WITH NANODEX™ TECHNOLOGY

A NEW KIND OF SANITIZER

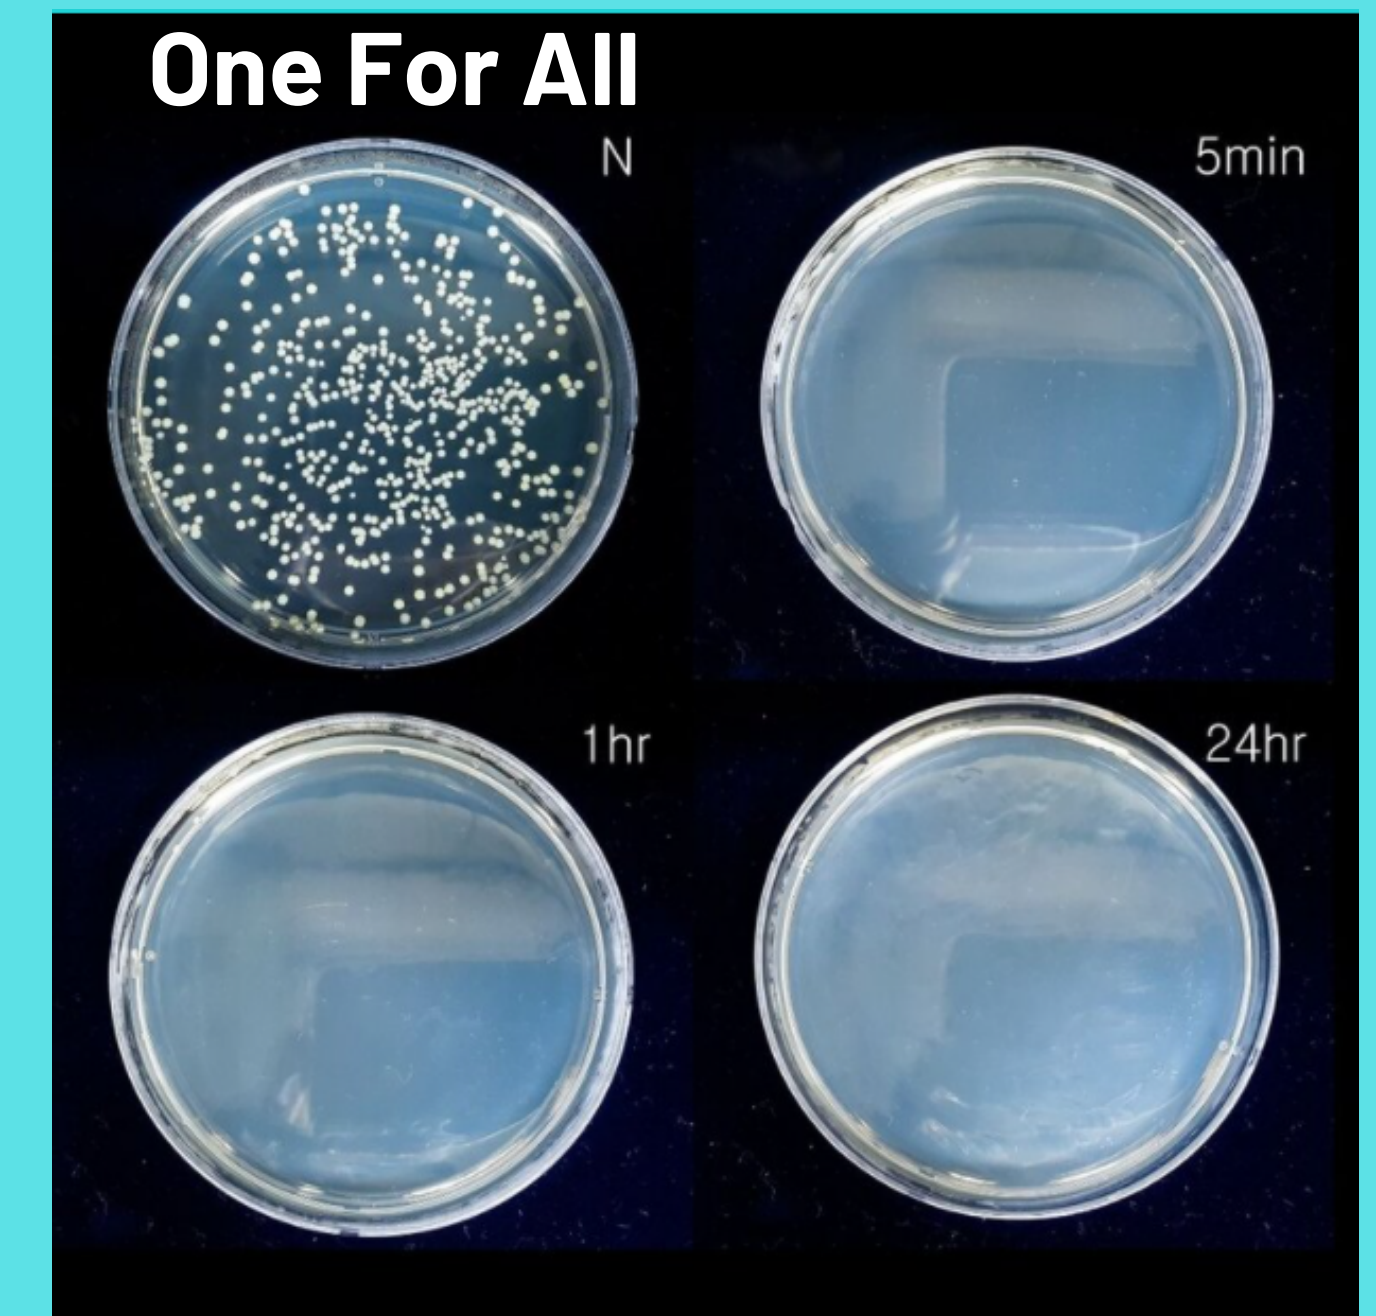

**THIS DOES WHAT ALCOHOL
CAN'T: PROTECT**

Alcohol sanitizers kill germs & bacteria on contact, but they don't continue killing. **One For All with Nanodex™ Technology** keeps killing until you wash it off.

ALCOHOL WON'T PROTECT YOU. ONE FOR ALL WILL.

- Kills >99.9% of microbes in 15 seconds.
- Remains active until you wash it off.
- FDA-approved for medical use.
- Safe, non-drying, and alcohol-free.

Bacteria growth shows up as white mass in petri dish. 70% Alcohol hand sanitizer kills microbes within 15 seconds, but does not offer lasting protection.

Petri dish remains clear of bacteria. One For All Sanitizer kills >99.9% of microbes within 15 seconds ... and keeps on actively killing them for up to 24 hours.

Formulated by a team of scientists and doctors funded by the National Science Foundation (NSF) and the National Institute of Health (NIH).
