Russ Chaney Chief Executive Officer of the IAPMO Group
This GasMark Schedule supersedes all previously issued Schedules

Please note: Luminar gas log fires can be installed as either wall mounted or floor mounted. The Flue system must be installed by an Authorised installer. Some installations may require the provision of a hearth to protect the floor from radiant heat. Contact your Illusion dealer for more information.

FRAME CUTOUT

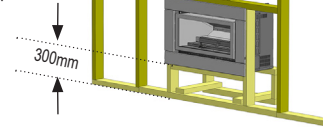

Luminar 4000 Frame and plaster cutout dimensions.
NOTE: Minimum frame depth 450mm.
Example Floor mount shown below.

FLOOR MOUNT
The frame and plaster cutout dimensions as shown at right should be cut as accurately as possible to ensure adequate coverage by the appliance fascia. Illusion can supply fabricated full metal frames to simplify the installation and reduce costs.
Frame cutout size is 855mm wide and 560mm high

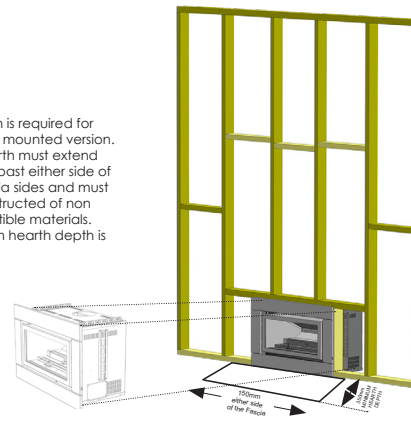

WALL MOUNT
A Hearth is only required for the wall mounted version if the bottom of the fascia is closer than 300mm to the floor. The hearth must extend 150mm past either side of the fascia sides and must be constructed of non combustible materials.

Frame cutout size is 855mm wide and 560mm high

A Hearth is required for the floor mounted version. The hearth must extend 150mm past either side of the fascia sides and must be constructed of non combustible materials. Minimum hearth depth is 350mm.
