

# Introducing the Extraordinary ADL iD-35, iD8-A and iD-30 series of Companion Stereo Cables . The Highest Performance Personal Stereo Cables You Can Find!

ADL (Alpha Design Labs) uses Furutech's Pure Transmission Technology to create high-value, innovative designs that everyone can afford. And in the age of personal, portable electronics everyone carries their music with them to connect to iDocks, headphone amps, home audio and even car systems. And there's no better sounding (or hip-looking) cables than the iD30P series that comes in three versions to make every important connection you need with your Apple device.

## Not Just Another Pretty Face

The iD-35 Series are no ordinary cables; they've engineered and produced with Furutech's Pure Transmission technology and feature silver-plated α (Alpha) OCC conductor (28AWG) for minimal transmission loss and 24k gold-plated USB A-type or 3.5mm stereo connector, straight or angled. The cable achieves top-grade noise isolation using double-layer shielding – aluminum foil and tinned copper – in a RoHS-compliant sheath. The main conductors are treated with Furutech's α (Alpha) Process – a deep cryogenic and demagnetizing treatment. The result is outstanding, wideband, colorful and engaging sound that audiophiles and music lovers will love.

### iD-35 series

When it's impractical to connect your Cruise headphone amp via its USB input we've created the iD-35SP 3.5mm analog stereo cable.

USB sounds best, but the iD-35 comes in a close second! Either way you'll enjoy some of the best sound available while looking – and sounding -- as hip as they come!
