## 6000 SERIES GAS LOG FIRE

Introducing the Luminar 6000 Gas Log Fire by Illusion, Australia's foremost manufacturer of Gas Log Fires. The Luminar 6000 features luxury, performance and wide viewing window making it the perfect choice to keep larger living areas warm.

Capable of heating up to 160 sq metres, the stunning Illusion Luminar 6000 Inbuilt Gas Log Fires are available in a range of colours including Metallic Black with several trim options designed to suit any decor.

Clever fascia design incorporates a drop down control panel cover and convenient operation switch allowing you to turn the appliance on or off quickly.

An optional remote control allows you to adjust the Luminar Gas Log Fire to suit your own comfort levels from the convenience of a cosy lounge chair.

DIMENSIONS

Please note: Luminar gas log fires can be installed as either wall mounted or floor mounted. The Flue system must be installed by an Authorised installer. Some installations may require the provision of a hearth to protect the floor from radiant heat. Contact your Illusion dealer for more information.

The dimensions, etc quoted here are correct at the time of writing but may be subject to change. Please check with your dealer before commencing any building works or installations of these appliances. A slight reduction in performance may result if high ceilings, large glass areas or lack of insulation are present. Ultimate reserves the right to alter specifications without notice.  
Photos are for illustrative purposes only. Some colours may vary due to the printing process.

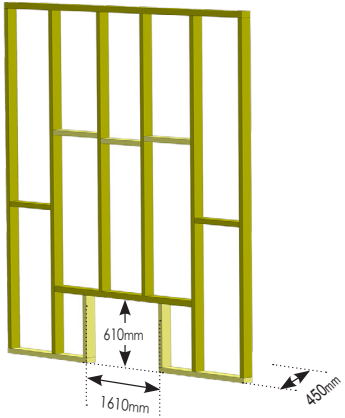

FRAME CUTOUT

Luminar 6000 Frame and plaster cutout dimensions.  
NOTE: Minimum frame depth 450mm.  
Example Floor mount shown below.

FLOOR MOUNT

The frame and plaster cutout dimensions as shown at right should be cut as accurately as possible to ensure adequate coverage by the appliance fascia. Illusion can supply fabricated full metal frames to simplify the installation and reduce costs.  
Frame cutout size is 1610mm wide and 610mm high

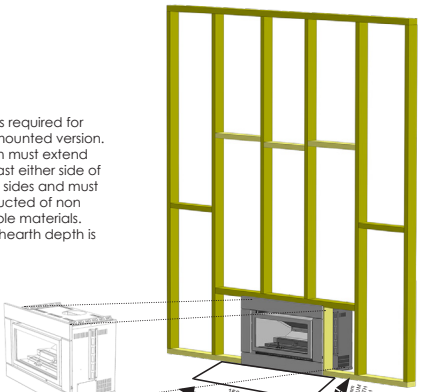

WALL MOUNT

A Hearth is only required for the wall mounted version if the bottom of the fascia is closer than 300mm to the floor. The hearth must extend 150mm past either side of the fascia sides and must be constructed of non combustible materials.

Frame cutout size is 1610mm wide and 610mm high

A Hearth is required for the floor mounted version. The hearth must extend 150mm past either side of the fascia sides and must be constructed of non combustible materials. Minimum hearth depth is 350mm.
