Ron Chisney Chief Executive Officer of the IAPMO Group
This GasMark Schedule supersedes all previously issued Schedules

DIMENSIONS

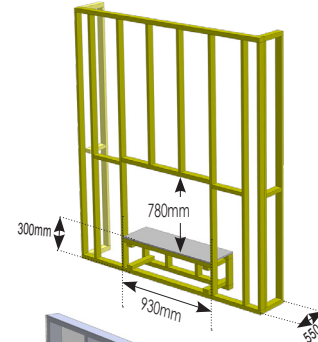

Please note: Matrix gas log fires fascias are available as either wall mounted or floor mounted. See above drawings for fascia sizes. The Flue system must be installed by an Authorised installer.
Some installations may require the provision of a hearth to protect the floor from radiant heat. Contact your Illusion dealer for more information.

FRAME CUTOUT

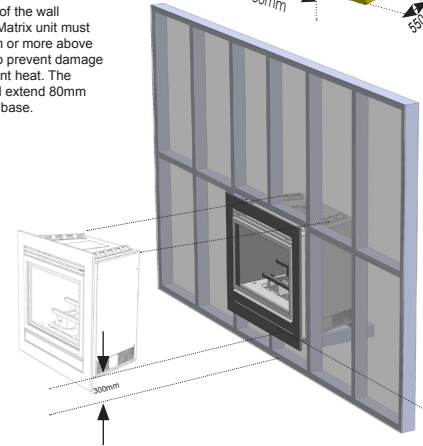

MATRIX SMALL Frame and plaster cutout dimensions.
NOTE: Minimum frame depth 600mm.
Example Wall mount shown below.

The frame and plaster cutout dimensions as shown above should be cut as accurately as possible to ensure adequate coverage by the appliance fascia. Illusion can supply fabricated full metal frames to simplify the installation and reduce costs.

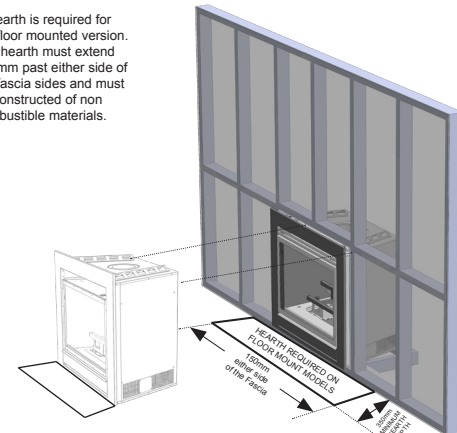

The cutout dimensions (Shown at right) are the same for both the Wall mounted or floor mounted versions of the Matrix Gas Log Fire.

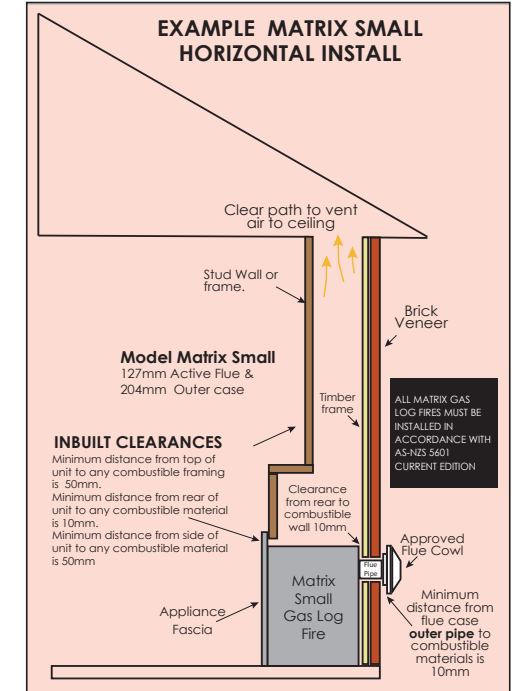

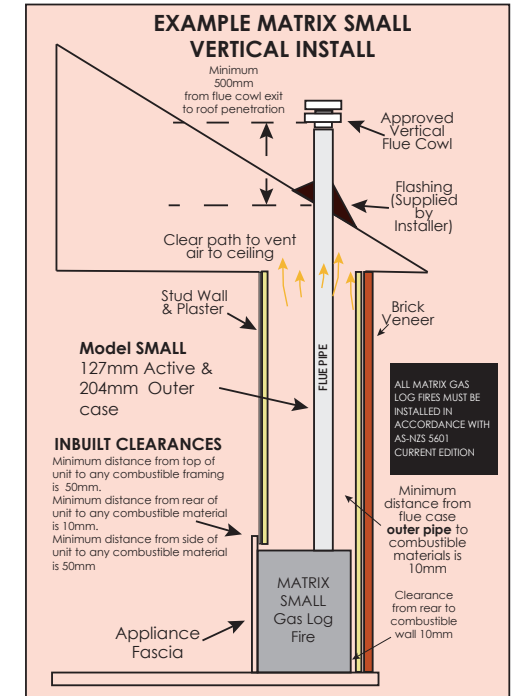

The base of the wall mounted Matrix unit must be 300mm or more above the floor to prevent damage from radiant heat. The Fascia will extend 80mm below the base.

A Hearth is required for the floor mounted version. The hearth must extend 150mm past either side of the fascia sides and must be constructed of non combustible materials.

INSTALLATION
