(AS/NZS 2172:2003)

#### RECOMMENDED MATTRESS SIZE 1310mm X 750mm X 110mm

This cot has been manufactured for use with a mattress which measures 750mm wide by 1310mm long and a maximum thickness of 120mm. The width and length are specified because it is important that the gaps between the mattress sides and ends of the cot will not exceed 40mm. This is to minimise the risk of a child's limb becoming caught in the gap. The thickness of the mattress has been specified to ensure that the depth of the cot is greater than 500mm with the mattress base in the lower position to minimise the risk of a child climbing or falling out of the cot.

#### Warning:

- \* TO ENSURE THE SAFETY, REGULARLY CHECK ALL THE CONNECTING BOLTS AND GLIDE PINS MAKING SURE THEY ARE TIGHT.
- \* TO PREVENT FALLS OR SUFFOCATION THE MAXIMUM MATTRESS THICKNESS SHOULD NOT EXCEED 120MM.
- \* TO PREVENT FALLS, THE MATTRESS BASE OF THIS COT SHOULD BE ADJUSTED TO THE LOWEST POSITION BEFORE THE CHILD CAN SIT UP.
- \* Follow the manufacturer's assembly instructions in detail to ensure the safety features of the cot are not compromised.
- \* Ensure the cot is placed at a reasonable distance from curtains, blinds, heaters and power points.
- \* Keep cot free of any toys, cushions etc that could be used as a foothold or present a danger of suffocation or strangulation.
- \* Keep medication, String, elastic or small items such as money out of reach from any position in the cot.
