**ERRECOM**<sup>®</sup>  
AIR CONDITIONING & REFRIGERATION CHEMICAL SOLUTIONS

# **Environmental Sustainability.**

## **Not a destination.**

## **A journey to experience.**

Awarded for the second time as one of the 100 most sustainable Italian companies by Forbes, Errecom renews with the same enthusiasm its commitment to sustainability.

Increase in eco-friendly products in support of a circular economy.  
Replacing plastic packaging with recycled cardboard.  
Use of recycled plastic when the formulation allows it.  
Dematerialisation of technical and information material.

THE EXCLUSIVE  
1000 MIGLIA LINE

### Excellence and Tradition

Errecom is now 1000 Miglia official partner. The same values. The same passion. A full range of excellent products that guarantees maximum efficiency to all air conditioning and refrigeration systems.

[errecom.com](http://errecom.com)

**ERRECOM**<sup>®</sup>  
AIR CONDITIONING & REFRIGERATION CHEMICAL SOLUTIONS

The most beautiful and renowned race in the world, a **symbol of the success of "Made in Italy"** for almost 100 years.

Errecom has signed an **exclusive worldwide partnership** with 1000 Miglia which enhances its offer of chemicals and additives for AC/R maintenance used daily all over the world. The 1000 Miglia brand on the products **gives exclusivity and uniqueness to the service offered by the HVAC/R technician or shop.**

Exclusive Worldwide Partnership

A full range of excellent products that guarantees maximum efficiency to all air conditioning and refrigeration systems.

The same emotions.  
The same passion.

We are proud to announce that Errecom has been selected, thanks to its expertise and know-how, **as the official partner of 1000 Miglia to produce the exclusive AC/R maintenance and cleaning line.**

# ENERGY DEMAND FROM AIR CONDITIONERS WILL TRIPLE BY 2050\*

❑ **Natural gas** in Europe **costs** about **10 times more** than a year ago.

❑ Wholesale **electricity prices** are around **260% higher** than a year ago.\*\*

How to cope with soaring **energy prices**?

Heat pump  
and AC/R  
maintenance  
is the answer.

Not just an intervention to solve AC/R system breakdowns: maintenance can also be performed to **prevent problems and maintain the efficiency of the system over time**, reducing its energy consumption and environmental impact.

ERRECOM  
ROAD TO EFFICIENCY

EFFICIENCY?

IT'S A MATTER OF

CHEMISTRY

# What affects heat pump efficiency?

**To name a few causes: refrigerant leaks, oil fouling, moisture, and dirty coils.**

Air conditioning and refrigeration systems are not only a bunch of mechanical components but are composed of chemical elements too. For the system to work efficiently, it is essential to take care of the refrigerant gas and the refrigeration lubricant over time, avoiding their chemical decay.

Over 20 years of  
experience and  
research in AC/R  
maintenance

## Indoor Air Quality

**People spend 90% of their time indoors** (2013 WHO Europe Report, US Environmental Protection Agency). Negligence in cleaning A/C systems not only reduces their efficiency but also negatively affects air quality by spreading viruses, bacteria, mould, and allergens. This can be a serious health hazard.

AC/R efficiency:

# focus on maintenance, checkups, and leaks.

Errecom's offer includes:

What is it?

Acid neutraliser additive

How does it work?

It reduces and prevents the formation of acid residues resulting from the natural decomposition of refrigerant gas and refrigeration lubricant

What does it solve/prevent?

It prevents the acid residues from attacking the metal components of the system, causing refrigerant gas leaks and the AC/R compressor breakdown

What is it?

Anti-moisture additive

How does it work?

It surrounds the water molecules circulating in the AC/R system and, by removing them from the refrigeration lubricant, prevents the formation of acidity resulting from the interaction of excess water and lubricant. Working with the filter drier, the additive also slows down its saturation, thus extending its service life

What does it solve/prevent?

It prevents the corrosion caused by moisture

What is it?

