Pocket Spring Mattress Unpacking Instructions

Our mattresses are compressed and rolled when they leave our factory, this makes them more eco-friendly to transport and easy to store! Your mattress will need some time to expand and flatten before you're able to use it on your bed so please make sure you follow these instructions 24 hours before you wish to use it.

Step 1:

Remove the **first** layer of plastic packaging.

*Please ensure you are certain the mattress is compatible with your bed frame **before** this step as due to hygiene reasons we cannot accept returns when the plastic packaging is removed! Please take care if using a sharp tool to cut the plastic, you don't want to damage your new mattress (or your fingers!).*

Step 2:

Place the mattress on a flat, clean surface.
You will notice the mattress will begin to uncurl.

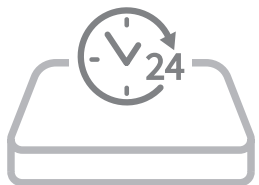

Step 3:

Remove the **second** layer of plastic packaging, again taking care if using a sharp tool.

Step 4:

Once the mattress is totally free from its packaging, leave it to uncurl on a flat surface. Although it can be used soon after this, it's best to give it 24 hours to expand to its full shape. Some small creases may still be present initially, these are normal and should disappear over time.

Wishing you a restful night's sleep!
