

2022 Mounting Diagrams

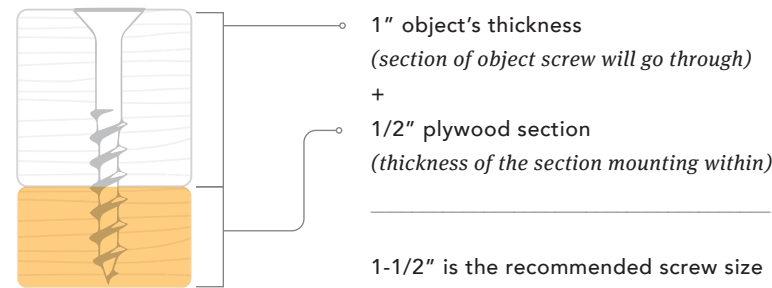

Hazard Areas Highlighted In RED

Never mount anything to, alter or drill in the areas highlighted in RED or you risk safety and vehicle damage.

Hazard Areas Highlighted In YELLOW

Use caution when altering areas in YELLOW.

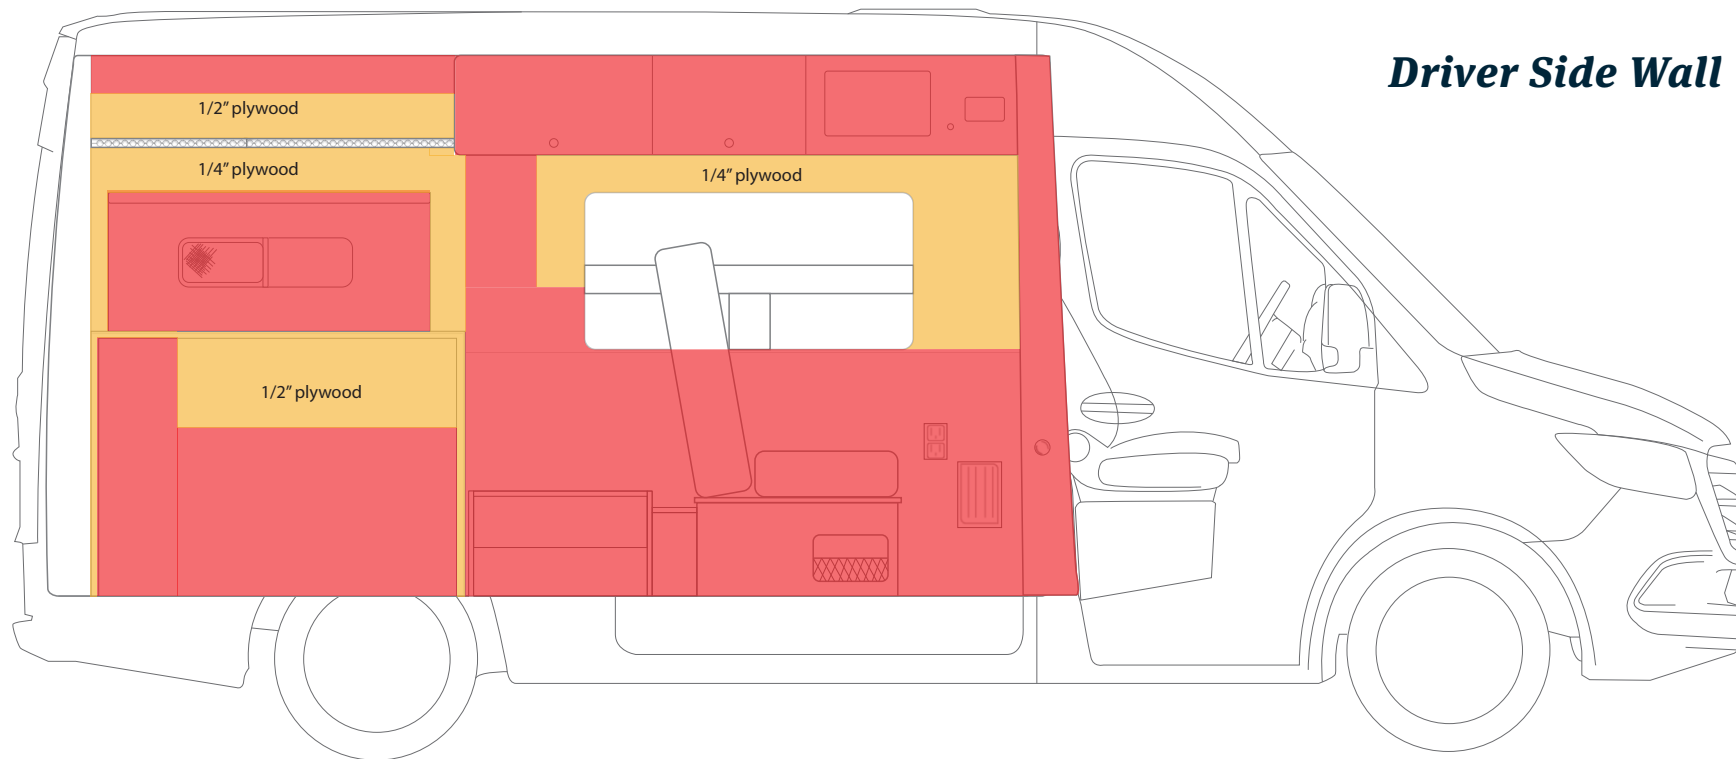

Recommended screw sizes depend on the plywood section's thickness plus the mounted object's thickness. See example below to calculate:

Before any drilling into your van or modifying of any panel or component in any way, be aware some areas have specific routing of plumbing, electrical lines and others risk accidentally screwing into the outside body of the van. We recommend never screwing through the wood thickness. If a fastener that screws past the wood thickness is needed, we suggest that you remove the panel you are altering and look behind it or seek professional help.

Always take precautions as damage from alteration or modification is not covered by the Storyteller Overland or Sprinter warranty and could be quite dangerous leading to injury or death.

Storyteller Overland does NOT recommend any specific modifications and simply could never test and/or approve any modifications or alterations after the factory production process. Storyteller Overland is not liable for damage resulting from modifying the vehicle in any way. Certain modifications