

# WIREWORLD®

## CABLE TECHNOLOGY

**Sphere™ HDMI Cable:** Like its predecessor, Sphere 48 provides class-leading sound quality while refining the best qualities of the latest generation video imaging. The combination of Wireworld's proprietary Uni-Path™ design and ultra-quiet Composilex® 3 insulation are unsurpassed in providing improved sound and image quality. Immerse yourself in the stunning beauty of high definition the way it was meant to be. Wireworld's award winning HDMI cables are widely regarded as reference standards for HDMI video and audio fidelity. Uniquely engineered to be incredibly fast and quiet, their Uni-Path™ and Symmetricon® designs with Composilex® 3 insulation deliver crystal clear definition and vibrant color. Every current model and length exceeds the official HDMI2.0 specifications supporting all the latest features, including 4K/60fps, 3D, 4:4:4 color and HDR. For 30 feet/9 meters and longer lengths, Wireworld Sphere and Radius HDMI cables feature HD-Bridge active technology, which uses a state-of-the-art 50Gbps chipset with exclusive adaptive capability to maximize performance and system compatibility.

### Sphere™ 48 HDMI® Cable

*Innovative designs connecting passion with technology*

24K gold-plated contacts ensure reliable connections

\*Oxygen-Free Copper

Uni-Path™ structure reduces signal loss for superior performance

Composilex® 3 insulation improves clarity & dynamics

OFC\* conductors for rewarding improvements in clarity
