Bowl Stools

2017

Stools

The BassamFellows Bowl Stools get their visual substance and design purity from the shape of a bowl. Bowls are objects to hold in your hands, to caress, and the Bowl Stools, carved out of solid blocks of wood, similarly invite touch. The stools' legs are pure ovals, an elegant visual contrast to the chunkiness of the seat without distracting from the quiet simplicity of the overall form. While the counter and bar versions of the stool are slightly dished for comfort, the dining height version of the stool is flat, allowing the stool to double as a side table.

Circular Stools

2016

Stools

Craig Bassam designed the Circular Stool to be a “quiet,” functional object that could be used in many different interior environments without competing for attention. The elemental simplicity marries pure geometry with high craft. A sturdy but agile floating presence is created by the stool’s base, made from circular sections of nanoceramic coated steel tubing. The legs are bent to the tightest possible radius for elegance and sophistication. Circular stanchions elevate the upholstered seat from the base creating the appearance of exceptional lightness.

Cluster Stools

2017

Stools

Some of the most innovative, powerful design takes its strength from its sculptural elements. In certain cases it is a sense of fragility that offers impact. At other times it is the imposing, muscular heft of the object that strikes a chord: A strong sense of presence. The BassamFellows Cluster Stool is a simple, easy to move object for sitting on, and it stacks neatly away without the need to be hidden. A group of Clusters looks "on purpose," and pleasing to the eye. It belongs to a canon of utilitarian, Modernist stools and looks like the kind of ultra-functional object you may find in a Japanese onsen – a design that may have existed unchanged for centuries. It is stark, but the dip in the seat and the rounded taper of its four legs is elegant and sculptural.

Dish Stools

2017

Stools

The BassamFellows Dish Stools are companion pieces to the Pipe Chair collection. The stools have the striking silhouette and strength of an A-frame stance. The tubular stainless-steel structure holds a solid wood seat that is carved in two directions. From the top, the seat is a perfect circle dished for ergonomic comfort while underneath, it is carved to integrate with the frame, melding two materials together – structure and wood. Originally the design brief required the stools to be appropriate for both indoor and outdoor use. Outdoor versions are available in appropriate woods such as Teak or Iroko. The dining height stool/table is stackable.

Pebble Stool

2017

Stools

The BassamFellows Pebble Collection was inspired by a single simple pebble. Architect, Craig Bassam found himself returning again and again to a small, pleasingly shaped pebble he had picked up while walking on the beach on Cape Cod. It had been sitting on his desk for some time and served as a kind of organic stress ball – something tactile and pleasing to turn around in his hand, but also to inspire visually, like a kind of incidental, miniature Henry Moore. The Pebble Stool, which harks back to the object that still sits on Craig Bassam’s desk, looks like one of the simplest pieces in the set, but was one of the most complex to develop. Numerous prototypes were worked on, with incremental changes to the sculptural shape of the solid wood seat to achieve optimum comfort.

Petal Stools

2018

Stools

The BassamFellows Petal Chair is the most advanced 3D molded wood veneer chair ever put into commercial production. It takes some of its inspiration from Saarinen's Tulip chair, and also offers a dialogue with the history of the Charles and Ray Eames experiments. The super-shaped wood mimics the unfolding of flower petals, creating a comfortable ergonomic form. The back is wider at its top to provide support, while rolled waterfalls of shaped wood soften the edges. Petal's appeal is accentuated by the visual grain of the wood, which resembles the fine detail on a flower – the lines emanating outwards in the direction of a bloom.

Spindle Stools

2014

Stools

The Spindle Chair was inspired by a visit to Louis Kahn's Exeter Library. Designer Craig Bassam's imagination was ignited when he noticed the traditional utilitarian chair juxtaposed against the powerful geometry of Kahn's building. Seduced by its elemental simplicity, Bassam wanted to offer a new take on the classic piece, a descendent of the classic English Windsor Chair. One first notices its weightless quality, which Bassam achieved by using metal for the chair's legs and spindles, giving the illusion of two floating surfaces. A counterpoint to the metal spindles is the chair's timber elements, including an ultra-comfortable ergonomic seat carved from solid wood.

