3 Burner 42" AWO

ARIZONA WEATHERED OAK

These logs were found in the mountains of the Northern Arizona forest. In fact, all of the logs that make up this collection were gathered from one tree that was hit by lightning more than 40 years ago.

The effects of the lightning strike created bulges, twisting and cracking in the wood which are unique to our Arizona Weathered Oak Collection.

Available in regular sizes 18" - 60" Front View & See Through

Now available in extra large widths of 48" and 60"

NEW

2 Burner 60" AWO

JUMBO SERIES & JUMBO SLIMLINE SERIES

Our Jumbo Series matches our massive Jumbo burners with our hefty Jumbo Arizona Weathered Oak Logs. The 1" tines on the burner are a perfect complement to the 12" diameter of the Jumbo Arizona Weathered Oak front log. Big tines and big logs are not all this collection has to offer as massive flames are the final part of this 3 headed beast. Available in sizes 24" - 120" front view and see through. Jumbo burners have a depth of 21" and the Jumbo Slimline burners are 18" deep.