Performance enhancer for AC/R systems

---

How does it work?

It removes oil fouling from refrigeration lines

---

What does it solve/prevent?

Eliminating oil fouling from the internal walls of the refrigeration lines, the additive restores the original diameter of the pipes, the optimal heat exchange between the refrigerant gas and the refrigeration lines and the efficiency of the system

What is it?

Leak stop additive

---

How does it work?

It detects micro-leaks (up to 0.3 mm) on the metal, plastic and rubber components of the AC/R system by repairing them with mechanical action without reacting to moisture or oxygen (polymer-free formula)

---

What does it solve/prevent?

It repairs and prevents micro-leaks, preventing refrigerant from being spread into the atmosphere

What is it?

Antioxidant and anticorrosive additive

---

How does it work?

It leaves a thin film on the metal components (copper, aluminium, etc.) of the AC/R system protecting them from oxidation and corrosion without interfering with the heat exchange capacity

---

What does it solve/prevent?

It stops and prevents the oxidation and corrosion occurring within the AC/R system, extending the life of metal components

# A broken AC/R compressor or a retrofitting procedure

requires checking on the air conditioning or refrigeration system. In this case of extraordinary maintenance, it is necessary to flush the AC/R system with a specific fluid that will remove:

carbonic and  
hydrofluoric acid

moisture

metal ions  
and oxides

However, these components can remain, in small percentages, free to circulate within the AC/R system causing the compressor to break down.

In addition, even after flushing with nitrogen,

residual flushing fluid

may remain, reducing the oil's viscosity and lubricating capacity.

The solution is

# COMPRESSOR +

Add **Compressor+** to the compressor oil

Eliminates acidity

Inactivates metal ions and oxides

Eliminates moisture

Restores the oil's lubricating capacity

If not used,  
the life of the AC/R compressor may be

# drastically shortened

# Flushing Test

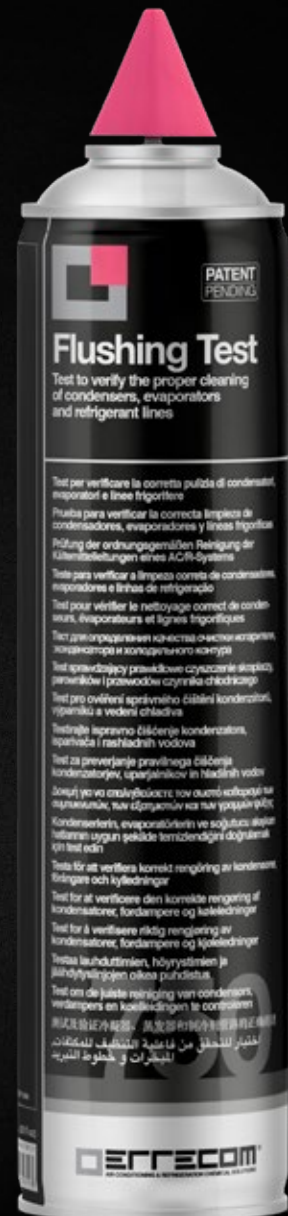

When should you flush an AC/R system?

How can you be sure that the system has been flushed correctly?

What is the right amount of flushing fluid to use?

Leaving **contaminants**, such as condensate, acidity, rust, metal filings, dust, and sand free to flow in the **refrigerant lines** can severely damage the components of AC/R systems.

Therefore, it is necessary to **remove** them through professional cleaning and flushing procedures. However, until now, this critical operation has been left to the experience and common sense of HVAC/R technicians, without the possibility of testing its success and result. Thanks to our know-how, this is now possible.

**PATENT PENDING**

Test to verify the **proper cleaning** of condensers, evaporators, and refrigerant lines

If the colour **CHANGES**,  
**FLUSH** the system

If the colour  
**DOESN'T CHANGE**,  
**START** the system

Clear and instant result.