Made in Italy

Tractor Stools

2000

Stools

Since debuting at the Milan furniture fair in 2003, the BassamFellows Tractor Stool has become a bona fide modern icon. From the outset, it has proven to be a piece of infinite variety and its versatility is evident in the sheer number of spaces in which it appears. It's the rare piece of contemporary furniture – equal parts purpose and presentation – that exudes timelessness and ineffable contemporary cool. The dynamic form of the object – a kind of luxurious reimagining of the prosaic workman's footstool – evokes a warm, organic feel that symbolizes nature and invites interaction. The stool's shape is directly influenced by the precise ergonomics of a Swiss tractor seat. Carved from a piece of sustainably harvested solid wood using CNC technology, the stools are then hand-finished by expert cabinetmakers. The stool is elegant yet informal, and supremely comfortable.

Wood Frame Stools

2015

Stools

Craig Bassam designed the Wood Frame Dining Collection to be remarkably lightweight and sophisticated without interfering with comfort. This was achieved by reducing the form of the chair to its essence – an exposed structural fine wood frame that integrates all elements of the chair, connecting seat, back and arms while creating a ‘caged’ effect. The wood elements produce the chair’s distinctive side profile and back view, two of the most important angles of any dining chair when viewed around a table. The outer corners are softly rounded, a BassamFellows signature, and the exposed rear frame becomes both a handle to maneuver the chair without touching the upholstery and a convenient place to hang a jacket or sweater. Cushions have also been slimmed to the absolute minimum without sacrificing comfort. The backrest is structural but designed with a non-rigid upper frame to keep its profile as thin as possible while building in flex for movement.

Bicorn Chair

2017

Chairs

The Bicorn Chair was the result of an exciting and challenging collaboration with Isay Weinfeld, who invited us to create designs for a landmark dining space in New York City. The chairs had rigorous criteria – they needed to be suitable for outdoor use, they needed to be stackable, and they also needed to be in one of our distinctive, beautiful materials. The chair is light with fully integrated elements. The arms are wholly cantilevered and appear to float unsupported, while the metal frame forms a back loop that can be used as a handle to assist with moving. The backrest and seat are both solid carved wood. There is also an indoor version with a padded, upholstered seat. The name for the chair seemed so obvious to us – when we looked at the finished shape, we immediately saw Napoleon's iconic maritime millinery.

Brutus Chair

2019

Chairs

The BassamFellows Brutus chair has its roots in the powerful Modernist vernacular of Perriand and Jeanneret, but is softer and visually lighter. It emphasizes certain sculptural elements, elevating visual aspects evident in much Brutalist design, but updated with an organic smoothness. It is more “cut” than it is “built”, and its shape looks like it has been weathered naturally and then manipulated – the silhouette of the back suggests a giant shell that has been machined to create a striking squared-off hole in the center. The back and seat look like a single sculptural element, the horizontal and vertical planes meeting with pleasing curves.

Wood:
Solid Beech
Solid Oak
Solid Walnut

Finish:
Ebonized black lacquer on Beech. Raw effect lacquer on Oak. Hand rubbed natural oil on Oak or Walnut, or hand rubbed black oil on Walnut.

Seat:
Natural Vienna Cane with double layer and reinforcing mesh, or highly elastic woven membrane suspension with dense foam upholstery and welt detail.

Made in Italy.

