CERTIFICATE OF ANALYSIS

Histone H2A (T101) PAb

Cat. #: GS0031

Lot: A052, A054, A056, A058

Package size: 0.1 ml

Description Rabbit polyclonal antibody to human Histone H2A (H2B, NP_002097). GS0031 binds to histone H2B regardless of the presence of an O-GlcNAc on threonine 101 (T101). Amino acid sequence of the region flanking T101 suggests cross-reactivity with histone H2A of multiple species including mouse, rat, chicken, hamster and primates.

Tested applications ELISA

Target sequence KLLGRVTIAQGG

Isotype Mixed, predominantly IgG.

Storage buffer PBS, pH 7.2-7.5.

Storage Frozen (-20°C or lower). Store at 4°C when thawed or aliquot and refreeze. Avoid repeated freeze/thaw cycles.

Example applications

ELISA ELISA plates were coated with the peptides indicated in the graph below, conjugated to BSA, and detected with dilutions of GS0031. The secondary antibody is a goat anti-rabbit whole IgG.