may void the vehicle's Limited Warranty and/or the Sprinter chassis warranty. This document is a very general overview of the vehicle designed to give simple guidance, not specific instruction or authorization. Storyteller Overland frequently changes processes, routing, materials and other parameters in a quality improvement process and reserves the right to make changes to processes, specifications, and anything else necessary to produce vehicles that may render these images inaccurate. The owner or vehicle alterer takes full responsibility for any alterations. Storyteller Overland is not responsible for any damage incurred from alterations not performed by factory technicians.

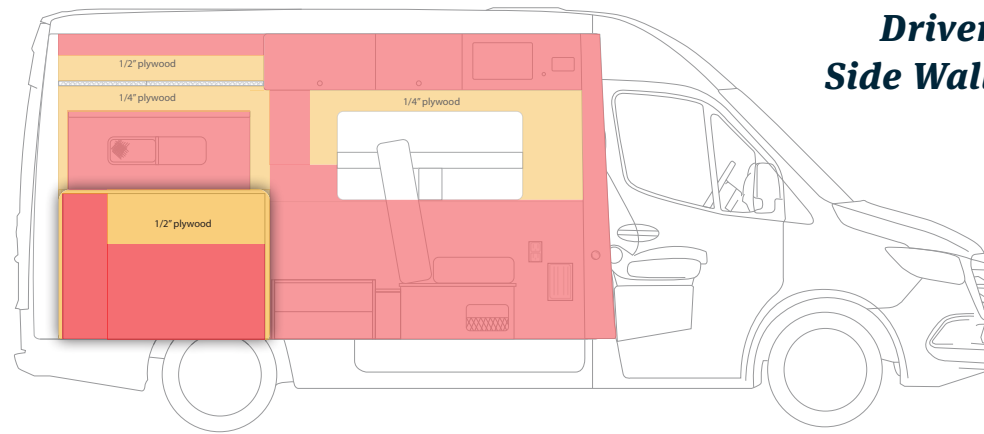

Water Cabinet

Hazard Areas Highlighted In RED

Never mount anything to, alter or drill in the areas highlighted in RED or you risk safety and vehicle damage.

Hazard Areas Highlighted In YELLOW

Use caution when altering areas in YELLOW.

**Driver
Side Wall**

We recommend never screwing through the wood thickness. If a fastener that screws past the wood thickness is needed, we suggest that you remove the panel you are altering and look behind it or seek professional help.

Always take precautions as damage from alteration or modification is not covered by the Storyteller Overland or Sprinter warranty and could be quite dangerous leading to injury or death.

