

### Fidelity Components

#### MCap

The MCap<sup>®</sup> SUPREME silver/oil is an oil impregnated metallised polypropylene dielectric capacitor. As the name indicates, high-purity silver is used for the capacitor coating, and the winding is impregnated with a special oil developed in an exhaustive series of experiments and listening tests. Both these features contribute to an even fuller and smoother tonal richness and diversity. Our state-of-the-art metallised polypropylene foils make it possible to maintain extremely low production tolerances that cannot be achieved with traditional oil/paper capacitor designs. This is also the first time that the benefits of oil-impregnated capacitor design have been successfully combined with the well-known long-term stability of metallised paper and internal series wiring for induction-free SUPREME performance. (see also page 9)

Its lively reproduction of music impresses in particular with its subtly dynamic speed, precision and marked fine detail.

#### Technical specifications:

Dielectric: Polypropylene  
 Dielectric strength: 1 200 VDC  
 Loss factor:  $\tan \delta = 0.0002$  @1 kHz  
 Loss factor:  $\tan \delta = 0.0001$  @10 kHz
