

### PURE SILVER

If you love fabulous sound and design, get ready for a blissful encounter. From each of eight new Silver Series models you'll experience a unity of form and function that is as precise as it is compelling; the product of over forty years of speaker development, invested with our love for accurate audio, imbued with our belief in design perfection.

Abundant dynamics bearing a wideband response rich with textures and detail; holographic clarity and wonderfully accurate imaging – all the ingredients of great sound brought to a breathtaking focus by the refinement of our flagship technologies and the introduction of new acoustic innovation. Combined in perfectly voice-matched systems for music and film, Silver delivers the sonic superlatives but also reaches a new level of lifestyle appeal. Super-slender and finished in a choice of Rosenut, Walnut, Natural Oak, and Black Oak realwood veneers – and in devastatingly chic gloss black and white – the new Silver range has the power to complement any room without sacrificing living space. It's a beguiling force of nature and state-of-the-art loudspeaker design, made to re-energise entertainment in your home.

## FILL THE AIR NOT THE SPACE

We've set the bar high for Silver. Building on the DNA of its multi-award-winning RX predecessor, new Silver adds lustre with an exceptional balance of performance, versatility and value, fine-tuned by extensive FEA modelling and dedicated listening. Anyone can create an expensive speaker; it takes genuine expertise and imagination to achieve a unity of audiophile sound and seductive aesthetics across an affordable family of slender models.

Features introduced by our prestigious Platinum and Gold series speakers have been enhanced, and recent innovations in driver engineering incorporated across an extended new range, which includes two stand mount models: Silver 1 and 2; three floor speakers: Silver 6, 8, 10; and dedicated Centre, 'FX' surround and active subwoofer models. While Silver 1, 2, 6, Centre and FX retain the form factor of their predecessors, the Silver 8 becomes a full three way design, and new to the Silver genre, the Silver 10 tower offers an up-scaled floor-standing format, featuring twin 8" bass drivers for a deeper more dynamic and consistent response in larger rooms.

Beneath the precise craftsmanship of Silver's slender, The new bass and mid-range drivers deployed by Silver luxuriously finished cabinets, single bolt-through driver rewrite the rule book. Unlike conventional driver cones, which fixings act to brace the structure while eliminating the incorporate a centre aperture for the voice-coil, the RST° need for conventional driver fixings for a cleaner more (Rigid Surface Technology) C-CAM® designs deployed by the elegant styling – especially in tandem with Silver's 'invisible' Silver series take the form of a continuous uninterrupted dish. magnetic grille location. Each Silver cabinet is sleekly Strengthened by a uniquely dimpled surface their greater streamlined - the lustrous real wood veneers and gloriously- area radiates more sound, and driven by a larger voice coil glossed finishes unbroken by conventional fixings. Their and motor, delivers greater efficiency and a cleaner more absence is by design. Not only do the innovative through— accurate response. This means you'll experience all the natural bolts contribute to a more sophisticated cabinet appearance, dynamism of the original studio mix - complete with microthey decouple the driver and front baffle as well, removing a second timing — across a broader range of frequencies. New further source of resonance.

From our flagship Platinum speakers, Monitor Audio's HiVe®II port technology is incorporated on all but Centre, Silver 8 and 10 models feature a newly developed, low distortion FX and W12 subwoofer models. HiVe II uses a straight rifled 4" mid-range driver, operating in its own optimised enclosure to design to accelerate air flow and reduce turbulence for clean expose visceral levels of detail where your sense of hearing is powerful bass and superior transient response. Comprising most sensitive. Having a dedicated mid driver in these larger optimised circuits of polypropylene film capacitors, air core models brings balance to the entire driver system, matching and laminated steel core inductors, Silver Series crossovers truly dramatic output levels with accuracy at all frequencies for dovetail individual driver response with absolute precision a sound so well defined and three dimensional, you'll believe while maintaining the best possible signal integrity.

silver will reveal the rhythmic pulse of your favourite music and movies like never before.

you can almost touch it

# The super compact new Silver 1 features a single 6" C-CAM bass/mid-range driver featuring dimpled RST cone technology in a classic two-way monitor configuration. Size-defying high output and dynamic delivery make the Silver 1 the ideal choice

for small to medium rooms in two-channel stereo or multichannel cinema systems.