Geometric Chair

2017

Chairs

The Geometric Collection from BassamFellows celebrates the sublimity of pure geometry championed by the Wiener Werkstätte and the Bauhaus. The Geometric Chair elegantly combines a variety of materials in a single design. It features an ergonomically shaped seat carved from solid wood and a lightweight pellicle skin of Vienna cane. The nanoceramic coated tubular steel is wrapped with natural grain leather for high touch comfort and to conceal all welds, joinery, and seams, forming a signature element that runs through the Geometric Collection. Leather wrapping also provides extra comfort and support by connecting the two structural elements of the chair's tubular steel back. The chair's seat cushion features knife edge construction and inverted seams.

Mantis Chair

2008

Chairs

Inspired by the noble praying mantis, the signature stance and powerful limbs of this chair offers a study in contrasts. Strong and elegant, sharp and curved, thick and thin — the Mantis is sturdy and solid, yet visually light. Designer Craig Bassam conceived the chair to be a new American classic, an object that possessed measurable gravitas and wasn't overly indebted to the classic dining chairs associated with mid-century Europe. From certain angles, the Mantis Chair feels almost like a piece of sculpture. Carved entirely from solid wood, it is a new alternative to the classic and indestructible courthouse chair. Unlike many of its predecessors, however, comfort is at the forefront, with a commodious, ergonomically shaped seat. A hand-stitched leather cushion can be added to amplify both comfort and luxury.

Ovoid Chair

2019

Chairs

The BassamFellows Ovoid Chair is a deceptively simple and casual chair derived from the pure geometry of elliptical forms. With a big sit despite a smaller footprint, Ovoid is the kind of pull-up chair that defines ease. With no sharp edges and no corners, the chair lends itself to random, organic layouts that encourage viewing, lounging or leaning in multiple directions. The chunky, sculptural wood base with elliptical legs suspends and floats the signature upholstered seat and back creating a clear separation of parts and contributing to a sense of lightness.

Upholstery:
Foam upholstery with welt detail.

Made in Italy.

Petal Chair

2018

Chairs

The BassamFellows Petal Chair is the most advanced 3D molded wood veneer chair ever put into commercial production. It takes some of its inspiration from Saarinen's Tulip chair, and also offers a dialogue with the history of the Charles and Ray Eames experiments. The super-shaped wood mimics the unfolding of flower petals, creating a comfortable ergonomic form. The back is wider at its top to provide support, while rolled waterfalls of shaped wood soften the edges. Petal's appeal is accentuated by the visual grain of the wood, which resembles the fine detail on a flower – the lines emanating outwards in the direction of a bloom.

Spindle Chair

2012

Chairs

The Spindle Chair was inspired by a visit to Louis Kahn's Exeter Library. Designer Craig Bassam's imagination was ignited when he noticed the traditional utilitarian chair juxtaposed against the powerful geometry of Kahn's building. Seduced by its elemental simplicity, Bassam wanted to offer a new take on the classic piece, a descendent of the classic English Windsor Chair. One first notices its weightless quality, which Bassam achieved by using metal for the chair's legs and spindles, giving the illusion of two floating surfaces. A counterpoint to the metal spindles is the chair's timber elements, including an ultra-comfortable ergonomic seat carved from solid wood.

Wedge Chair

2018

Chairs

The Wedge Chair mixes visual simplicity with an involved technique: to achieve the angle silhouette that echoes the physicality of a sprinter at the starting blocks, the chair is supported by a pair of back legs that lean at 70 degrees, in contrast to the simple vertical lines at the front. The backrest is a key architectural aspect – cantilevered and supported by thin wooden armrests sculpted to be wider at the front for function and tapered away to as little as possible behind. The construction is more complicated than the shape appears – to achieve the elements of negative space and lightness we wanted, we embedded a steel support in the armrest and backrest.

Upholstery:
Foam upholstery with single topstitch.

