

Purpose

The CASCADE wall handgrip is an ergonomically shaped handle, fully made of plastic. It is designed to be used in shower and bath areas in bathrooms or other care facilities.

The handgrip may be mounted vertically, horizontally or diagonally. The handgrip can be attached as a chain of grips as desired.

Care and Maintenance

The handgrip can be cleaned with a household plastic cleaner. Follow the instructions of the cleaning product.

Warranty

We offer a 2-year limited warranty against defects in workmanship and materials CASCADE wall handgrip.

NOTE:

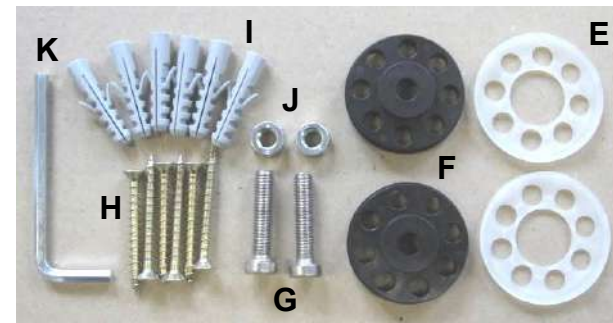

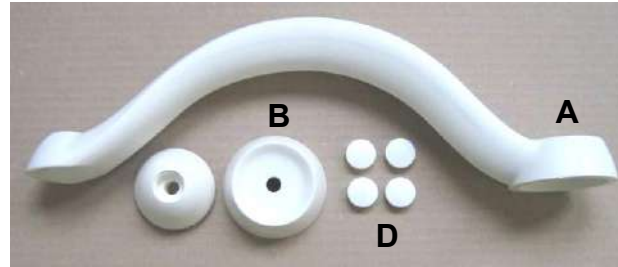

Keep this user manual in case of future use.

Instructions for Assembly

Before installing the wall handgrips, check to be sure there are no water pipes or electrical lines in the wall that could be damaged by mounting the handgrip.

REBOTEC is not liable for any damages resulting from mounting the handgrip on the wall.

When mounting the handgrip, the structural wall properties must be taken into account. If necessary, the screws and anchors may have to be replaced by another fastening system.

The distance between the hole-centres is 290 mm.

Check to be sure the handgrip is securely mounted after installation.

Trained professional

Handgrip Chains

For extending a chain of handgrips, the following parts are needed for installation:

All other parts in the set will not be needed.

Attention

Place nut (J) with the integrated lock ring facing the wall.

Safety Instructions

- Always take the structural wall properties into account when mounting the handgrip.
- Do not use damaged or improperly mounted hand-grips
