

# WIREWORLD®

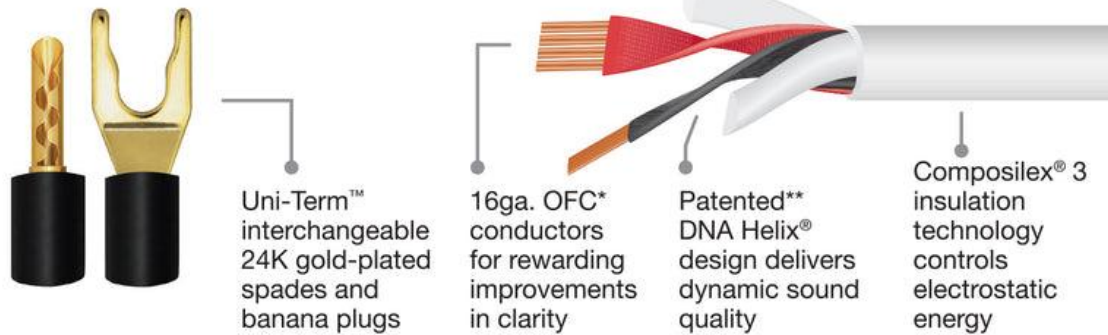

## CABLE TECHNOLOGY

This highly flexible 25-gauge mono audio cable utilizes Wireworld's patented DNA HELIX conductor geometry with 100% shielding and proprietary COMPOSILEX 3 insulation to improve the fidelity of consumer and professional audio systems. As the most affordable DNA Helix speaker cable, Stream 8 provides cleaner and punchier sound than other cables twice its size. This cable provides the same class leading sound quality as Helicon 16 OFC in a durable round cable that's great for installations.

Close your eyes and feel the guitarist's fingertips sliding along the strings as he prepares to strike a new chord. Hear the vocalist draw a breath before the song begins. With this kind of clarity it's easy to imagine the concert is being played just for you. Our audibly superior designs and materials clearly disprove the common belief that a heavier gauge is all a cable needs. From a highly flexible in-wall, to objectively engineered reference standards, Wireworld speaker cables will open up your ears to an exciting new listening experience.

### Stream™ 8 Speaker Cable

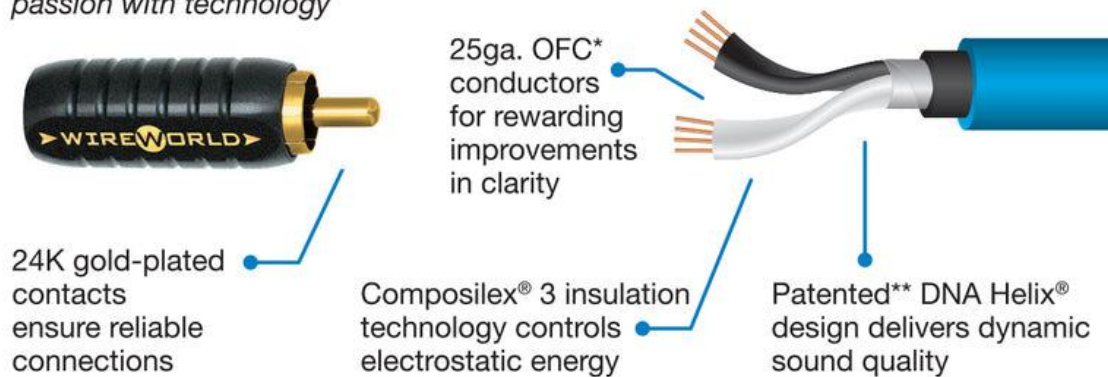

*Innovative designs connecting passion with technology*

\*Oxygen-Free Copper    \*\*U.S. Patent #8,569,627

### Stream™ Audio Interconnect Cable

*Innovative designs connecting passion with technology*

\*Oxygen-Free Copper    \*\*U.S. Patent #8,569,627
