Human Warning:

Keep this and all
medication out of the
reach of children.
To obtain product
information, including
a Safety Data Sheet (SDS),
call 1-800-224-7387.

When Using This Product:

- Consult your veterinarian
for assistance in the
diagnosis, treatment,

and control of
parasitism.

- Do not de-worm a
dog or puppy that is
sick. Consult a
veterinarian for
diagnosis of the
illness.
- **7 Way De-Wormer** Flavored
Chewables are safe
for use in puppies 12
weeks or older and
adult dogs. Safety in
breeding dogs and
pregnant bitches has
not been tested.

You May Notice:

Vomiting, loose stools
(with or without blood)
and decreased activity
following treatment.
If you notice these
signs, contact a
veterinarian.

Directions:

Each flavored
chewable contains
30 mg of pyrantel
pamoate and 30 mg
of praziquantel. The
dose for each drug
is 2.27 mg per
pound of body weight
(5 mg/kg). Please
refer to the following
dosing table for help
finding the right dose
for your dog.

7 Way De-Wormer Flavored Chewables Dosing Table

Dog Weight/ Number of Chewables
<u>6.0 to 12 pounds:</u> 1 Chewable
<u>12.1 to 25 pounds:</u> 2 Chewables
<u>More than 25 pounds:</u> Use 114 mg size.

- You should weigh your dog to make sure you are giving the right dose.
- 7 Way De-Wormer Flavored Chewables are palatable if offered by hand. If your dog does not voluntarily eat the chewable, you can hide the chewable in a small amount of food or place it in the back of the dog's mouth for forced swallowing.
- Make sure that the dog eats the complete dose.
- Watch your dog for a few minutes after dosing to make sure the chewable is not rejected.

Other Information:

Recommended

De-Worming Schedule:

Consult your veterinarian for assistance in the diagnosis, treatment, and control of parasitism. De-worming schedules may vary depending on the climate where you live and the activity of your dog.

Re-treatment: Re-treatment of your dog may be necessary as determined by laboratory fecal examination and/or if your dog is living where re-infections are likely to occur. Consult your veterinarian for assistance in the diagnosis and prevention of re-infection. In case of re-infection with tapeworms (*Dipylidium caninum*), consult your veterinarian for advice on how to remove fleas from the dog and the environment.