Made in Italy

Wood Frame Chairs

2015

Chairs

Craig Bassam designed the Wood Frame Dining Collection to be remarkably lightweight and sophisticated without interfering with comfort. This was achieved by reducing the form of the chair to its essence – an exposed structural fine wood frame that integrates all elements of the chair, connecting seat, back and arms while creating a ‘caged’ effect. The wood elements produce the chair’s distinctive side profile and back view, two of the most important angles of any dining chair when viewed around a table. The outer corners are softly rounded, a BassamFellows signature, and the exposed rear frame becomes both a handle to maneuver the chair without touching the upholstery and a convenient place to hang a jacket or sweater. Cushions have also been slimmed to the absolute minimum without sacrificing comfort. The backrest is structural but designed with a non-rigid upper frame to keep its profile as thin as possible while building in flex for movement.

Pebble Lounge Armchair

2017

Lounge Chairs

The BassamFellows Pebble Collection was inspired by a single simple pebble. Architect, Craig Bassam found himself returning again and again to a small, pleasingly shaped pebble he had picked up while walking on the beach on Cape Cod. It had been sitting on his desk for some time and served as a kind of organic stress ball – something tactile and pleasing to turn around in his hand, but also to inspire visually, like a kind of incidental, miniature Henry Moore. The Pebble Lounge Armchair, which harks back to the object that still sits on Craig Bassam's desk, is an ample, fully carved wood chair – both highly tactile and grounding.

Salon Club Chair and Ottoman

2014

Lounge Chairs

The Salon Lounge Collection was conceived to fit harmoniously within any setting where conversation flows and conviviality is encouraged. Taken together or individually, the versatile pieces can be arranged in an assortment of layouts, ranging from anterooms and lobbies to guest bedrooms and hallways. In larger rooms, where their petit footprint makes them ideal for use in multiples, the Salon pieces can be arranged in the round or clustered with ottomans to create discrete seating areas. In silhouette, the Salon series evinces a certain gentlemanly brio; like a classically tailored topcoat that camouflages a feather light quilted lining. This visual illusion has been achieved through BassamFellows signature layering system, which features thin, down, feather and fiber-filled seat toppers and lumbar and bolster cushions, which are baffled inside to retain their structure and comfort.

Sling Lounge

2017

Lounge Chairs

The design vocabulary of the Sling Chair is analogous to BassamFellows' Wood Frame series: a seat engineered for comfort is suspended in a cubic frame, with a reclining back pitched to an angle that allows for both engagement and repose. BassamFellows pushes the structural boundaries in its designs while elevating design details to rarefied moments that quietly radiate true craftsmanship. The Sling Chair exemplifies this balance by pairing exceptionally soft and noble leather cushioning, filled with feather and down, with a lithesome four-post wood and steel structure. Nanoceramic coated steel tubes form a structural cage that supports a sling hammock of stitched leather straps anchored at the chair's top rail and seat deck.

Slink Lounge Chair

2018

Lounge Chairs

The BassamFellows Slink Lounge Chair is a contemporary take on a slipper chair. It takes some of its inspiration from classic automobiles. The bucket seat shape and thin padded shell appears to roll and have movement, giving Slink its name. The chair's base utilizes carved solid wood members that taper inward under the seat, much like an automotive chassis – providing exceptional strength while disappearing from view. Upholstery detailing features a signature welt and no seaming for a minimal, yet luxurious look.

Wood Frame Lounge

2005

Lounge Chairs

“Living in a glass house makes you design pieces to look immaculate from every angle,” says Craig Bassam, who designed the BassamFellows Wood Frame Lounge Collection for his own home. Despite being conceived ‘in the round,’ the lounges are infinitely adaptable pieces, appearing as chic in downtown Manhattan lofts as they do in Connecticut modernist homes. This versatility is the result of the lounge’s rigorously conceived form, which deconstructs the bulkiness of traditional lounge seating. As such, the form is reduced to its essence — an exposed structural wood frame elevated to fine cabinetry and a system of thin, layered cushions for ultimate comfort. Within its minimal profile are seat and back cushions comprised of a variable density foam core surrounded by plush down and feather pillows that are hand sewn, tufted and welted. Lumbar and bolster cushions are comprised of down and feather fill.

