

PID Temperature Control

High pressure zone - 12~20 zone

To resolve this:

- Select a coarser grind setting and retry.
- Decrease the amount of coffee grounds and retry.
- Decrease the tamping pressure and retry.

Low pressure zone - 0~5 zone

To resolve this:

- Select a finer grind setting and retry.
- O2. Increase the amount of coffee grounds and retry.
- 03. Increase the tamping pressure and retry.
