

ASSEMBLY INSTRUCTIONS FOR Adding Clear Panels to an Ozzy Cage

This is a general assembly guide for adding clear panels to an existing 1-Level Ozzy Cage, and may not indicate what has been included in your box.

Clear panels are most suitable for the walls of single level cages and should not be used as base/floor grids, as part of a stand or as a lid.

We recommend the use of our 'Hammertime' Hammer to help secure the panels together as securely as possible.

BASIC AVAILABLE COMPONENTS

CLEAR ACRYLIC PANELS

For the walls of your enclosure. We recommend them for the front side of the cage where your piggies look out!

CONNECTORS White or Black

Connectors are used to join the panels at the corners.

'HAMMERTIME' HAMMER

Our hammer helps knock the panels together with the safest and tightest fit!

BUILDING A NEW OZZY CAGE FROM SCRATCH?

Head over to our Youtube channel for instructions on how to set up your basic grid foundation, then replace the front section with the clear panels as per this instruction sheet!

Guinea Pigs Australia

We also have extra videos on how to build lids, stands, lofts and much more!

ADDING TO AN EXISTING OZZY CAGE?

Your job is easy! Just pull out the grids that you want to replace with the clear panels, hammer the new panels in with our Ozzy connectors and you're set!

Our clear panels are compatible in size and thickness with our Ozzy Cage connectors and grids so you don't have to worry about pieces slipping out or looking uneven.

NOTE: Our clear panels are not compatible with other brands of C&C cage grids or connectors!

A wide variety of components like ramps, support bars, chew protectors and grids to enhance or expand your enclosure are available online!

ASSEMBLY INSTRUCTIONS FOR Adding Clear Panels to an Ozzy Cage

CLEAR PANEL ASSEMBLY INSTRUCTIONS

Note: These instructions are for adding clear panels to an existing 1-Level Ozzy cage.

1

Remove the grids you wish to replace on your existing cage (taking your piggies out first!). Peel the adhesive plastic covering off your clear panels.

2

Position your clear panel into the slot of a connector and tap the top & sides of the panel with the 'Hammertime' Hammer to set it securely into the connector.

(Either side of the hammer works safely!)

3

Connect all clear panels along bottom edge, then repeat for the top side, reattaching your existing grids where required.

No cable ties required between the clear panels! Set cage back up with your corflute lining, bedding & accessories and you are done.

Enjoy the awesome clear views!
