

UEF Purple Duplex

Purple means power.

The Purple Duplex has an entirely new mechanical and material formulation selected during Double-Blind Testing, where we compared different duplex designs, choosing the one that sounded best. We then added brand new UEF Tech, first developed for our new SRX cable loom, and Purple fuses for a lower noise floor with enhanced soundstage scale and realism. We then applied the Purple Fuse's Long Duration, High Voltage Conditioning Process. Hence, the new Purple Duplex shares the same house sound of high resolution with rich musicality as our Purple Fuses. Lastly, we went with a floating ground design so that noise from your wall junction box is isolated from your system: the net result is the highest resolution and most musical duplex in Synergistic Research history.

UEF Purple Duplex Specifications

Technical information:

Amps: 20A

Volts: 125V

Volts (AC): 125

Capacity: Duplex

Wire Capacity: 14 - 10 AWG

Body: Thermoplastic Nylon

Outlet: 2 pole 3 wire grounding 15A 125V

Dimensions:

Depth (US): 1.130"

Height (US): 3.26"

Width (US): 1.322"