2004

Daybeds and Benches

Described covetously by The New York Times as a “solitary indulgence,” the BassamFellows Daybed is more than a piece of furniture - it’s an obsession. While a sofa is made to accommodate multiple parties, the Daybed is made for one alone—an experience that elevates the mundane to the glamorous. It is the ultimate expression of sensual luxury. The Daybed occupies a deservedly distinguished place in the history of furniture design and over the years it has become an important modernist staple. The BassamFellows Daybed is an evolution of that tradition with a solid wood frame constructed by expert cabinetmakers and an ‘achingly soft’ leather cushion. Hand sewn from four separate panels of leather, each cushion is padded with all-natural down filling for softness and edge-banded foam for sharpness. A separate headrest cushion is detachable and an oxidized brass support mechanism adjusts to three different positions.

CB-41 Daybed

Geometric Daybed

2017

Daybeds and Benches

The Geometric Collection celebrates the sublimity of pure geometry championed by the Wiener Werkstätte and the Bauhaus. The Geometric Daybed's seat deck is comprised of a wood frame with pegged slats engineered to allow for variable flex. The tubular steel base creates a continuous arc that holds leather cushions made of dual-density foam for comfort and support. Leather-upholstered cushioning is precision-crafted to fit securely and snugly within the tubular steel armature. Tufted cushions feature cross-angle seams that radiate from the tuft to align with the posts of the tubular steel structure, a gesture that highlights the design's overall geometry, linking back to the importance of linearity and architectural draftsmanship inherent in BassamFellows' work.

Museum Bench

2000

Daybeds and Benches

A fresh approach to the classic museum bench, BassamFellows' version is a sophisticated hybrid, ingeniously constructed using two separate frames, one made in hand-worked brass and the other in solid wood. The inner brass frame buttresses the bench's generous horizontal span, giving it balance and strength. Both frames are plainly visible to underscore the piece's structural integrity and synthesis of natural material. As with all the solid wood elements, precisely keyed joinery details emphasize the luxury of craft. The design of the Museum Bench allows for multiple configurations. The outer wood frame can hold a seating cushion or tray, depending on the desired use.

Slat Bench

2008

Daybeds and Benches

Infusing a soft humanistic character into this adaptive furniture essential, the BassamFellows Slat Bench was originally designed for a luxury hotel group. Conceived to meet the needs of a variety of environments, from highly trafficked commercial spaces to homes, the solid wood bench is a study in crafted simplicity and structural honesty. Solid wood beams form continuous lines; legs meld seamlessly into parallel slats spanning the bench's generous length. The resulting effect is one of both gravitas and surprising levity.

Stripe Bench

2008

Daybeds and Benches

Echoing its striking graphic effect, the Stripe Bench is a companion piece to the Stripe Table Collection. The bench is also made from alternating planks of solid Teak, Ash, and Walnut to create a “stripe” effect, adding a bold graphic punch to the simple, architectural base. (The plank top is also available in a single wood type, if desired). The top is carved to hold an optional seat cushion. Like other items in the Stripe Collection, the Stripe Bench evinces the BassamFellows ‘minimal artisanal’ ethos, displaying a contemporary, minimal profile whilst celebrating the integrity of natural materials.

Asymmetric Sofas

2014

Sofas

Designer Craig Bassam conceived the BassamFellows Asymmetric Sofa when he began looking for a stylish, scalable sofa that would be suitable for his personal study. He wanted a piece that would harmonize two competing needs – a sofa that would work during collaborative meetings whilst being appropriate for personal contemplation. Asymmetric is the quintessential landscape sofa group, which achieves asymmetrical or informal balance using closed and open elements that appear divergent, but carry equal visual weight. The group consists of three different lengths of sofa units, a corner unit, a chaise, and an ottoman. The planning module allows for a multitude of layout arrangements from a typical sofa format to landscape configurations where armed, armless, and backless elements can be combined to vary the horizon line of the piece and open it up to the room. Regardless of its configuration, the Asymmetric offers a supremely comfortable sit.

