

MovieStar 70

Cutting edge home cinema

Wharfedale's MovieStar sub/sat systems offer a no compromise solution for those who want a small, tidy, discrete loudspeaker system for their home cinema or multi-channel music system, but refuse to tolerate the inadequate sound proffered by such systems.

MovieStar 70 is a design icon, with cool, flowing lines to fit into modern surroundings and exquisite engineering to adapt function into form. Outstanding build quality and technology produce a wide and even frequency response, detailed and enthralling.

High Octane Entertainment...

Inspired with industrial style, the MovieStar 70 is every bit as robust as its appearance suggests.

Ideally suited to modern living, it is both compact and powerful, delivering up to 100w per channel of clear and detailed sound from a heavyweight two way sealed enclosure.

A 25mm textile dome tweeter unit provides a level frequency response beyond 25kHz and a 100mm long-throw polypropylene bass/mid driver integrates smoothly to provide a smooth, refined mid-range with plenty of impact.

The MovieStar 70 centre channel is tuned and has a slightly extended frequency response to cover the entire vocal range, while a powered subwoofer with a built-in 150w amplifier completes the system and provides the necessary drama and excitement to make this a simply awesome experience.

System tuning is simple and allows adaption to a huge range of room sizes and configurations. The active

subwoofer is fully adjustable with controls for crossover frequency,

volume and even phase adjustment, the satellite

speakers can be wall mounted, ceiling mounted or

stands are available separately. The subwoofer can

be placed anywhere as bass is largely directionless

and the magnetically shielded centre channel is

safe in close proximity to televisions or monitors.

A good Home Cinema system must be versatile

and engaging for both movies and music. It must

cover a wide frequency range and be adaptable to

a wide variety of rooms and systems and have a

class that enables it to blend seamlessly into its surroundings, but

these are just the practical considerations.

