## About Ollyskins 5mm Neoprene

Ensuring the correct Neoprene (the generic term for CR Cellular Rubber) for use in Waders is essential for maximum performance, comfort and protection. Ollyskins Neoprene is designed for Waders and is the correct density and thickness. We're also proud of the fact that our Neoprene is REACH compliant, ensuring that all the strict requirements regarding pollution and environmental compatibility are achieved during its production.

## SeamDRY™ Seams

Ollyskins Neoprene Chest Waders feature the usual double taped and glued SeamDRY™ seams. Carefully handcrafted in our UK manufacturing facilities, the resulting seams are extremely waterproof and resistant to breakdown and leaks.

## Features

Key features about Ollyskins Neoprene that defines why Neoprene Waders are superior for use when working with or in Water.

- 1** SPECIAL GRADE  
Designed for Waders
- 2** EXTREMELY  
Weather & Water Resistant
- 3** EXCELLENT  
Elasticity
- 4** ABRASION  
And Tear Resistant
- 5** WARM  
During the Cooler Months

## TUNGSTEN BOOT STUDS

### Keep a firm footing with Removable Boot Studs

Ollyskins Removable Tungsten Carbide Boot Studs can be added and removed as required using the Mini-Stud Tool (item 1260), and ensure you and your team are safe on potentially slippery surfaces. Considering slips and trips is the most common cause of industrial workplace accidents, adding Studs to your boots is a low cost of way of ensuring additional safety for your team.

### 1255 (Single Stud)

#### Ollyskins 1255 Tungsten Carbide Mini-Stud (sold loose)

€16.82/\$20.59 excl. Taxes/VAT

## WADER SIZING

### Perfect Fit & Inclusive Sizing

Ollyskins manufacture the Chest Waders in the following Body/Inside Leg sizes as Core/In-Stock items. But any variation of Body Size and Inside Leg measurement is possible within a 2-3 week lead time.

For example, we use the MEDIUM Body, with a REGULAR Inside Leg to make sizes 5, 6, 7, 8 and 9. However, if you were a size 8 boot and wanted some additional leg length, you could order the MEDIUM Body with a TALL Inside Leg on a size 8 Boot.

Thigh Waders are made in one length, in all sizes, but can easily be adapted for shorter or taller team members.

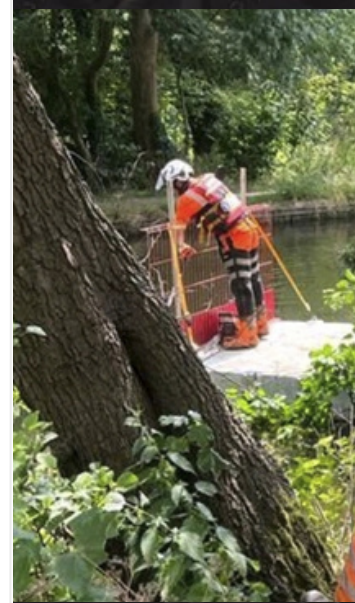

BODY SIZE	TO FIT CHEST	INSIDE LEG	APPROX. WEARER HEIGHT	BOOT SIZE
SMALL	88-96cm/35"-38"	SHORT	5'1" - 5'4"	4
MEDIUM	96-104cm/38"-41"	REGULAR	5'8"-5'10"	5, 6, 7, 8, 9
LARGE	104-120cm/41"-44"	TALL	5'10"-6'10"	10, 11
XLARGE	120-128cm/47"-51"	XL	6'1"-6'4"	12, 13

## ABOUT NEOPRENE

### Superior Protective Properties

Neoprene (CR), also called polychloroprene or chloroprene rubber - synthetic rubber produced by the polymerization (or linking together of single molecules into giant, multiple-unit molecules) of chloroprene. A good general-purpose rubber, Neoprene is valued for its high tensile strength, resilience, oil and flame resistance, and resistance to degradation by oxygen and ozone; however, its relatively high cost limits its use to special-properties applications.

One of the first successful synthetic rubbers, polychloroprene was first prepared in 1930 by Arnold Collins, an American chemist in Wallace Hume Carothers's research group at E.I. du Pont de Nemours & Company (now DuPont Company), while investigating by-products of divinylacetylene. DuPont marketed the material as Neoprene, a trademarked name that has since become generic.
