Introducing REMplenish For Airway Health

An airway epidemic is impacting the physical and mental health of over 1 billion people worldwide

REMastered Sleep has created **REMplenish**, an ingenious drinking nozzle that **provides targeted myofunctional exercise** to strengthen the tongue and upper airway muscles while reinforcing proper function to improve airway health.

Watch a video animation to see how it works

REMPLENISH ALSO FOR CHILDREN

Airway health issues often begin in childhood

REMplenish Jr. is **designed especially for children 3-9 years of age** to strengthen the tongue, reinforce proper swallow and improve nasal breathing which are key components for optimal growth and development.

We have an opportunity to easily impact sleep, growth and development with REMplenish Jr. at an early age leading to lifelong benefits

We are facing an urgent airway epidemic, taking action now, early intervention is key. With REMplenish Jr. that is possible.

Kalli Hale, DDS, MPH, D-ABSA

REMPLENISH IS A MUST HAVE FOR ANY PROVIDER INVESTED IN AIRWAY HEALTH

EASY TO INTEGRATE

- Quantity Discount Pricing
- A variety of product options for all ages

Join us on our mission to rid the world of preventable airway health issues.

What makes my program unique is that I use REMplenish with ALL of my clients, young kids and adults.

Kimi Nishimoto,
Myofunctional Therapist

WHAT HEALTHCARE PROFESSIONALS ARE SAYING

★★★★★

Soroush Zaghi, MD, ENT

"The REMastered sleep water bottle is a wonderful adjunct to myofunctional therapy. It really helps my patients strengthen and tone the back of the tongue and work on improving tongue thrust swallow habits. I've tried it myself and you can really feel the back of the tongue engaging and strengthening with each use."

★★★★★

John H. Tucker, DMD, DABDSM, DICOI

"Adding oropharyngeal exercises is one of my favorite choices to strengthen the tongue and mouth muscles. An easy patient-compliant way of doing this is with REMplenish. Those patients that have elected to augment their treatment with REMplenish report a pronounced outcome. I highly recommend considering adding REMplenish to your treatment options."

★★★★★

Kim Ledermann, DDS, MS

"Our patients love that the product, especially the straw and mouthpiece, is convenient and portable. This helps to encourage consistent use... this is a great tool for patients with myofunctional issues and sleep breathing concerns."

★★★★★

Sarah Hornsby, BS, RDH, COM

"It's been an awesome addition to my myofunctional therapy practice for pretty much every patient. I like how it helps support therapy outside of sessions, by reinforcing the correct swallowing patterns and tongue movements we discuss. I highly recommend this product to both patients and myofunctional therapists!"

BREATHING AND SLEEPING WELL IS KEY TO OVERALL HEALTH & WELLNESS

Common health conditions linked to sleep disordered breathing

IMPROVE AIRWAY HEALTH WITH REMPLENISH

Targeted exercise with REMplenish reinforces proper tongue position and function, helping to stabilize the airway and support nasal breathing.
