

SAFETY DATA SHEET

Section 1. Identification

Product name Blue Bomber
All-Purpose Degreaser
Product code BLUEBOMBER

Relevant identified uses of the substance or mixture and uses advised against

Product Use Metalworking - Cleaner
For specific application advice see the appropriate Product Data Sheet or contact your company representative

Supplier Dawson Cleaning Supplies
7523 Reading Road
Cincinnati, Ohio
45237
Product information: 513-964-0776 or 850-346-3068

Manufacturer Coolant Control, Inc.
5353 Spring Grove Avenue
Cincinnati, Ohio
45217

Emergency Spill Information: Contact CHEMTREC at 1 (800) 424-9300 USA

Section 2. Hazards Identification

OSHA/HCS status

Classification of the substance or mixture Physical Hazards Does not meet the criteria for classification.

Health Hazards Skin Corrosion/Irritation, Category 2. · Serious Eye Damage, Category 1. · Environmental

Hazards Does not meet the criteria for classification.

GHS label elements

Hazard pictograms

Signal Word Danger

Hazard Statements	Causes skin irritation. · Causes serious eye damage. ·
-------------------	--

SAFETY DATA SHEET

Precautionary Statements

Prevention:

Wash hands thoroughly after handling. ·Wear protective gloves/protective clothing/eye protection/face protection. ·

Response:

IF ON SKIN: Wash with plenty of soap and water. ·IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Product Name: Blue Bomber
All-Purpose Degreaser
Product Code: BLUEBOMBER

Date of issue: 12/04/2020

Page: 1 of 9

·Immediately call a POISON CENTER or doctor/physician. ·Specific treatment (see First Aid on this label). ·If skin irritation occurs: Get medical advice/attention. ·Take off all contaminated clothing and wash it before reuse. ·

Storage:

Disposal:

Hazards not otherwise classified

See "Notes to Physician" under First-Aid Measures, Section 4 of this Safety Data Sheet.

Section 3. Composition / Information on Ingredients

Substance/mixture	This material is defined as a mixture		
<u>Ingredient name</u>	<u>CAS Number</u>	<u>%/Weight</u>	
Poly(oxy-1,2-ethanediyl), a-undecyl-w-hydroxy-	68439-46-3	1 to 5%	

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and therefore would require reporting in this section. Occupational exposure limits, if available, are listed in Section 8

Section 4. First Aid Measures

Product Name: Blue Bomber
All-Purpose Degreaser
Product Code: BLUEBOMBER

Date of issue: 12/04/2020

Page: 2 of 15

SAFETY DATA SHEET

Description of necessary first aid measures

Eye contact	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Check for and remove any contact lenses. Chemical burns must be treated promptly by a physician.
Skin contact	Immediately wash exposed skin with soap and water. Remove contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention if symptoms occur. Chemical burns must be treated promptly by a physician
Inhalation	If inhaled, remove to fresh air. Get medical attention if symptoms occur.
Ingestion	Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. If potentially dangerous quantities of this material have been swallowed, call a physician immediately. Get medical attention if symptoms occur. Chemical burns must be treated promptly by a physician.
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

Most important symptoms/effects, acute and delayed

See Section 11 for more detailed information on health effects and symptoms

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician	Treatment in general should be symptomatic and directed to relieving any effects. In case of inhalation of decomposition products in fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Specific treatments	No specific treatment.

Section 5. Fire-Fighting Measures

Exstinguishing media

Suitable extinguishing media	Use water fog, foam, dry chemical or carbon dioxide (CO ₂) to extinguish flames.
Unsuitable extinguishing media	Do not use water jet
Specific hazards arising from the chemical	In a fire or if heated, a pressure increase will occur and the container may burst. Fire water contaminated with this material must be contained and prevented from being discharged in to any waterway, sewer or drain.
Hazardous combustion products	carbon oxides(carbon monoxide, carbon dioxide)
Special protective actions for fire-fighters	Evacuate the area. Prevent run off from fire control or dilution from entering streams, sewers, or drinking water supply. Firefighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

Section 6. Accidental Release Measures

SAFETY DATA SHEET

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Immediately contact emergency personnel. No action should be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Eliminate all ignition sources. Avoid breathing vapor or mist. Ensure good ventilation. Put on appropriate personal protective equipment (See Section 8).

