Safety Instructions

Read all instructions before you use this device. Do not make any changes that are not described in this manual. If physical injury, loss of data, or damage is caused by failure to follow instructions, the warranty does not apply.

Setup

- To reduce the risk of fire and/or electric shock, do not expose the device to rain or moisture, and objects filled with liquids, such as vases, should not be placed on the device.
- Do not place the device on soft surfaces such as tablecloths or carpets as doing so could be a fire-hazard.
- Do not place the device in areas susceptible to excessive dust and dirt or near any appliance generating a strong magnetic field.
- To prevent overheating, do not block or clog the ventilation openings. Never place the device in a confined space. Always leave enough space around the device for ventilation.
- Protect the device against direct sunlight, heat, large temperature fluctuations and moisture.
- When the device runs for a long period of time and the surface becomes hot, shut it down and unplug the power cord. Resume operation only after the device has cooled.
- Always handle the device with care. Avoid touching the lens.
- Never place heavy or sharp objects on the device or the power cord.To avoid electric shock, do not disassemble.
- Only use attachments or accessories specified by the manufacturer. Avoid extreme vibration. It may damage the internal components.. Do not allow children to handle the device without supervision.
- Under the following conditions, a layer of moisture can appear inside the device which can lead to malfunctions:
    a) if the device is moved from a cold to a warm area;
    b) after a cold room is heated;
    c) when the device is placed in a damp room.
    To avoid any moisture, seal the device in a plastic bag before moving it to another room, and wait for one to two hours before you take it out of the bag.

Power Supply

- Use only the provided power adapter.
- Power off the device before removing the power supply from the socket.
- Protect the power cord from being walked on or pinched, particularly at plugs, convenience receptacles, and the point where they exit from this device.
- Unplug this device if there are lightning storms or when unused for a long period of time.
- Where the power plug or an appliance coupler is used as the disconnect device, the disconnect device shall remain readily operable.
- Before you make or change any connections, ensure that all devices are disconnected from the power outlet.
- Do not touch the power cable or the power connector with wet hands.

Hearing Safety

To avoid hearing damage, do not listen for extended periods at high volume. Set the volume at a safe level.

Cleaning

- Power off the device and remove it from the power supply before cleaning the surface.
- Use a soft, lint-free cloth. Never use liquid, gaseous, or easily flammable cleansers (like sprays, abrasives, polishes, and alcohol). Wipe over the surfaces gently. Be careful that you do not scratch the surfaces.
- Do not use any liquid cleaning agents to clean the lens as they may damage the protective coating on the lens. Use lens cleaning paper to clean the lens of the projector.
Repairs

- Do not make any repairs to the device by yourself. Only have your device repaired by an authorized service center.
- Improper maintenance can result in injuries or damage to the device.
- Refer all servicing to qualified service personnel.

Caution

- Do not stare at operating beam, the bright light may hurt your eyes.

Placement

① Place the projector right towards the projection surface to get a rectangle picture.

② The distance between the projector and the projection surface determines the picture size.

③ Check the projection distance and screen size on the specifications part.(Look at page 11)

Best Projection Effect

Prepare the Remote Control
Install the remote control (batteries not included).

① Press and open the battery cover, as illustrated.

② Install two AAA batteries. Make sure that the positive and negative ends are positioned correctly, as illustrated.

③ Place the battery cover back until it clicks into place.

④ The distance between the remote and the projector should not exceed 10 m / 33 ft.

Power On

• Indicator will light up red when the power cord connects to the outlet.
• Indicator turns green when switched on.

• Press the power button once to power on.
• Press the power button twice to power off.

Focus

Auto Focus

Place the projector towards a suitable projection surface or wall, the projector will automatically focus the image.

Manual Focus

You can also manually focus through the remote control. Press the **F+/F−** button on the remote control, until the picture is clear.

**Note**： **The projection distance must between 1.1m to 4.1m.**

Select Your Language

Settings

Projection Settings

Press the button ⬚ on the remote control, go to projector homepage, and select **Settings.**

Projection Mode

Desktop Front Projection

Ceiling Front Projection

Desktop Rear Projection

Ceiling Rear Projection

Zoom in/out

Use the remote control to resize the picture size from 50% to 100% without moving the projector.

Keystone Correction

This projector supports Auto and Digital Keystone Correction.

If you fix the projector at one place, and get the right picture, you can turn off the Auto Keystone.

• Auto Keystone Correction

When the projector image is distorted, it will perform auto keystone correction to restore the image to a rectangle. If you find the auto keystone correction does not work as well as before, follow the instructions below to optimize it.

For detailed steps, please refer to this video. Just scan the QR code:

Link: https://etoeofficial.com/pages/keystone-correction

• Digital Keystone Correction

If you want to adjust the keystone correction with the remote control, you must deactivate the Auto keystone correction function.

1. Turn off AUTO Keystone: Go to ⚙ > [Projector Settings]> [Keystone Settings]>[Auto Keystone], and turn off Auto Keystone.
2. Go to ⚙ > [Projector Settings]> [Vertical Correction] /[Horizontal Correction], and press left or right button on the remote control to adjust.

Vertical Correction
Horizontal Correction

• **Four Point Correction**
If the projector image is stretched or distorted along both axes due to the angle of the projection, use four point correction.
1. Press [⚙] to go to projector settings.
2. Select [Projector Settings] > [Four Point Correction]. Choose the corner you need and press navigator button ⊚ on the remote control to adjust.

Four Point Correction

• **Keystone Correction Reset**
To restore the default settings, select **Keystone Correction Reset** and press "OK".

Other settings

Screen Saver
The screen saver automatically starts whenever your projector sits idle for the default time. You could change the default time or turn it off.

Screensaver Video
Select default screen saver video.

Screensaver Timeout Shutdown
Set the shutdown timer for the projector.