Geometric Sofa

2020

Sofas

The Geometric Collection from BassamFellows celebrates the sublimity of pure geometry championed by the Wiener Werkstätte and the Bauhaus. The Geometric Sofa elegantly combines a variety of materials in a single design. It features an ergonomically shaped seat carved from solid wood and a lightweight pellicle skin of Vienna caneing. The nanoceramic coated tubular steel is wrapped with natural grain leather for high touch comfort and to conceal all welds, joinery, and seams, forming a signature element that runs through the Geometric Collection. Leather wrapping also provides extra comfort and support by connecting the two structural elements of the sofa's tubular steel back. Seat and back cushions feature knife edge construction and inverted seams.

Salon Settee and Sofa

2014

Sofas

The Salon Lounge Collection was conceived to fit harmoniously within any setting where conversation flows and conviviality is encouraged. Taken together or individually, the versatile pieces can be arranged in an assortment of layouts, ranging from anterooms and lobbies to guest bedrooms and hallways. In larger rooms, where their petit footprint makes them ideal for use in multiples, the Salon pieces can be arranged in the round or clustered with ottomans to create discrete seating areas. In silhouette, the Salon series evinces a certain gentlemanly brio; like a classically tailored topcoat that camouflages a feather light quilted lining. This visual illusion has been achieved through BassamFellows signature layering system, which features thin, down, feather and fiber-filled seat toppers and lumbar and bolster cushions, which are baffled inside to retain their structure and comfort.

Occasional Tables

Designer Craig Bassam conceived the BassamFellows Asymmetric Sofa when he began looking for a stylish, scalable sofa that would be suitable for his personal study. He wanted a piece that would harmonize two competing needs – a sofa that would work during collaborative meetings whilst being appropriate for personal contemplation. This thinking led to the creation of the Asymmetric, the quintessential landscape sofa group. The group consists of three different lengths of sofa units, a corner unit, a chaise, and an ottoman. The Asymmetric Table Collection expands the planning options with three table sizes designed to work with the sofa modules. The tables can be used as end tables, to turn a corner, between sofa sections – or simply on their own. The top is carved from solid wood with a subtle edge detail borrowed from tray tables while the carved solid wood blade-like legs give the piece muscular lightness.

Circular Coffee Tables

2002

Occasional Tables

The Circular Table Collection marries pure geometry with high craft. From above, the piece emanates a strong geometric identity given that the circle is divided equally into wedge shapes with the grain of the wood radiating from the center. The tabletop is cut into three equal segments separated by a reveal and held together on the underside with a solid stainless-steel ring. The reveal allows the pie-shaped solid wood wedges to move freely with variations in humidity eliminating warping and splitting. A sturdy but agile floating presence is created by the table's base, made from circular sections of solid stainless steel— not hollow tubing – allowing the legs to be bent to the tightest possible radius for elegance and sophistication.

Plank Occasional Tables

Occasional Tables

2004

BassamFellows introduced the Plank Table Collection as a response to a design challenge: how to make an incredibly lightweight table that would appear to almost defy gravity? Like some of the best modern architecture, the Plank Table challenges typical notions of structure, often inviting puzzled looks from those who wonder how it is able to hover so effortlessly. The table's innovative design formula uses a triangular structure that is independent of the rectangular geometry of the top, the Plank Table's legs are thus minimized and the structural span is maximized. The result is a three-legged table with triangular cantilevers at each end, creating the illusion of a floating surface. Larger tables link two triangular structures back-to-back to form a zigzag pattern with four legs, achieving spans of up to 9 feet – the lightest possible visual to contrast the mass of the beautifully crafted solid wood plank top (some tables available with glass tops).

