

Certificate of Compliance for Food Contact Application

We hereby confirm that our products are manufactured using Good Manufacturing Practices (GMP). Sprinpak Manufacturing LLP is also certified under Quality Management System ISO 9001:2015.

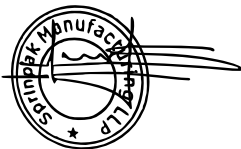

Our products are manufactured or sourced from virgin polymers and is suitable for food grade applications and is for use in the packaging of food items.

The films used in the material is safe and intended to come in contact with foodstuffs; all solvents, adhesives and inks do not come in direct contact of food and is within permissible migration limits.

Any non-permissible items have not been used in the manufacturing of the materials. Information is based on the items disclosed to us by our suppliers.

We supply the material with the understanding that it will be used by the packer in such a way that the packaging material itself is not consumed by the consumer. It is understood that the packer will use good packaging design and manufacturing practices to ensure that the packaging material does not fuse with the foodstuffs.
