

WIREWORLD®

CABLE TECHNOLOGY

Silver Starlight 7: With sound quality that clearly surpasses the original Platinum Starlight USB, this reference cable utilizes the improved Platinum Starlight 7 design, but with silver-clad OFC conductors and aluminum connectors. With over 10.2GBps transmission speed, this gold-plated USB cable provides rewarding improvements in musical detail and dimensionality.

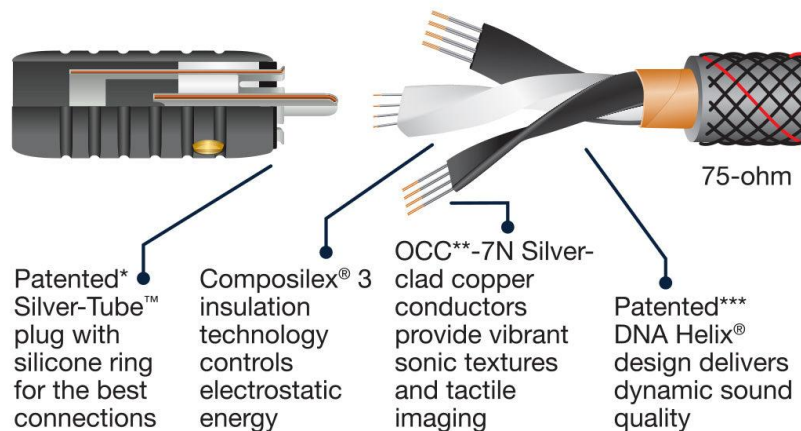

*Oxygen-Free Copper

Silver Starlight 8: By combining the world-class Gold Starlight 8 design with OCC-7N silver-clad copper conductors to save cost, Silver Starlight 8 makes reference-standard digital audio performance more affordable than ever. This elegant cable produces dramatic improvements in clarity, 3-D focus and dynamic contrasts. Available in RCA to RCA termination, as well as RCA to BNC, BNC to BNC and BNC to RCA.

Silver Starlight® 8 Digital Audio Cable

Innovative designs connecting passion with technology
