CREATE A SENSORY SOLUTION

RESIDENTIAL SYSTEM

The Residential Sensory System™ provides movement opportunities for almost any space, including homes and multi-purpose rooms! While intended for single-person use, the Residential System still offers great versatility and durability that other suspension frames can't match.

Choose the support structure and sensory attachments that suit your space and movement needs.

All prices on [SensoryRx.com](https://www.sensoryrx.com) are up-to-date.

Key Features:

- Fits rooms small as 8' x 8'
- Height options for ceilings 7' - 9'+
- Anchors to wall and can stow away
- Similar versatility and durability as the Commercial System
- 12 configurations to suit your space and movement needs

"Rather than crash and burn when my son gets home from school, he now has a place where he can reset. We love having 24/7 access to our own sensory space!"

- Katie J. (Special Needs Parent)

CREATE A SENSORY SOLUTION **CLIMBRX® PROGRAMMING**

Movement can positively impact individuals with sensory differences because it simultaneously integrates three key sensory systems - the tactile, proprioceptive, and vestibular systems. There are also the general health benefits that come from movement such as building strength and balance.

ClimbRx® is a digital content website designed to support meaningful movement and removes the guesswork of finding the best physical activities each person needs to feel good and be successful. By offering targeted programmed sessions, product recommendations, a supportive online community, and other sensory motor movement resources, individuals can improve their overall well-being by achieving sensory regulation more consistently and improving gross motor skills.