Certifies

**proper flushing**

# Steady

Adjustable Floor Support for AC/R Units

This new A/C support system  
**ensures quick and safe installation**  
of all outdoor units on any surface,  
**including sloping roofs up to 35°**,  
without additional support.

Height  
adjustment:  
16,5 – 25,5 cm

Can be tilted  
up to 35°

360-degree  
rotation

1500 Kg

Universal,  
solid,  
eco-friendly.

**PATENT PENDING**

# DISPLAY STAND

CUSTOM-MADE MODULAR METAL DISPLAY STAND

according to customer requirements.

Errecom's graphic layout has always been extremely recognisable and distinctive and now it will be even more: the contrast between the black display stand and the coloured labels increases product visibility and brand recognition.

## Extreme Ultra Leak Stop

- Permanently repairs leaks up to 0.3 mm on rubber and metal components of AC/R systems.
- Polymer-free: does not react with moisture and oxygen. Does not clog AC/R systems' components.
- Safe for metal and rubber components of AC/R systems.
- Visible when exposed to any UV lamp.
- Non-flammable, non-irritating, safe for the operator.
- Significantly reduces compressor noise.
- Compatible with all refrigeration lubricants.
- Compatible with all refrigerant gases, including CFC, HFC, HCFC, R32 and HFO, except R717 (ammonia).
- The professional choice for preventive maintenance.

Art.-Nr.	Adapters included	€		
TR1163.AL.01.S2	No adapters	-	30	5400
TR1163.AL.H3.S2	1/4 SAE + 5/16 SAE	-	30	5400

### Dosage:

1 cartridge (6 mL - 0.2 fl oz) for systems up to 21 kW or 700 mL (23.6 fl oz) of compressor oil.

# 6 mL

\*\* 80x120xH200 cm

## FixQuick Ultra-fast Leak Stop

- Ultra-fast: takes just 20 seconds to repair refrigerant gas leaks up to 1 mm.
- Pressure resistance:
  - 20 seconds to fix up to 20 bar (290 psi)
  - 20 minutes to fix up to 50 bar (725 psi)
- Resists up to 250°C (482°F).
- Easy to use: STEP 1 - liquid with brush; STEP 2 - powder.
- Can be used on metal and plastic components.
- Can be applied on flat, curved, horizontal or vertical surfaces.
- Ideal for urgent repairs.
- Ideal for repairs where welding cannot be carried out.
- Permanent result.
- Visible with any UV lamp: it allows you to pinpoint and check the condition of previous repairs.

Art.-Nr.	€		
TR1180.01	-	30	-

## External

### Two-component Putty Leak Stop

- Repairs refrigerant gas leaks up to 5 mm.
- Ideal for urgent repairs.
- Perfectly adheres to metal (copper, aluminium, and steel) and rubber components.
- Can be used on thermoplastic pipes.
- Resists refrigeration lubricant (mineral, POE, PAG, PAO and Alkylbenzene).
- Resists refrigerant gases (CFC, HFC, HCFC, CO<sub>2</sub>, including R32 and R1234yf).
- Resists additives and flushing fluids, including chlorinated ones.
- Temperature range use: -100°C to +270°C (-148 °F to 518 °F).
- Can be used on either the high or low side of HVAC/R systems.
- Different pressure resistance depending on the size of the leak:  
5 mm = 40 bar (580 psi) - 2 mm = 50 bar (725 psi) - 1 mm = 57 bar (826 psi).
- Easy to use: it can be easily mixed by using two fingers and, once applied, it permanently repairs the leak in 4-5 hours.
- There is no risk of product dispersion in AC/R systems.
- Once dried, it can be easily sanded or removed.

Art.-Nr.	Description	€		
TR1166.01	External	-	60	10800

## Best Bubbles

### Refrigerant Gas Leak Detector

- Detects micro-leaks on A/C components and refrigerant lines thanks to its high adhesion power to surfaces.
- Quick, ready and easy to use: leaks result in the formation of large, thick bubbles.
- Operating temperature: from -40°C to +80°C (from -40°F to +176°F).
- Also available with directional dispensing trigger (A).
- The aerosol cans can be used even upside down thanks to the special 360° valve.

