*Innovative Audio Upgrade Products*

## AC Bullet

This new AC Bullet was designed to purify the incoming AC to be utilized in all types of equipment. Like all Bybee products, it is passive. It is designed to handle spikes and current up to 20 amps. Use is only limited to available space in the product being modified.

Made with 14 gauge copper wire and one inch leads, this AC Bullet conditions and improves all AC signal paths, delivering improvements to the performance of all components.

Typical uses include placement at IEC in component on positive leg. Power conditioners, Amplifiers, DACs, and Pre-Amps will all benefit from this product. In addition to audio, this product can also improve video. Lower current applications can consider Large Regular Purifiers or Small Slipstream Purifiers.

Body Length: 1 inch

Diameter: 1/2 inch

Leads: one inch, 14 gauge

Current-handling: 20 A

Voltage: >1000 V

Resistance: 0.025 ohm