Behind this wall to consider:

Plumbing hoses, water pump, water storage tank, electrical lines, water tank sensor

Material:

Steel trim with 1/2" wood substrate

Max drill depth:

1/2" depth do not drill through

Recommended screw in area:

Steel trim or wood substrate

Things to avoid:

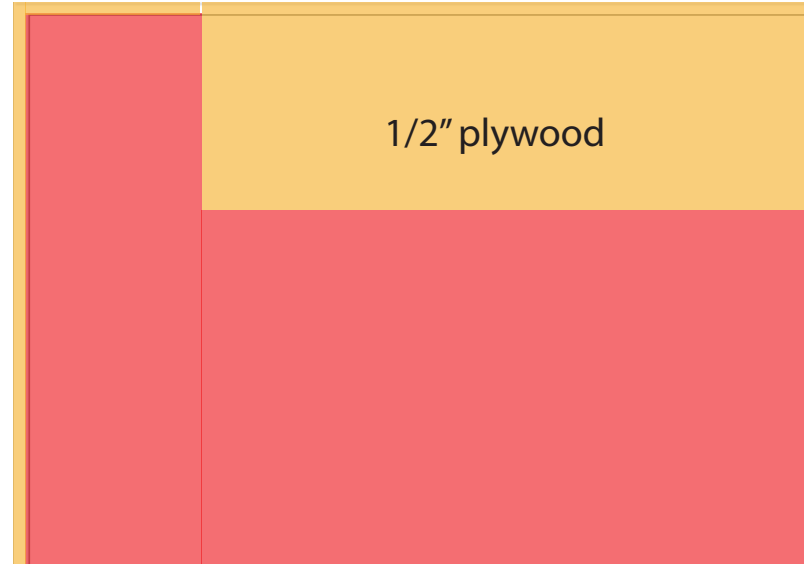

Heavy hanging loads, fasteners piercing through wood substrate

Recommended fasteners:

5/8" wafer head screw

What other owners have mounted here:

Storyteller Garage Organizer

Storyteller Overland does NOT recommend any specific modifications and simply could never test and/or approve any modifications or alterations after the factory production process. Storyteller Overland is not liable for damage resulting from modifying the vehicle in any way. Certain modifications may void the vehicle's Limited Warranty and/or the Sprinter chassis warranty. Flex Space Area

Hazard Areas Highlighted In RED

Never mount anything to, alter or drill in the areas highlighted in RED or you risk safety and vehicle damage.

Hazard Areas Highlighted In YELLOW

Use caution when altering areas in YELLOW.

Driver Side Wall

Before any drilling into your van or modifying of any panel or component in any way, be aware some areas have specific routing of plumbing, electrical lines and others risk accidentally screwing into the outside body of the van. We recommend never screwing through the wood thickness. If a fastener that screws past the wood thickness is needed, we suggest that you remove the panel you are altering and look behind it or seek professional help.

Always take precautions as damage from alteration or modification is not covered by the Storyteller Overland or Sprinter warranty and could be quite dangerous leading to injury or death.

Behind this wall to consider:

Plumbing, factory sheet metal

Material:

3/16" wood

Max drill depth:

1/4" depth do not drill through

Not recommended for: H

eavy loads, L-track

Recommended screw in area:

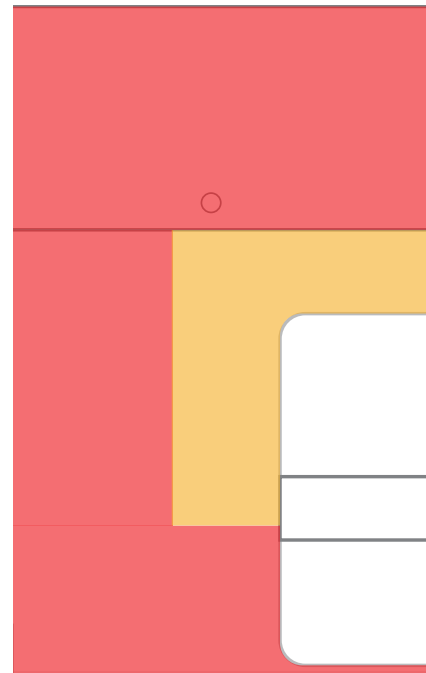

Only screw in on the right side of panel towards driver seat

Things to avoid:

Vertical running plumbing lines toward left of highlighted area, mounting in range of motion of Groove Lounge

Recommended fasteners:

1/4" wafer head screw

Storyteller Overland does NOT recommend any specific modifications and simply could never test and/or approve any modifications or alterations after the factory production process. Storyteller Overland is not liable for damage resulting from modifying the vehicle in any way. Certain modifications may void the vehicle's Limited Warranty and/or the Sprinter chassis warranty. This document is a very general overview of the vehicle designed to give simple guidance, not specific instruction or authorization. Always take precautions as damage from alteration or modification is not covered by the Storyteller Overland or Sprinter warranty and could be quite dangerous leading to injury or death.