## Best Bubbles Fluo

### Fluorescent Refrigerant Gas Leak Detector

- Detects micro-leaks on AC/R components and refrigerant lines thanks to its high adhesion power to surfaces.
- Quick, ready, and easy to use.
- Operating temperature: from -40°C to + 80°C (from -40°F to + 176°F).
- Ideal in poor visibility situations. Leaks result in large, thick, and fluorescent bubbles, visible when exposed to any UV lamp.
- Also available with directional dispensing trigger (A).
- The aerosol cans can be used even upside down thanks to the special 360° valve.

## Cool-Shot Ultra

Performance Enhancer for AC/R Systems

- Restores and maintains the original efficiency of AC/R systems.
- Removes oil fouling.
- Restores heat exchange in refrigeration lines.
- Increases the efficiency of the compressor lubricant without causing chemical changes.
- Extends compressor life and reduces its noise.
- Reduces the maintenance costs of AC/R systems.
- Reduces the energy consumption of the system and CO<sub>2</sub> emissions.
- Does not alter the refrigerant gas.
- Safe for all air conditioning and refrigeration systems.
- Visible when exposed to any UV lamp.
- Compatible with all refrigeration lubricants.
- Compatible with all refrigerant gases, including CFC, HFC, HCFC, R32 and HFO, except R717 (ammonia).
- The professional choice for preventive maintenance.

Art.-Nr.	Adapters included	€		
TR1170.AL.01.S2	No adapters	-	30	5400
TR1170.AL.H3.S2	1/4 SAE + 5/16 SAE	-	30	5400

### Dosage:

1 cartridge (6 mL - 0.2 fl oz) for systems up to 21 kW or 700 mL (23.6 fl oz) of compressor oil.

6 mL

## Super-Dry Ultra

Anti-moisture Additive

- Permanently eliminates the formation of moisture inside AC/R systems thanks to the special chemical formula that stabilises the refrigeration lubricant.
- Does not alter refrigerant gases.
- Safe for gaskets and system components, and the compressor.
- Does not weaken the power of the system, nor does it alter its performance.
- Compatible with all refrigeration lubricants.
- Compatible with all refrigerant gases, including CFC, HFC, HCFC, R32 and HFO, except R717 (ammonia).
- The professional choice for preventive maintenance: eliminating moisture, it inhibits acid formation over time.

Art.-Nr.	Adapters included	€		
TR1174.AL.01.S2	No adapters	-	30	5400
TR1174.AL.H3.S2	1/4 SAE + 5/16 SAE	-	30	5400

### Dosage:

1 cartridge (6 mL - 0.2 fl oz) for systems up to 21 kW or 700 mL (23.6 fl oz) of compressor oil.

6 mL

## No-Acid Ultra

### Acid Neutraliser Additive

- Eliminates acid residues (caused over time by refrigeration lubricants, refrigerants moisture, and compressor breakdown) from AC/R systems.
- Prevents compressor breakdown.
- Safe for system components.
- Compatible with all refrigeration lubricants.
- Compatible with all refrigerant gases, including CFC, HFC, HCFC, R32 and HFO, except R717 (ammonia).
- The professional choice for preventive maintenance: it prevents acid from developing over time.

Art.-Nr.	Adapters included	€		
TR1175.AL.01.S2	No adapters	-	30	5400
TR1175.AL.H3.S2	1/4 SAE + 5/16 SAE	-	30	5400

#### Dosage:

1 cartridge (6 mL - 0.2 fl oz) for systems up to 21 kW or 700 mL (23.6 fl oz) compressor oil.

