Instructions For Use

Step 1. Apply the splint with the knee flexed to maximize the angle of dorsiflexion.

Step 2. Attach instep strap first to hold the heel securely in the splint. Adjust the length of the straps and close. Then extend knee to check the tightness of the instep strap.

Step 3. Close dorsiflexion assist straps and adjust them to your tolerance level.

Step 4. Place toe wedge under toe for additional stretching in necessary.
