## BENNETT SAFETYWEAR LTD

7-11 MERSEY ROAD, CROSBY, LIVERPOOL, UK

TD NO : 1071

Each packet shall be labelled / contain the appropriate marking with regards to the amount, type, size, manufacturer, performance levels and UKCA & CE, mark. Labels on the gloves will contain similar information. This information will be provided in the minimum resale quantity.

### INTERMEDIATE SAFETY CATEGORY

Gloves and sleeves are designed to protect hands in the working environment in accordance with EN388:2016, EN ISO 21420:2020. When selecting a glove based on risk analysis it should be understood that the protection is limited to the risk level and standards mentioned above.

The UKCA type examination was carried out by ITS TESTING SERVICES, CENTRE COURT, MERIDAN BUSINESS PARK, LEICESTER, U.K approved body number is 0362; who performed the type-examination. The EU type examination was carried out by Mirta KONTROL d.o.o. Gradiška 3, 10040 Zagreb, Dubrava, Hrvatska (Croatia) Their notified body number is 2474. None of the materials or processes used in the manufacture of these products is known to be harmful to the wearer.

### WARNINGS:

Test results apply to the gloves and sleeves in the as received condition but do not extend to any leather cuff. Result may differ if cleaned. Do not use near moving machinery due to entanglement hazard. Overall classification may not reflect the performance of the outermost layer. These Gloves and sleeves may not be suitable for protection against sharply pointed objects such as hypodermic needles.

### CARE / MAINTENANCE

Cleaning and disinfection is not intended for these gloves and sleeves. Both new and used gloves and sleeves should be thoroughly inspected before and after use, especially after cleaning treatment, and before being worn to ensure no damage is present. Damaged gloves and sleeves should not be worn and should be disposed of. Wet or contaminated Gloves and sleeves should not be used. Dirty gloves and sleeves may not provide the same level of protection as that shown. Gloves and sleeves should not be left in a contaminated condition if re-use is intended, in which case Gloves and sleeves should be cleaned as far as possible, provided no serious hazards exist, before removal from the hands. Excess contaminant should first be removed, e.g. loose dirt can be brushed off with a soft brush. The gloves and sleeves may be de-contaminated with mild detergent solution, then rinsed with clean water and allowed to dry naturally, ideally with some air movement. When the contaminant is not removable or presents a potential hazard it is advisable to ease left and right hand gloves and sleeves off alternatively using the gloved hand so that the gloves and sleeves are removed without the contaminant contacting the bare hands. Washing is not recommended. Do not wring. Do not tumble dry. Do not use bleach. Reshape whilst still damp.

Warning:    

### PACKING AND STORAGE

Can be used under normal climatic conditions. Gloves and sleeves shall be wrapped in polymeric packaging.

Gloves and sleeves can be used up to five years after date of supply if stored correctly. The Gloves and sleeves are packed in bundles, along with this leaflet. This bundle is suitable for transportation and storage.

### OBSOLESCENCE

Stored correctly, the Gloves and sleeves' physical properties will not change for up to five years.

### GENERAL

The quality systems used to manufacture and supply the Gloves and sleeves are in compliance with ISO 9001:2015.

### PLEASE NOTE

The information contained here is intended to assist the wearer in the selection of personal protective equipment. The result of the laboratory tests should help with correct glove selection; however, it should be understood that the actual conditions of use cannot be directly simulated. It is therefore the responsibility of the end user and not the manufacturer to determine the glove suitable for the intended use.