 6 mL

## Compressor+

### Restoring Additive for Refrigeration Lubricants

- Restores the optimal working conditions of air conditioning and refrigeration systems after replacing the compressor or flushing the circuit.
- Eliminates and neutralises particles and agents that are potentially hazardous to the newly flushed system components. These include moisture, heavy flushing fluid residues, and contaminants such as hydrofluoric, hydrochloric and carbonic acids that develop as a result of A/C compressor breakage.
- Eliminates the risk of circuit damage after the compressor replacement or circuit flushing.
- Safe for AC/R system components.
- Compatible with all refrigeration lubricants.
- Compatible with all refrigerant gases, including CFC, HFC, HCFC, R32 and HFO, except R717 (ammonia).

Art.-Nr.	Description	€

## Refrigeration Lubricants

**OEM  
APPROVED**

## POE Lubricants

ERRECOM's synthetic polyolester (POE) refrigeration lubricants are characterised by high thermal, chemical and hydrolytic stability. Due to their good miscibility, POE lubricants are compatible with all chlorine-free refrigerants, FC refrigerants, and with HFC refrigerants such as R134a, R404a, R507, R410a, R407c. ERRECOM's POE lubricants can also be used with hydrocarbon refrigerants such as propane (R290) and propylene (R1270).

Furthermore, their use has already been successfully tested with low-GWP refrigerants such as HFOs (e.g. R1234yf, R1234ze). Lastly, ERRECOM's POEs have also been tested with new refrigerants designed to replace R22, such as R422a/D and R417a. Our POE lubricants are recommended for use in hermetic, semi-hermetic and open compressors as well as screw compressors and turbochargers (depending on viscosity).

Due to their high viscosity indices, ERRECOM POEs have excellent cold flow properties and a highly stable lubricating film under high-temperature conditions in hydrocarbon applications. ERRECOM's POE lubricants are characterised by high stability and excellent lubrication. POEs are hygroscopic, which means that they tend to absorb water more quickly than non-polar hydrocarbon-based refrigeration oils such as mineral ones, alkyl benzene and PAO. Precisely for this reason, all ERRECOM POEs are ultra-dry and filled in plastic bottles and metal tanks specially designed to ensure protection against moisture.

## CO<sub>2</sub> - POE

Carbon dioxide (R744) has been used as a refrigerant since the last century with the introduction of industrial refrigeration systems. R744 has excellent thermodynamic properties and is an environmentally friendly refrigerant (with the lowest GWP and ODP). Its use has grown as it is not only a natural refrigerant but also extremely effective, both in specially designed industrial systems such as supermarket refrigerators and heat pump water heaters. Errecom's CO<sub>2</sub> - POE lubricants are high-performance polyol ester-based synthetic lubricants specially developed for CO<sub>2</sub> applications. CO<sub>2</sub> - POEs are available in 5 different viscosity grades to meet the requirements of a full range of R744 systems. They are characterised by good miscibility, fluidity, and stability. Thanks to their branched molecular structure and the high-performance additive package included in the formulation, they also provide good lubrication with better overall performance than classic POEs over a wide temperature range.

More precisely, Errecom's CO<sub>2</sub> - POE lubricants contain excellent additive packages (anti-oxidants, anti-corrosives, anti-foaming) carefully selected to: - optimise miscibility with CO<sub>2</sub>, thus increasing heat exchange even in the low-temperature zone;

Physical Quantity Measured (Unit of Measurement)	Analytical Reference Method	CO <sub>2</sub> - POE 55	CO <sub>2</sub> - POE 85
ISO VG	-	55	85
Kinematic Viscosity @ 40°C (cSt)	ASTM-D445	55	84
Kinematic Viscosity @ 100°C (cSt)	ASTM-D445	8,8	11,5
Viscosity Index	ASTM-D2270	142	119
Pour Point (°C)	ASTM-D97	-49	-39
Flash Point (°C)	ASTM-D93	280	272
Density @ 15°C (g/cm <sup>3</sup> )	ASTM-D1298	0,982	0,991
Moisture Level (ppm)	ASTM-D6304	40	40
Total Acid (mg KOH/g)	ASTM-D974	<0,03	<0,03

- reduce the formation of foam, usually present at compressor start-up;
- increase its lubricating capacity;
- protect against materials, even under extreme operating conditions.

