

WIREWORLD[®]

CABLE TECHNOLOGY

Stellar Fibre Optic: This extended-range 8K fiber optic HDMI 2.1 cable supports the 48Gbps data rate required for next generation 8K/120FPS video. State-of-the-art performance and extreme reliability are achieved with world-class American II-VI lasers and German Silicon-Line chipsets. OM3 laser-optimized fibers, double thick shielding and Kevlar fiber reinforcements add to the high-end performance and durability.

Supports ALL HDMI ULTRA features and capabilities, including HDR10+, HDCP2.3, Ethernet, eARC (Enhanced Audio Return Channel), Deep Color. UL-CMP/FT6 Plenum rated for in-wall applications, both residential and commercial. Wireworld Stellar fiber optic HDMI cable with 48Gbps speed is the first Optical HDMI Cable to Receive HDMI[®] 2.1 Ultra High Speed Certification.

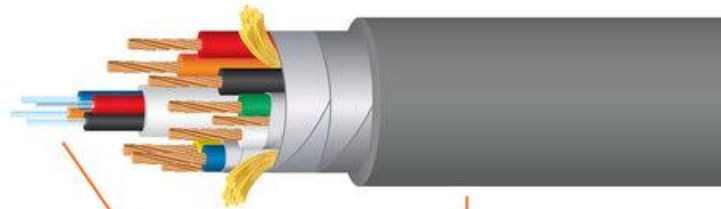

Stellar[™] Fiber Optic HDMI[®] Cable

Experience America's first upgrade HDMI brand.

II-VI brand, American laser modules for long-term reliability

Silicon-Line brand, German driver chips maximize definition

Superior OM3 laser-optimized fibers improve image quality

8K/120 Ultra-HD 48Gbps supports **ALL** HDMI2.1 capabilities