Depending on the extent of the release, consider the need for fire fighter/emergency responders with adequate personal protective equipment for cleaning up.

For emergency responders Entry into a confined space or poorly ventilated area contaminated with vapor, mist, or fume is extremely hazardous without the correct respiratory protective equipment and a safe system of work. Wear self-contained breathing apparatus. Wear a suitable protective chemical suit and chemical resistant boots. See also the information "For non-emergency personnel".

Environmental Precautions Avoid dispersal of spilled material and runoff from contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up:

Large Spill Stop leak if without risk. Move containers from spill area. Approach spill from upwind. Prevent entry into sewers, waterways, basements or confined areas. Wash spillages into an on-site effluent treatment plant or proceed as follows: Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite, or diatomaceous earth and place in container for disposal according to local and state regulations (See Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same risk as the spilled product.

Small Spill Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if watersoluble or absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same risk as the spilled product.

Section 7. Handling and Storage

Precautions for safe handling

Product Name: Blue Bomber
All-Purpose Degreaser
Product Code: BLUEBOMBER

SAFETY DATA SHEET

<p>Protective measures</p>	<p>Put on appropriate personal protective equipment (see section 8). Workers should wash hands and face before eating, drinking and smoking. Do not breathe vapor or mist. Do not ingest. Avoid contact with eyes, skin and clothing. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Avoid contact of spilled material and runoff with soil and surface waterways. Avoid contact with eyes, skin and clothing. Empty containers contain product residue and may be hazardous. Keep in original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Do not reuse container.</p> <p>Store and use away from heat, sparks, open flame or any other ignition source.</p>
<p>Advice on general occupational hygiene</p>	<p>Eating, drinking, and smoking should be prohibited in areas where this material is handled, stored and processed. Wash thoroughly after handling. Remove contaminated clothing and protective equipment before entering eating areas. See also section 8 for additional information on hygiene measures.</p>
<p>Conditions for safe storage, including any incompatibilities</p>	<p>Store in accordance with local regulations. Store away from direct sunlight in a dry, cool and well ventilated area, away from incompatible materials (see section 10), food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.</p> <p>None</p>

Section 8. Exposure Controls / Personal Protection

Control parameters

Occupational exposure limits

			OSHA	ACGIH	Manufacturers
TWA	TWA	Suggested TWA	(mg/m ³)	(mg/m ³)	(mg/m ³)
<u>Ingredient Name</u>					
Poly(oxy-1,2-ethanediyl), a-undecyl-w-hydroxy-			NA	NA	NA

NA = Not Available

SAFETY DATA SHEET

While specific OELs for certain components may be shown in this section, other components may be present in any mist, vapor or dust produced. Therefore, the specific OELs may not be applicable to the product as a whole and are provided for guidance only.

Appropriate engineering controls All activities involving chemicals should be assessed for their risks to health, to ensure exposures are adequately controlled. Personal protective equipment should only be considered after other forms of control measures (e.g. engineering controls) have been suitably evaluated. Personal protective equipment should conform to appropriate standards, be suitable for use, be kept in good condition and properly maintained. Personnel must be properly trained in the use of any personal protective equipment. Your supplier of personal protective equipment should be consulted for advice selection and appropriate standards. Use only with adequate ventilation. If user operations generate dust, fume, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The final choice of protective equipment will depend upon risk assessment. It is important to ensure that all items of personal protective equipment are compatible.

Environmental exposure controls Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Hygiene Measures Ensure that eyewash stations and safety showers are close to the work location. Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Thoroughly wash contaminated clothing before reuse.

SAFETY DATA SHEET

Eye Protection

Avoid Contact with eyes. Serious damage can occur. Use a combination of chemical goggles and a full face shield to protect eyes and face from possible chemical burns

Skin Protection measures

Hand protection

Wear protective gloves if prolonged or repeated contact is likely. Wear chemical resistant gloves. Recommended: Nitrile rubber or PVC coated gloves.