They are also characterised by low toxicity and high biodegradability.

CO<sub>2</sub> - POEs can be used for both subcritical (e.g. low-temperature cooling stages in supermarket cascade refrigeration systems) and transcritical (e.g. medium-temperature cooling stages in supermarkets) applications.

Colour (APHA)	ASTM-D1500	0,5	< 1,0	-	1,0	< 1,0

ERRECOM's mineral oils are highly refined hydrotreated naphthenic bases enhanced by additives that ensure:

- high ageing stability, - low pour point, - excellent low-temperature behaviour, - good compatibility with ammonia (NH<sub>3</sub>), HCFCs (e.g. R22), hydrocarbons (e.g. propane R290, propylene R1270). The high solvent power and excellent low-temperature properties lead to good floc points for the refrigerant-oil mixture. As it is wax-free, ERRECOM's mineral oil has a low pour point and good cold pour properties. At high temperatures, ERRECOM's mineral oil has a higher flash point than other products on the market and high thermal and chemical stability. It does not corrode iron, copper, and aluminium.

## Acid-Test

Test to Verify the Presence of Acid in Compressor Oil

- Universal: works with all refrigeration lubricants (POE - ABZ - PAO - PAG - PVE - Mineral).
- Easy to use: just add a few drops of lubricant, shake the bottle and wait a few moments to see the result.
- Quick result in a few seconds.
- Ideal to perform regular preventive maintenance of the compressor.
- Non-flammable and non-toxic.
- Contains 4 test kits.
- Clear and accurate results. The colour indicates the pH range:

Art.-Nr.	€		
RK1349.S1	-	12	2160

### Flushing Test

Test to Verify the Proper Cleaning of Condensers, Evaporators, and Refrigerant Lines

- Certifies the proper cleaning of condensers, evaporators, and refrigerant lines.
- Detects contaminants such as moisture, acid, rust, metal sludge, dust, and sand in AC/R system components.
- Clear and instant result: if the colour changes, the system is not clean; if the colour does not change, you can switch on the system.

NEWS 2023

Art.-Nr.	Description	€	👤	📦
TR1233.YW.M0	750 mL Can with Rubber Cone	-	12	1008

**PATENT  
PENDING**

If the colour changes, flush the system.

If the colour doesn't change, start the system.

## Belnet

### Quick Evaporating Flushing Fluid

- Evaporates quickly and completely and does not leave residues.
- Removes old oil, debris, and contaminants.
- Safe for all air conditioning and refrigeration systems.
- Requires manual or pneumatic systems for insertion.
- Flammable.

Art.-Nr.	Description	€		
TR1009.01	1 L Metal Bottle	-	12	480
TR1055.01	5 L Metal Tank	-	02	196

### Belnet Aerosol

- Ideal for cleaning small refrigeration lines.
- Ready to use.
- High flushing pressure (8 bar/116 psi).
- Constant pressure until the cylinder is completely empty.
- Does not require additional equipment for insertion.

Art.-Nr.	Description	€		
TR1009.U.M0	600 mL Can with Rubber Cone	-	12	1008

## Flushing Hook

### Flushing Gun Hook

Tool to connect the flushing equipment to the A/C system. Its small size facilitates the connection to A/C systems even in narrow spaces.

Technical features:

- male connection 1/4" SAE
- size: 80 x 50 mm

Art.-Nr.	Description	€		
RP1081.01	Flushing Hook 1/4 SAE	-	-	-

NEWS 2023

## Flushing Gun

Affordable equipment for flushing AC/R systems. Volume: 0,75 L. Ball valve with 1/4" female fitting. Hose length: 60 cm. 0÷12 bar gauge. 10 bar safety valve.

