

DOYLE VACUUM SYSTEMS

Quality. Performance. Reliability.

3 Chamber AIR-N-VAC

Coin-Operated 3-Chamber Air-N-Vac
Coin-Operated or Free-Use Configurations Available.

Standard Features:

- Stainless steel construction
- Polyethylene Domes (Blue/Green/Red/Yellow/White)
- 3-Chamber vacuum tank with separate dirt intake and collection chambers
- Two pleated cartridge filters provide 16 ft² of filter surface area - with expanded-PTFE surface membrane, filters are 99.7% efficient at 0.3 microns
- Large meter box, with internal frame for higher strength and security, will accommodate the packaging of various electronic options and/or allow future upgrades
- Meter panel door attached with piano hinge on one side and two heavy-duty Medeco cam locks (and extra lock tab) to protect your money and high-end electronics
- 5-Gallon bucket for dirt compartment
- 24-Volt control circuits
- Mechanical coin acceptor (Coin-Operated Models)
- Oil-less air compressor; available in 120 Volt or 240 Volt (single-phase).
- 25' Steel braided air supply hose
- Integral air trigger with pressure gauge
- 1.5" or 2.0" x 15' Crushable hose with duckfoot tool
- Fuse protected