The correct choice of protective gloves depends upon the chemicals being handled, the conditions of work and use, and the condition of the gloves (even the best chemically resistant glove will break down after repeated chemical exposure). Most gloves provide only short term protection before they must be discarded and replaced. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. Gloves should therefore be chosen in consultation with the glove supplier/manufacturer and with a full assessment of the working conditions.

Body protection

Use of protective clothing is good industrial practice. Cotton or polyester/cotton overalls will only provide protection against light, superficial contamination that will not soak through to the skin. Overalls should be laundered on a regular basis. When the risk of skin exposure is high (e.g. when cleaning up spills or if there is a risk of splashing) then chemical resistant aprons and/or impervious chemical suits and boots will be required. Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist for handling this product.

Respiratory protection

In case of insufficient ventilation, wear suitable respiratory equipment.

The correct choice of respiratory protection depends upon the chemicals being handled, the conditions of work and use, and the condition of the respiratory equipment. Safety procedures should be developed for each intended application. Respiratory equipment should therefore be chosen with the supplier/manufacturer and with a full assessment of the working conditions.

Section 9. Physical and Chemical Properties

Product Name: Blue Bomber
All-Purpose Degreaser
Product Code: BLUEBOMBER

Date of issue: 12/04/2020

Page: 7 of 15

SAFETY DATA SHEET

Appearance	
Physical state	Liquid
Color	Blue
Odor	Mild
Odor threshold	Not available. pH (neat)
12.0 to 13.0 pH (5% in DI water)	11.0 to
12.0 Melting/freezing point	Not available.
Initial boiling point and point range	Not available. boiling
Flashpoint, °F	Water content interferes with flash point determination Evaporation rate Not available.
Flammability (solid, gas)	Not applicable. Based on – Physical state
Lower and upper flammability or explosive limits	Not available. Vapor pressure Not available. Vapor density Not available.
Relative density	8.41 pounds per gallon at 68°F
Specific gravity	1.010 gm/cm ³ at 20°C
Solubility	Completely soluble in water
Partition coefficient: n-	Not available. octanol/water
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available
VOC content, %/wt	Not available. (CARB Method 310, LVC-VOC chemicals not included in this calculation)

Section 10. Stability and Reactivity

Reactivity No specific test data available for this product. Refer to conditions to avoid and Incompatible materials for additional information

Chemical stability: The product is stable

Incompatible materials Strong oxidizing agents

Possibility of hazardous reactions Under normal conditions of storage and use, hazardous reactions will not occur. reactions Under normal conditions of storage and use, hazardous polymerization should not occur

Conditions to Avoid: High temperatures

Hazardous Decomposition Products: Under normal conditions of storage and use, hazardous decomposition products should not be produced

Section 11. Toxicological Information

Product Name: Blue Bomber
All-Purpose Degreaser
Product Code: BLUEBOMBER

Product Name: Blue Bomber

All-Purpose Degreaser

Date of issue: 12/04/2020

Product Code: BLUEBOMBER

Page: 7 of 9

The generation of waste should be avoided or minimized wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

NOTE: The generator of waste has the responsibility for proper waste identification (based on characteristic(s) or listing), transportation and disposal

Notice to reader

All reasonably practicable steps have been taken to ensure this data sheet and the health, safety and environmental information contained in it is accurate as of the date specified below. No warranty or representation, express or implied is made as to the accuracy or completeness of the data and information in this data sheet.

The data and advice given apply when the product is sold for the stated application or applications. You should not use the product other than for the stated application or applications without seeking advice from us.

It is the user's obligation to evaluate and use this product safely and to comply with all applicable laws and regulations. Dawson's Cleaning Supplies or Coolant Control shall not be responsible for any damage or injury resulting from use, other than the stated product use of the material, from any failure to adhere to recommendations, or from any hazards inherent in the nature of the material. Purchasers of the product for supply to a third party for use at work, have a duty to take all necessary steps to ensure that any person handling or using the product is provided with the information in this sheet. Employers have a duty to tell employees and others who may be affected of any hazards described in this sheet and of any precautions that should be taken.