## Jet Gun

### Portable A/C Coil Cleaning Machine

- Designed and tested for use with water, acid and alkaline cleaners.
- Increases the cleaning power of Errecom's cleaners without damaging evaporator and condenser coils.
- Safe for all components of air conditioning and refrigeration systems.
- Working pressure: 6 bar (85 psi).
- 3 interchangeable and resealable 9 Litre (2.4 gal) bags.
- Adjustable spray tip.
- Hose length: 300 cm (118 in).
- Rechargeable battery 12V - 2,200 mAh.
- Operating time: up to 30 minutes.
- Includes battery charger 110-220 V.

## No-Age

### Protective-Anticorrosive Treatment for Outdoors Units

- Creates a protective film that defends surfaces from contaminants such as salt and smog, preventing metal corrosion.
- Maintains unaltered heat exchange.
- Ideal to use on condensers installed in highly oxidising environments (seaside locations, heavily polluted areas) and subject to salt, acid rain, and smog attack.

Art.-Nr.	Description	€

## Power Clean-OUT

### High-pressure Condenser Cleaner

- Effective foaming action. Effective foaming action. High-pressure cleaner.
- Safe for condenser coils.
- Easily removes even the most stubborn dirt. Effective foaming action.

Art.-Nr.	€		
AB1063.YW.01	-	12	672

750 mL

## Power Clean - IN

### High-pressure Evaporator Cleaner

- Its special aerosol can is designed to achieve a constant and high-pressure delivery.
- Easily removes even the most stubborn dirt that accumulates on evaporator coils such as dust, grease, etc.
- Dries quickly.
- Does not require rinsing.
- HACCP compliant.

Art.-Nr.	€		
AB1063.U.01	-	12	1008

600 mL

## Evaporator Cleaner

### Cleaner for Evaporators

- Purifies A/C ducts, incorporating and removing contaminants such as dust, dirt, allergens, and microorganisms that often cause bad odours.
- Restores the indoor air quality releasing a pleasant scent.
- Easy to use thanks to the cannula.
- Quick and effective action. Ready to use. Does not require rinsing.
- Also available in the foaming version EVAPORATOR CLEANER FOAM, whose formula incorporates and removes even the hardest to reach dirt.
- HACCP compliant.

Art.-Nr.	Evaporator Cleaner	€		
AB1084.J.01	200 mL	-	24	2376
AB1084.N.01	400 mL	-	12	1344

## **Chinook** A/C Filter Cleaner

- Easily removes dust, germs, mould, contaminants, and harmful agents.
- Eliminates the causes of bad odours, leaving a pleasant and long-lasting scent.
- Quick and effective application.
- Ready to use.
- HACCP compliant.

Art.-Nr.	Description	€		
AB1077.K.S1	1 L Spray Bottle	-	06	570

1 L

## **Drizzle** Condensate Drain Cleaner

- Removes and prevents the development of algae, mucilage, silt, and mould.
- Prevents air conditioner's condensate drain from clogging.
- Ready to use.
- Non-corrosive.
- liquid formulation, lavender scented.

Art.-Nr.	Description	€		
AB1078.K.S1	1 L Bottle	-	06	570

1 L

## **Drain Tabs** Cleaning Tabs for Condensate Drain

- 1/2 tabs every 15/20 days for units up to 12,000 Btu/H (3 kW).
- Prevents the formation of algae, mould, slime and mucilages.
- Prevents A/C condensate drain from getting clogged.

Art.-Nr.	Description	€		
AB1097.01.JA	18 tabs	-	12	-

## SealUp

### Removable AC/R Joint Sealant

- Creates a flexible but strong seal on the threaded or flanged AC/R fittings, adhering to internal surfaces and filling all micro-cracks.
- Prevents vibration from loosening nuts, joints, bolts, etc.
- Easy to remove.
- Can be applied on all plastics and metals.
- Temperature range use: -90°C to +200°C (-130°F to +392°F).
- Pressure range use: full vacuum and up to 500 bar/7250 psi.
- Resists refrigerant gases, combustible gases, refrigeration lubricants, fuels, solvents, industrial gases.
- Threaded spout for better sealing.