Behind this wall to consider:

Vehicle factory metal

Material:

Panel around window is upholstered 3/16" wood, footwell panel upholstered 3/4" wood, factory sheet metal

Max drill depth:

Varies

Not recommended for:

Heavy loads, L-track

Recommended screw in area:

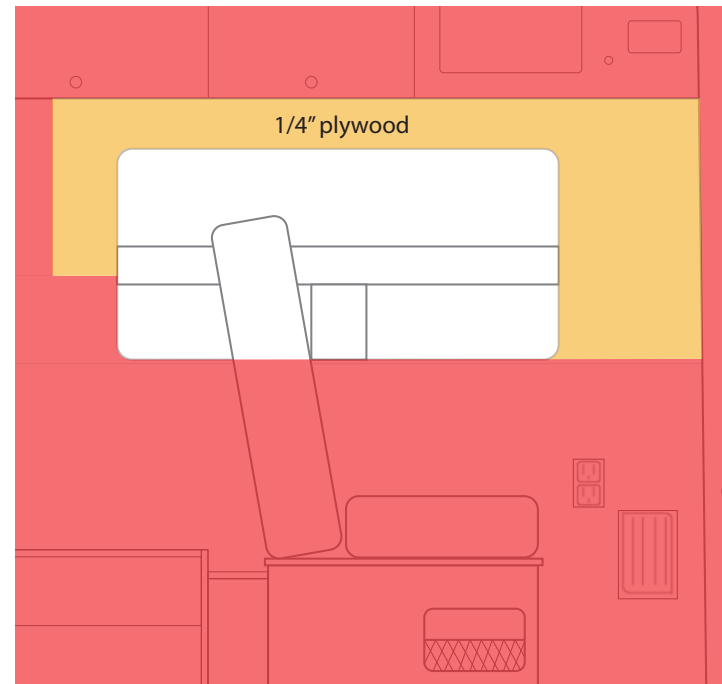

Area highlighted in yellow below

Things to avoid:

Groove Lounge range of motion

Recommended fasteners:

5/8" wafer head screw on footwell, 1/2" wafer head screw on upper section

Storyteller Overland does NOT recommend any specific modifications and simply could never test and/or approve any modifications or alterations after the factory production process. Storyteller Overland is not liable for damage resulting from modifying the vehicle in any way. Certain modifications may void the vehicle's Limited Warranty and/or the Sprinter chassis warranty. Behind this wall to consider:

Fridge, electrical wires, plumbing lines

Material: 3/4" particle board

Max drill depth:

1/2" drill depth, Do not drill through

Recommended screw in area:

Back of the galley facing the rear doors. Best to use suction cups or adhesive solutions otherwise

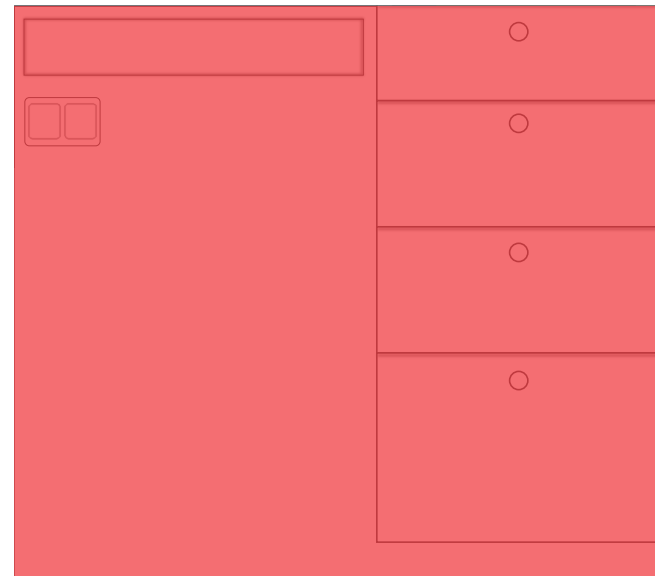

Things to avoid: Heavy hanging loads that warp panels, screws longer than 1/2"

Recommended fasteners:

Suction cups, adhesive solutions, velcro

What other owners have mounted here:

Storyteller Galley Organizer

Galley Backsplash

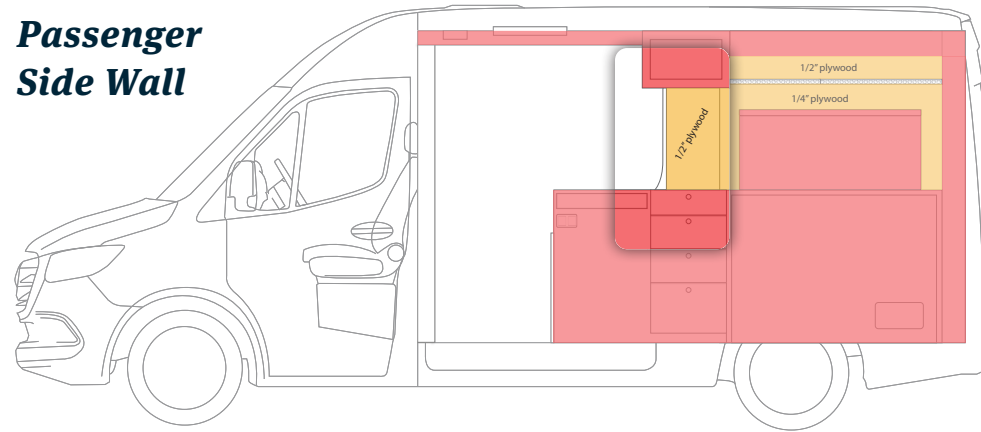

Hazard Areas Highlighted In **RED**

Never mount anything to, alter or drill in the areas highlighted in RED or you risk safety and vehicle damage.

Hazard Areas Highlighted In **YELLOW**

Use caution when altering areas in YELLOW.

Behind this wall to consider:

Electrical wires, plumbing lines

Material:

Upholstered 1/4" wood

Max drill depth:

Do not drill

Not Recommended for:

Heavy loads, L-track

Recommended screw in area:

Backsplash panel

Things to avoid:

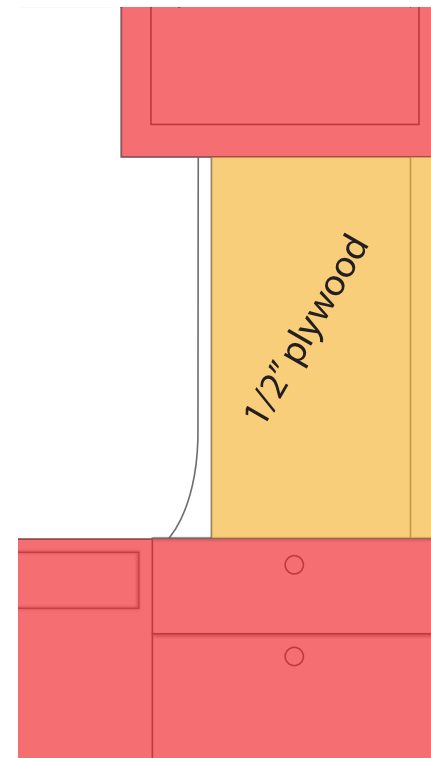

Heavy hanging loads that warp panels, long screws that can pierce electrical and plumbing lines

Recommended fasteners:

1/2" wafer head screw

What other owners have mounted here:

Storyteller Backsplash Organizer

Electrical Cabinet

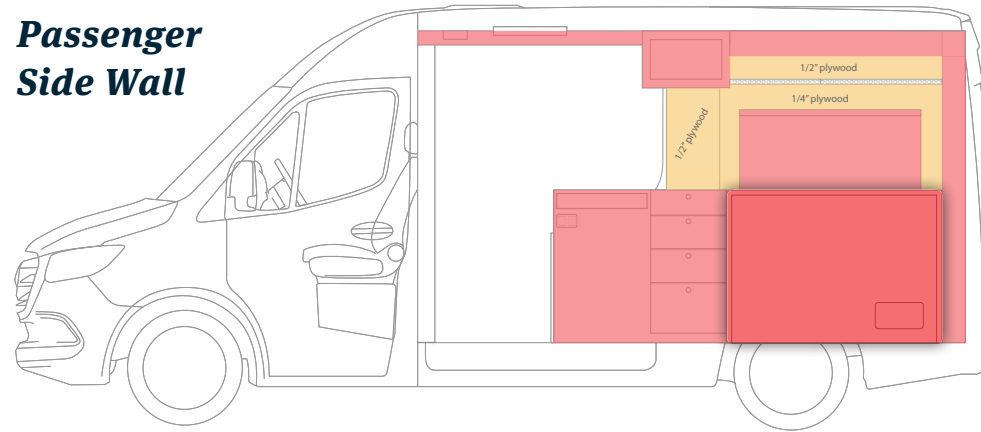

Hazard Areas Highlighted In **RED**

Never mount anything to, alter or drill in the areas highlighted in RED or you risk safety and vehicle damage.
