

WIREWORLD®

CABLE TECHNOLOGY

Platinum Starlight: Breakthrough sound quality made Platinum Starlight USB cables an industry benchmark for a decade. This cable continues that tradition with solid silver conductors, elegant carbon fiber plugs, exclusive Uni-Path geometry and ultra-quiet COMPOSILEX 3 insulation. Also features double thickness shields and a fully isolated and filtered power conductor to maximize sonic purity. The ultimate digital cable for lifelike music reproduction. The ultimate DNA Helix 75-ohm digital cable with patented carbon fiber plugs and the finest conductor available, OCC®-7N Solid Silver, Platinum Starlight elevates the art of digital audio reproduction with truly authentic tone quality, enhanced musical expression and holographic imaging. For Series 8, the upgrade to Composilex 3 and adding more strand groups has increased musicality, resolution and dynamic contrasts.
