Designer Ceiling Light Acrylic Astronaut Balloon Children's Room

Installation steps:

- 01** Determine the installation position on the ceiling, and control the ceiling and penetrate the glue into the hole;
- 02** Use the wiring cap to connect the main power supply with the flight power line (pay attention to safety, power failure in installation);
- 03** Put in the light transmittance;
- 04** Test the power (after confirmation, complete the installation).

Safety precautions:

- This lamp is suitable for AC110V-240V 50/60Hz power supply.
- Please wear gloves to avoid scratching the surface and wires of the lamp.
- Do not install it on the dry ceiling, and the environment should be ventilated and dry. The lamp should be installed by professional electricians.
- Lamps should not be close to acid, alkali or corrosive chemicals or gases, should not be cleaned with water, but only used for clean soft cloth wiping.
- When cleaning lamps and replacing light sources, power supply shall be cut off.
