Upright is not positioned in center of tube joint.

7 NOTE: The inside of the upright is stepped to fit correctly around the small and large diameter tubes.

Tighten PT-Screws using a T-25 torx driver, starting in the middle of each upright, then the outer screws and lastly the remaining two to evenly tighten.

8 NOTE: Do not over tighten as this may strip out. Fastener will reach a noticeable stopping point.

Adjust Strap Buckles to lock into the tailgate when BEDXTENDER is deployed. Your assembly is now complete.

When the BEDXTENDER is at the furthest rear position, push down on the buckle to insert into tailgate latch. Tighten straps. To release, pull tailgate handle.

BEDXTENDER HD™ OPERATION

Flip BEDXTENDER out to contain cargo in the truck bed when the tailgate is open. CAUTION! 200lb maximum load on open tailgate. Always distribute cargo evenly and properly secure inside bed. Do not secure cargo to the BEDXTENDER or the tailgate.

Before driving, secure BEDXTENDER by locking the provided strap buckles into the truck's tailgate latches. To release, pull tailgate handle. NOTE: Ensure that both buckles are properly locked into the latches by pulling up on each strap.

Flip BEDXTENDER forward and close the tailgate to keep smaller cargo safe and organized.