Spoke Occasional Tables

2013

Occasional Tables

The BassamFellows Spoke Table was originally commissioned by a large Australian architecture firm who were looking for the perfect wooden table that would complement other pieces from the BassamFellows collection. Evocative of simple geometric line drawings, the table features a large wooden ring supported by three spokes, which connect seamlessly to the outer edges. The perfect timber circle - the work of the company's master craftsmen - emphasizes the wood's grain, producing a compelling concentric effect best admired through a glass top. The table's elliptical legs achieve a slim, tapered silhouette which balances the top's sense of bold geometry. With no hard edges, the legs can appear wide or thin, depending on the angle in which you consider them. The result is a piece that balances heft and levity, an elegant and versatile table that marries architectural precision with timeless craftsmanship.

Tray Rack Side Table

2000

Occasional Tables

The idea of modularity is at the heart of the innovative BassamFellows Tray Rack Side Table, conceived in the spirit of luxurious contemporary living. The table provides a supremely simple and functional end table. Like other pieces in the collection, the Tray Rack utilizes the Stacking Tray as a basic building block. The Tray Rack is honestly constructed using alternating sections of solid wood that are layered and stacked to support the carved Stacking Trays. Solid brass 'runners' allow the trays to slide out for easy access. The effect is a piece that looks immaculately tailored. This is the kind of piece that is always useful and never out of place. The modular Tray Rack system is highly adaptable to different living or commercial environments. The Tray Rack table is suitable for any use where an end table is required. From bedside to the executive office, the removable trays are perfect for serving or entertaining.

Bicorn Cafe Table

2018

Tables

The Bicorn Chair and Café Table were the result of an exciting and challenging collaboration with Isay Weinfeld, who invited us to create designs for a landmark dining space in New York City. The chairs had rigorous criteria – they needed to be suitable for outdoor use, they needed to be stackable, and they also needed to be in one of our distinctive, beautiful materials. The chair is light with fully integrated elements. The arms are wholly cantilevered and appear to float unsupported, while the metal frame forms a back loop that can be used as a handle to assist with moving. The backrest and seat are both solid carved wood. The matching table uses the same materials as the chairs, with four continuous bent tubes that create the feet for the design, converging into a quad column. Available in Iroko for outdoor use.

Circular Dining Table

2002

Tables

The Circular Table Collection marries pure geometry with high craft. From above, the piece emanates a strong geometric identity given that the circle is divided equally into wedge shapes with the grain of the wood radiating from the center. The tabletop is cut into three equal segments separated by a reveal and held together on the underside with a solid brass or stainless-steel ring. The reveal allows the pie-shaped solid wood wedges to move freely with variations in humidity eliminating warping and splitting. (Custom versions of the table include four legs with four equal tabletop segments, allowing seating for four, eight or larger, depending on the size of the table). A sturdy but agile floating presence is created by the table's base, made from circular sections of solid naval brass or stainless steel— not hollow tubing – allowing the legs to be bent to the tightest possible radius for elegance and sophistication.

Geometric Dining Table

2017

Tables

The Geometric Collection from BassamFellows celebrates the sublimity of pure geometry championed by the Wiener Werkstätte and the Bauhaus. The Geometric Dining Table is BassamFellows' first pedestal table. It features a nanoceramic coated tubular steel base formed from a collection of radiating postal elements mechanically fixed and cinched together with wrapped leather. The leather wrapping conceals all mechanical joints forming a signature element that runs through the Geometric Collection. The top is veneered wood with a carved, solid wood edge. The veneer radiates from the center highlighting the design's overall geometry and the importance of linearity and architectural draftsmanship inherent in BassamFellows' work.

