

HARK 2

This stylish and expandable racking system is purpose made for the compact Cyrus casings.

This contemporary vertical system rack features adjustable shelving and is purpose made for the Cyrus magnesium audio components. The Hark II rack features a sleek aluminium extruded side blade and cleverly hides wiring, whilst also providing a neat power distribution storage compartment. The slim plinth and studded feet provide a secure and stable base for your precious hi-fi components.

Like all Cyrus products, the Hark II rack is expandable. The kit comes complete with four shelves and a base for free-standing installation, but additional shelves for Cyrus components or laptop are available to order. This stylish system can hold a total of 8 units, so will meet the needs of most audiophiles.
