

Jupiter Copper in Cotton Insulated Wire

Jupiter offers a wide range of wires, including a 4N & 6N certified grade of oxygen-free copper, as well as, a cryogenically treated wire too. These Jupiter wires are all high purity metals with natural cotton insulation. Cotton insulation acts as a fibrous matrix for separating wires while maintaining a predominantly air dielectric, sonically very natural and open. So many of the modern innovations do not translate to better or more natural sound. Ideal for hook-up wire, interconnects and loudspeaker wire.

Certified OFHC Copper CDA 101. 99.99 Cu

Jupiter AWG14	1.63mm inner diameter, overall diameter 2.03mm, single 4N copper core, cotton insulated wire
Jupiter AWG16	1.3mm inner diameter, overall diameter 1.75mm, single 4N copper core, cotton insulated wire
Jupiter AWG18	1.11mm inner diameter, overall diameter 1.52mm, single 4N copper core, cotton insulated wire
Jupiter AWG20	0.812mm inner diameter, overall diameter 1.55mm, single 4N, copper core, cotton insulated wire
Jupiter AWG23	0.573mm inner diameter, overall diameter 0.9mm, single 4N copper core, cotton insulated wire
Jupiter AWG26	0.405mm inner diameter, overall diameter 0.8mm, single 6N copper core, cotton insulated wire
Jupiter AWG26 CRYO Ultra-thin insulation	0.405mm inner diameter, overall diameter 0.6mm, single 6N copper core, cryogenically treated, cotton-wrap insulated wire
Jupiter AWG28	0.321mm inner diameter, single 6N copper core, cotton insulated wire
Jupiter AWG28 CRYO	0.321mm inner diameter, single 6N copper core, cryogenically treated, cotton insulated wire