Kant Tables

2014

Tables

The BassamFellows Kant Table was originally designed as a private commission for a home in New Canaan, CT. The client desired a substantial, modern looking table that would hold its own within an oversized dining room. The Kant Table is a natural companion for the Mantis Side Chairs as it offers a similar study in contrasts: strong and elegant, sharp and curved, solid and light. Due to the table's ambitious dimensions, the challenge was to create an elegant, visually light base that would provide structural support for a solid wood top. Borrowing from architectural principles, the resulting tabletop is supported by twin beams and angled legs bound by a V-shaped truss support. Marrying the elegant with the formidable, the Kant Table offers great versatility. Counter height versions of the Kant Table are also available.

Leather Desks

2004

Tables

The writing desk is a classic furniture staple that marries beauty with functionality. Through proportion and engineering, BassamFellows has reimagined this time-honored piece, producing a sensuous status symbol for the ultimate sophisticate. Created in tandem with the BassamFellows Daybed, the Leather Desk is the ultimate expression of functional luxury. Structurally, the desk has a striking, slim silhouette, with each leg and corner joint dowelled eight times to provide strength despite the thin proportion. This creates a sense of levity, when contrasted against the desk's solid wood construction. Legs, side members, and structural spans are reduced to their essence and carefully considered in relationship to each other. The absolute purity of form masks the true genius of the desk's function. Three slim drawers, nearly imperceptible to the eye, are cut away from the structure allowing the user to keep the desktop clear when not in use.

Sharp Boxes

2008

Storage and Accessories

BassamFellows believes that every component of contemporary living should be beautiful, even the items some may consider quotidian. This notion - elevating an everyday storage receptacle into a piece of functional art - inspired the BassamFellows accessories collection. The Sharp Collection is defined by its strong, sculptural forms. Taking their inspiration from an axonometric view of a simple box, the pieces are carved and sliced from a solid wood block, offering a design juxtaposition between their precise architectural shapes and the warm character of the wood. At home in almost any room, the supremely functional Sharp Series consists of a long box, a short box, and a tall box, all with lids; Think of them as modular, functional art to enliven the desktop, living room or bath.

CB-101 Sharp Box Long

Exterior

Storage and Accessories

BassamFellows believes that every component of contemporary living should be beautiful, even the items some may consider quotidian. This notion - elevating an everyday storage receptacle into a piece of functional art - inspired the BassamFellows accessories collection. By contrast to the Sharp Collection, the Soft Collection features gently turned edges, celebrating the tactile and warm nature of each piece, which is carved from a solid wood block. Items of sculpture in their own right, the series can be used individually or as part of the modular system. Consisting of a long box, a short box, each with lids, and an organizing tray, these elemental, strikingly simple storage containers add an accent of luxury to any interior.

Stacking Tray

2008

Storage and Accessories

When married with the warmth and intrinsic luxury of carved wood, a simple functional item like a tray can be elevated to an alluring must-have. The BassamFellows Stacking Tray makes for a durable, tactile and versatile addition to any interior environment. Exuding contemporary chic as well as the essence of hand-finishing, the tray is carved from solid wood, with gently curved edges for a warm, personal touch. Individually, it functions as an impressive serving or display piece. When displayed in multiples, the trays may be stacked together to form graceful side tables or sculptural columns of any height, or combined with the Museum Bench. A singular item of immense variety.

Wall Drawers

2008

Storage and Accessories

Drawing inspiration from minimalist artist Donald Judd, who repeatedly explored the pure geometry of multiplying boxes in his work, the design of the Wall Drawer attempts to transform a simple wooden box into something sublime. Like the artist's work, each wall drawer emanates a rigorous, sculptural power. Drawer fronts are constructed entirely of solid wood planks while the drawer box is fully finished on all sides in wood veneer, lending a sense of pure symmetry. Minimal details such as a carved, integral drawer pull and soft-close interior hardware add luxury while maximizing functionality. The Wall Drawer Collection is incredibly flexible. They can be added to a bedroom or living room to deconstruct the traditional bureau. They also double as lightweight floating bedside tables. In the dining room, media room, or conference room, the drawers can be hung horizontally to create long lengths of storage – a lighter alternative to a traditional credenza.
