

**CLEANERS IN TABS**

# Evo Tabs

Purifying cleaner for Evaporators in Tablet  
Alkaline - Dilution in 5l

**Evo Tabs** is an evaporator cleaner solution in tabs, projected in order to have to chance not to carry tanks of liquid.

One tablet of twenty grams only (useful to produce cleaner 5l) concentrates a significant degreasing and cleansing power and, at the same time, it releases a pleasant scent.

**Evo Tabs** can be dissolved in any water line, regardless of its hardness: this formulation eliminates the excesses of limestone and does not leave halos.

A single solution of **Evo Tabs** (dissolved in 5 liters of water) is shortly ready-to-use for the usage. It does not damage the components of the evaporators and the plastic surfaces.
