

Looking for a better way to install **artificial grass**?

Give your garden the edge with

VertEdge[®]

INTRODUCING THE NEXT GENERATION OF ARTIFICIAL LAWN EDGING

SAFER.

STRONGER.

SMARTER.

What is VertEdge®

You use carpet gripper to get a perfect finish to your carpet. VertEdge® does the same for your artificial lawn.

Our revolutionary edging system is the only product on the market to 100% securely adhere the perimeter finish of artificial lawn using VertEdge® adhesive.

Think of it as carpet gripper for your artificial lawn.

The problem with **traditional** methods

SPOILER ALERT: THERE ARE MANY

The trickiest part of laying artificial grass is securing the grass edging to the perimeter.

- Nails can loosen and fall out, becoming dangerous
- Timber battens eventually rot which can ruin your grass
- Gluing direct to a concrete haunch leaves settlement lines
- Worm casts lift the edges creating ripples around the perimeter
- Loose edging can cause the grass to ripple or wrinkle
- Unsecured lawn edges can become trip hazards

In other words, traditional methods can make your artificial grass unsightly and unsafe.

	100% Fully Adhered Perimeter Fixing	Likely To Decay/Rot	10% Perimeter Fixing @10 cm Spacing	Potential Hazard with Hidden Nails/Screws	Settlement Ghosting Lines	Enhanced Natural Profiled Finish	Tucked Down Edge Finish	Edging Movement With Temperature Fluctuations	Safe for Children and Pets

The VertEdge[®] solution

VertEdge[®] is a game-changer for artificial grass installation.

Made in Britain, our fully recyclable solution works with all artificial grass surfaces.

Nails only provide 10% fixing to the grass. VertEdge[®] gives a clinical 100% secure adhered perimeter finish, so the edges won't lift.

**Simply cut,
glue, and
tuck to bring
artificial grass
to life.**

SAFER

No nails.
No trip hazards.
Safe for children
and pets

STRONGER

Provides
a 100% adhered
tucked down
perimeter finish

SMARTER

Forms to any curve
or radius creating
a neat, natural finish

SIMPLE

pros and DIY
installers

COST-EFFECTIVE

Lasts the lifespan
of your
artificial lawn

SECOND TO NONE

Outperforms
all other products
and methods on
the market

We said it was game-changing.

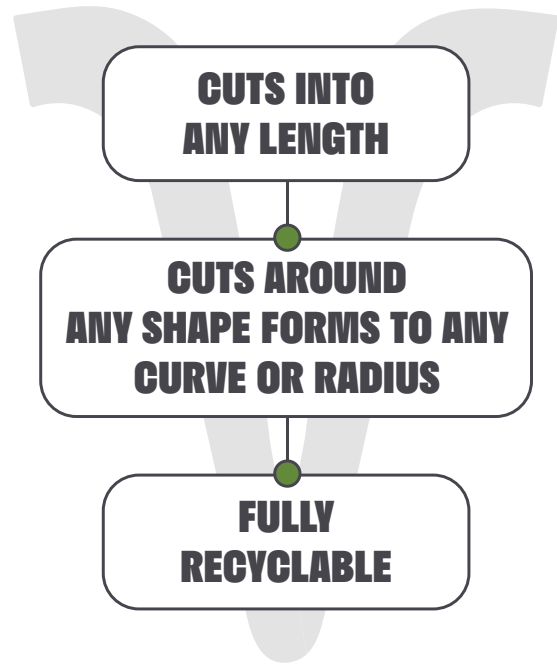

How VertEdge® works

VertEdge was designed by an artificial grass expert with over 40 years in the surfacing industry.

Its clever patent-pending design allows the edging strips to be cut and shaped to suit any lawn using our patented 'V' spring technology.

The edging is installed underneath the artificial grass (using VertEdge® adhesive) creating a fully adhered tucked down perimeter finish that is more resistant to wear and tear (and playful dogs). This will extend the lifespan of your artificial lawn.

There are no nails involved and it won't rot. Simply shape the VertEdge® edging system to match your garden design.

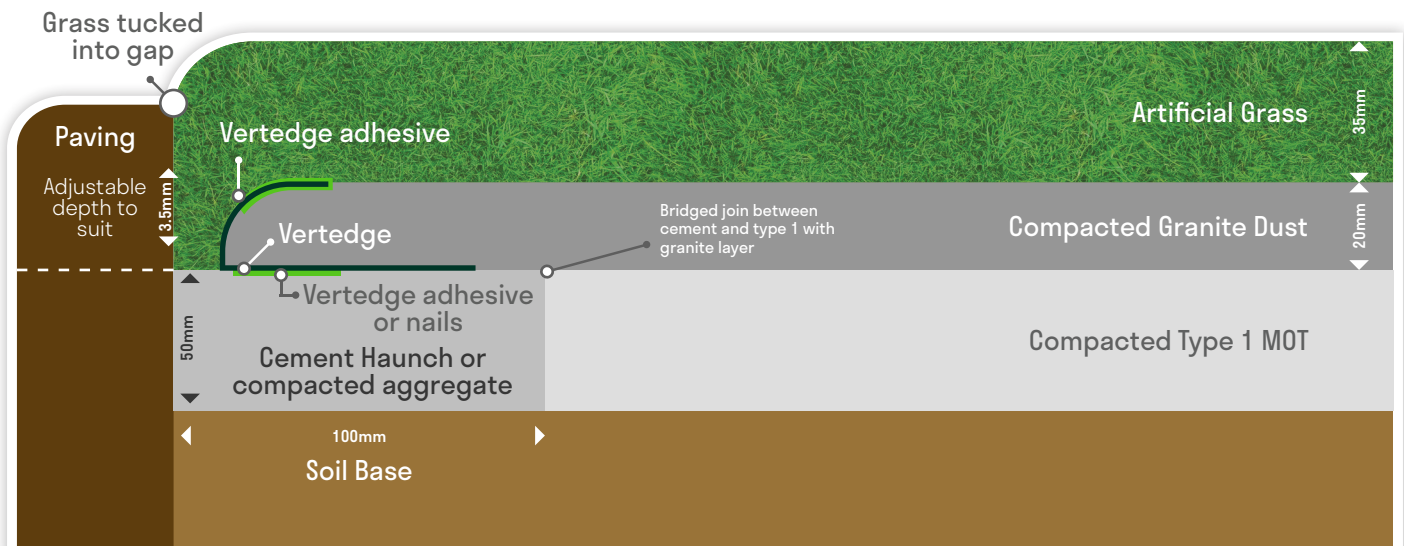

VERTEGE®

Our revolutionary edging system fully adheres the perimeter finish of artificial grass. It's the only product on the market to do so

VERTEGE® ADHESIVE

Our Adhesive Tubes glue the artificial grass onto the VertEdge®. One tube of glue provides 10 linear m of adhesion

WITH VERTEGE®, YOU CAN CUT, GLUE, AND TUCK YOUR WAY TO A CUTTING-EDGE ARTIFICIAL LAWN.

How VertEdge® benefits everyone

ARE YOU AN INSTALLER?

VertEdge® gives you a competitive edge.

Your customers want the best finish on the market. VertEdge® delivers. As a result, you'll enjoy a boost to both your reputation and profits.

Lightweight, simple to fix, and easy to store and shape, VertEdge® provides a top quality finish with your customer's health and safety as a priority. That's why it's the perfect solution for homes, schools, and public areas.

Don't risk losing jobs by not offering VertEdge®. Edge out your competitors with VertEdge®.
