

Pop Up Snowflake

Die-cut the pieces you will need to create the 3-tier pop-up snowflake. The die set offers two options for the 3rd tier: a sentiment banner or a circular snowflake label.

- Fold a 4-1/4" x 5-1/2" card base.
- Trim a 4-1/4" x 5-1/2" front panel.
- Cut a 2" x 5-1/2" strip of cardstock to cover the card base back panel.

ASSEMBLING THE POP UP

1. Fold the larger snowflake in half and over the pierced die-cut line. This is the 1st tier of the pop-up. Set aside.

2. Interlock the two half-snowflake pieces of the 2nd tier of the pop-up.

The back of the snowflake should look like this.

3. Fold in half. Then, fold the small tabs upwards and glue them in place (This step is optional).

4. Fold upwards the bottom tabs of the 2n tier to create a crease. Then, straighten them up.

5. Unfold the large snowflake and insert the smaller snowflake tabs into its die-cut slits .

6. . Fold the tabs upwards and align the tabs fold with the edge of the slits to them behind the 1st tier of the pop-up.

This is how the tabs should look when glued down.

The 2nd tier of the snowflake is done...

7. Fold in half the 3rd tier piece of the pop-up. Then fold the bottom tabs upwards.

8. Apply glue over the half-right area of the piece.

9. Make sure the side tabs are aligned and glue the banner or label over the half-right area of the pop-up 3rd tier as shown in the pictures.

10. Insert the banner tabs in the slits of the 2nd tier of the pop-up.

It should look like this.

11. Apply glue over the 3rd tier tabs and fold them upwards to glue them in place.

The Pop-Up is done!

ATTACHING THE POP-UP TO THE CARD

12. Use the die in the picture to die-cut slits to affix the pop-up mechanism to the card base. Align the die score line with the card base score line and use tape to hold the die in place while die-cutting.

The two mechanism dies in the set have embossed "A" and "B" letters that will get debossed in the die-cuts. These are guides to attach the mechanism tab into the correspondent slit.

13. Fold the pop-up mechanism in half.

14. Then fold the next scoring lines inwards and fold upwards the diagonal side folds and bottom tabs.

The folded mechanism should look like this.

15. Insert the mechanism tabs in the slits. Do one side first and with your hand hold the tabs at the back while inserting the other side tabs in place.

16. Carefully fold the card base. Apply glue on the tab, and glue them as shown.

The pop-ups mechanism should look like this.

Note: This and the next step will allow the card base to be fully open once finished.

17. Glue the front panel to cover the mechanism tabs.

18. Glue the 2" x 5-1/2" strip of cardstock to the card base back to cover the mechanism tabs.

19. Unfold the card and apply glue over the mechanism as shown in the picture.

20. Fold the pop-up and align its side edge with the centre fold of the mechanism.

21. Fold the card and press down while the glue dries.

*Happy Crafting!
x. Bibi*

You are done!

Bibi's Pop-up Snowflake die set will create a 5" x 1-1/4" pop-up that can be used to create 4-1/4" x 5-1/2" cards or larger.

The dies in the set can be used to create snowflake-shaped windows, toppers for cards, boxes, memory albums and more...

The sky's the limit
