

Engineered, Designed & Assembled in America

In a post pandemic world, biophilic design is becoming a popular method of introducing comfort and wellness to a space.

#### **Quality Lighting**

Made with the highest level of care and integrity, Soltech's lights integrate a highly-precise photosynthetic spectrum with museum-quality décor lighting. This provides Interiorscapers with the necessary tool to support plant growth in any space while giving off beautiful ambient lighting.

#### **Tailored Photometric Solutions**

We have a dedicated team of commercial plant lighting specialists that are on hand to complement rather than sacrifice your design. Receive photometric reports from our team to accurately support and secure your investment.

Won International Plantscape Award's Diamond Award and "Best in Show" 2022

## Highland™ LED Track Light System

Sleekly set on a track, this scalable grow light application allows you to support the growth of plants indoors while displaying them with museum-quality lighting, leaving you with a lush, green plant gallery that will flourish in any space.

SBA's Eastern Pennsylvania Entrepreneurial Success of the Year Award 2022

The Highland is comprised of a LED with a photosynthetic spectrum, a sleek aluminum body, and an interchangeable lens for plants big to small, and near to far.

# Aspect™ LED Pendant Lights

Our flagship, pendant-style LED plant light, the Aspect, offers a highly precise photosynthetic spectrum that keeps your plants thriving, while its sleek profile brings a versatility to any space.

## Vita™ Grow Lights

A Small footprint, with big results. The Vita™ Grow Light was made with adaptability in mind. This bulb can be retrofitted into existing light fixtures to provide plants with its highly precise photosynthetic spectrum while illuminating the space with brilliant, warm white ambient light. The Vita™ is also dimmable so that you can provide the perfect amount of light to your plant, every time.

# PHOTOMETRIC REPORTS

Soltech understands that each space and plant has unique lighting requirements. Our team of lighting specialists will provide you with a comprehensive photometric layout and report, tailored to ensure optimal plant health. We will guide you in determining the number of lights necessary for efficient and effective growth. These lighting layouts also facilitate communication with your contractors before installation, ensuring a smooth and successful project.

#### Lifespan: 50,000 hours Guarantees: 5 year manufacturer's warranty

Cone of Light Tabulation		
Mounting Height (Ft)	Footcandles at Nadir	Diam eter (Ft)
4.00 /	155	3.45
6.00	68.8	5.17
8.00	38.7	6.89
10.0	24.8	8.62
/12.0	17.2	10.3
/ 14.0	12.6	12.1
16.0	9.67	13.8

### **Fixture Specifications**

Power	30 W
CRI	97
Color Temperature	3000K
Body Construction	Aluminium
Operating Voltage	90-240 VAC
Dimensions	6"x 3"x 3"
Heatsink	Fanless, passive cooling