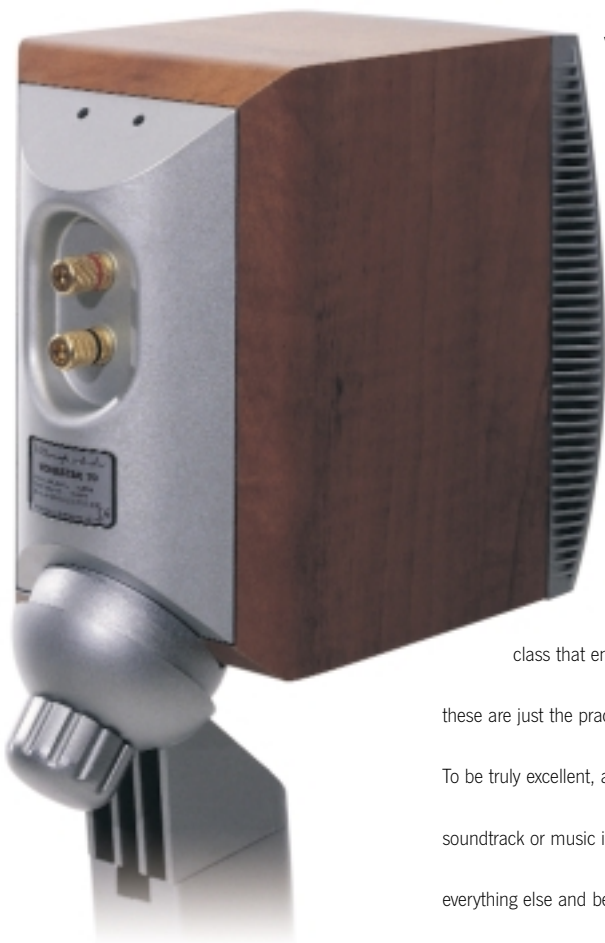

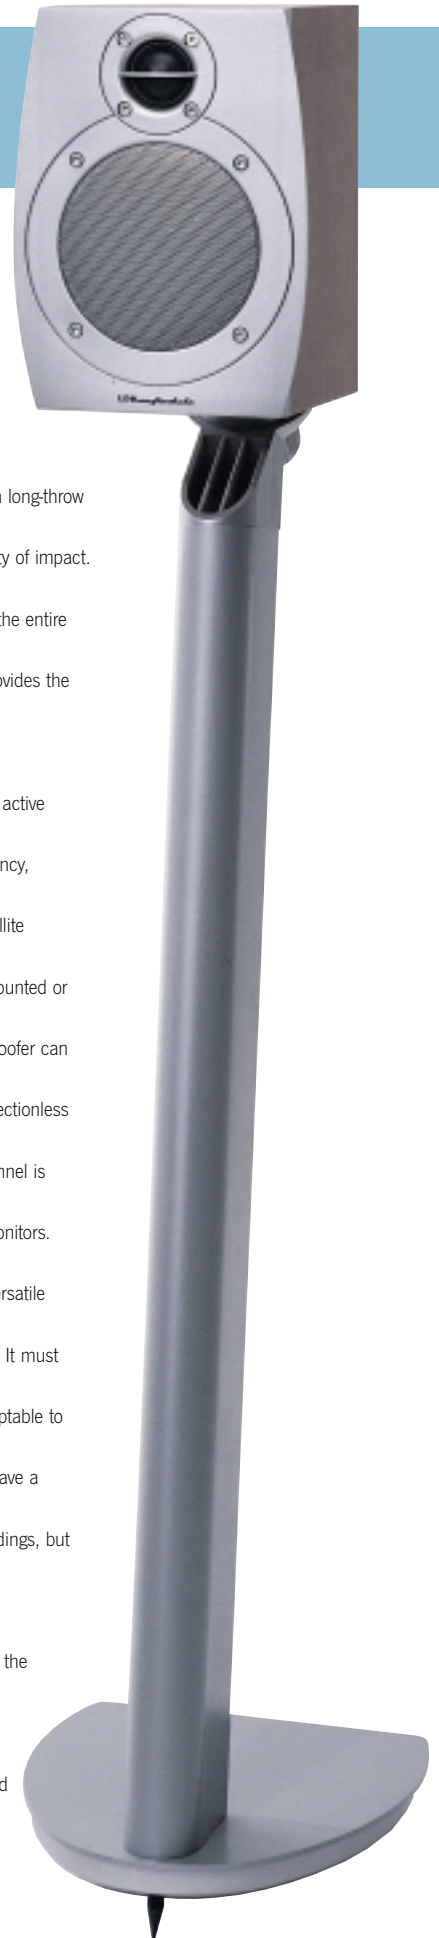

To be truly excellent, a surround sound system must draw you into the

soundtrack or music in such an involving way that you can forget

everything else and be swept along with the emotion. It must sound

both natural and exciting. With the MovieStar 70 system, you will

not be disappointed.

Precision engineering of the very highest quality ensures that every Wharfedale speaker provides the crystal clear sound and detail needed to bring any music or soundtrack to life. Our unique multi-angle mounting system means the satellites can be wall, ceiling or stand mounted with incredible ease.

Features

- High power Subwoofer with 150w internal amplifier
- High and low level inputs
- Continuous crossover adjust for excellent system control
- Phase adjustment for optimum integration
- High Quality LS gold-plated speaker terminals
- Tonally matched satellite speakers
- Outstanding build quality and construction
- Long-throw polypropylene bass/mid drivers
- Full frequency range response
- Ceiling or wall mount
- All cables and brackets supplied

Specifications

Model	70+ Satellite	70+ Centre	70+ Sub
Bass	-	-	200mm 8"

			Height with feet: 340mm

MovieStar 70 - 5.1

The MovieStar 70+ system is also available as a fully active system – no need for separate amplification. This is supplied with our 'MovieStar control system' subwoofer which includes built-in amplification for all speakers and a Dolby Pro-logic decoder. Simply plug your audio sources directly into the subwoofer for full-range, glorious surround sound.