Art.-Nr.	Description	€		
TR1157.Y.01	50 mL Tube	-	30	5400

## Apollo

### Cleaner for Solar Panels

- Removes even the heaviest and most stubborn dirt such as dust, debris, scale, etc. from solar panels.
- Once rinsed off, it leaves a protective film on the solar panel that slows down the growth of new deposits and protects it from corrosion.
- Restores and maintains the efficiency of solar panels over time.
- Alkaline-based formula.
- Does not damage surfaces; also safe for plastics.
- Safe for solar panels: it does not affect their performances and does not get absorbed.

Art.-Nr.	Description	€		
AB1086.K.S1	1 L Spray Bottle - RTU	-	06	570
AB1086.P.01	5 L Tank	-	02	144

**1:2**

## Sunlit

### Solar and Photovoltaic Panel Descaler

- Removes from solar panels heavy-duty encrustations such as salt, rust, limestone, concrete and chalk residues and any further inorganic dirt.
- Long-lasting protection.
- Avoid reduction in systems' performance.
- Ready to use.
- Safe: does not leave stains, resists high temperature and UV rays.
- Application temperature = +5 ÷ +25 °C.
- Enhances the cleaning action of Apollo -Errecom's alkaline cleaner for solar panels.
- Always use Apollo after using Sunlit to neutralise any acidic residues.

## Weld+

### Cleaner and Booster for Welding

- Optimises and reduces welding and soldering time.
- Ensures excellent welding tight.
- Ensures thorough cleaning of the surfaces to be welded.
- Leaves a dry, stain-free surface.
- Easy to use.
- Safe for the operator.
- Suitable for use on iron, steel, copper, brass, aluminium.
- Also ideal for welding of copper and copper alloys, copper and steel alloys, copper and brass alloys, copper and bronze alloys, copper and stainless steel alloys, brass and stainless steel alloys.

#### STEP 1 – Deoxidizing Cleaner

- Removes oxides caused by the atmosphere (rust) and by welding or heat treatments, calamine from metal and steel, oxide layers and encrustations of any kind from alloys such as copper and brass.
- Pickling action.
- Protects surfaces from oxidation for approx. 90 min.

#### STEP 2 – Protective Neutraliser

- Removes any residues resulting from the application of step 1 and the welding work carried out.
- Prevents the growth of oxides after welding.
- Protects the metal from corrosion by creating a protective film.

Art.-Nr.	€		
TR1194.01	-	12	-

## Stop Heat Heat Blocking Putty for Welding

- Absorbs and stops the heat during welding or soldering, preventing the areas around the point from burning or deforming.
- Avoids expensive heat damages by protecting components or materials during welding/soldering.
- Compatible and safe also for painted or varnished surfaces.
- Putty formulation: it perfectly adheres without dripping, slipping, or leaving residue.
- Re-usable up to 40 times.
- Easy to use.
- Safe and non-toxic formulation.

Art.-Nr.	Description	€		
TR1173.01	500 gr Jar	-	12	-

## Protect Gel Heat Blocking Gel for Welding

- Protects surrounding surfaces from heat and flame during welding or soldering operations.
- Avoids expensive heat damages by protecting components or materials during welding/soldering.
- Compatible and safe also for painted or varnished surfaces.
- Gel formulation: it perfectly adheres without dripping, staining, or leaving residue.
- Easy to use.
- Safe and non-toxic formulation.

# Errecom Academy the know-how of our experts for you

Masterclasses, webinars, and on-site training courses designed to provide AC/R technicians with the specialist training they need to carry out the best system maintenance.

By joining Errecom Academy, you will meet our experts and members of the R&D department, who will share their know-how gained from years of study and research in the field and collaborations with the best OEMs in the industry.