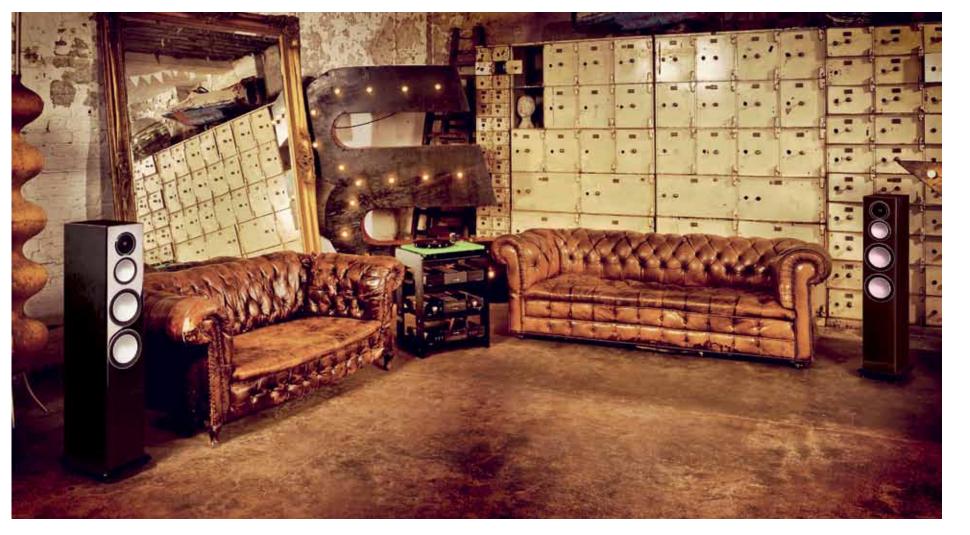

The Silver 6 incorporates a 6" C-CAM RST bass driver and 6" C-CAM RST bass/mid driver in a 2.5 way system configuration. The drivers are housed in separate acoustic chambers within the enclosure design to provide differential tuning for higher efficiency and enhanced low frequency extension. Excellent dynamics combined with a naturally rhythmic sonic character and tight, controlled bass make the Silver 6 an outstanding communicator of music and film audio in medium to large rooms.

critical frequency band to deliver superb midrange focus and even in larger spaces.

The Silver 8 has a new three-way design featuring Silver's 4" precision as well as extended bass. A taller, shallower cabinet C-CAM RST mid-range driver flanked by long-throw C-CAM and improved damping allow for greater room position RST 6" bass drivers. Introduced for Silver, this specialised flexibility, while higher sensitivity and impedance make the configuration is optimised for greater accuracy over a Silver 8 easier to drive for effortless room-filling dynamics,

### SILVER 10

Silver 10 is a completely new model introduction, comprising a three-way configuration in a large floor-standing tower system. For Silver 10 the 4" C-CAM RST mid-range driver is flanked by 8" C-CAM RST long-throw bass drivers. The acoustic design is similar to the Silver 8 but the enhanced driver size means that the 10 is equipped to energise the largest of rooms with naturally explicit wideband audio from music and film sources.

### SILVER CENTRE

The compact Silver Centre features twin 6" C-CAM RST bass/mid-range drivers in a familiar M-T-M array. The Silver Centre has been tuned to match the tonal character of its Silver range mates for a seamless front sound stage in multichannel applications.

### SILVER W12

The new Silver W12 active subwoofer introduces a number of new design developments housed in a compact high power unit. A new 500 watt DSP controlled amplifier utilises advanced switch-mode power conversion techniques and superior processing to increase dynamic control and deliver far greater head-room. The W12's sealed box construction ensures that this potent unity of power and control delivers tight, fast and tuneful bass all the way down to a thunderous 22Hz in a typical room set up. The sealed box, front-firing driver design makes for easy installation and EQ where close proximity to a room boundary may be necessary.

The W12 also features Monitor Audio's proprietary and innovative APC (Automatic Position Correction) system, which uses a microphone and test tones to identify detrimental room modes and correct frequency response for the room and position automatically. This simple and quick process will ensure perfectly optimised seismic bass quality in any room.

enveloping audio experience, featuring brilliant natural detail of 'being there'.

The gorgeous wideband sound that distinguishes new Silver's and dynamics, supported by a rich layer of deep bass potency two-channel models is multiplied by the Silver 6AV12 from the awesome 500 watt Silver W12 subwoofer. Identical 6" system, designed to blend with your home but fill the space C-CAM RST drivers and C-CAM tweeters across the front and with pulsating fidelity every time you watch a movie. We've rear channels will bring the latest high definition soundtracks teamed the slender Silver 6 floor stander with the acoustically alive with such astonishing three-dimensional accuracy, you'll matched Silver Centre and dual-dispersion FX surrounds for an willingly surrender your disbelief and relish a tangible sense
