STONE: Diamond Sapphire Ruby						Other (beware of hardness – refer to Mohs Scale of Hardness)							
STONE SHAPE:													
	Round	Princess	Emerald	Asscher	Marquise	Oval	Radiant	Pear	Heart	Cushion			

HOW TO CHOOSE A DIAMOND USING THE 4 Cs

CUT

The cut of a diamond refers to its facets and proportions, not just its shape. This is the most important of the 4 Cs as a better cut diamond will reflect light more symmetrically giving an optically whiter stone.

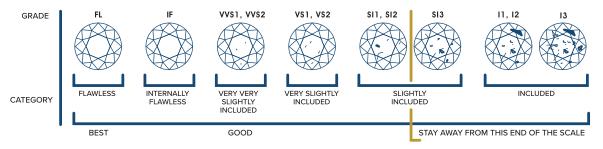

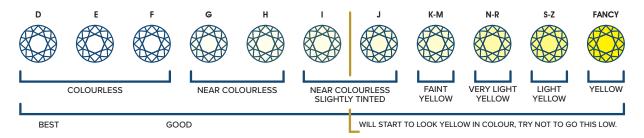

CLARITY

Clarity refers to the number, position and size of blemishes which naturally occur in stones. The better the clarity, the more brighter the diamond appears. Ask to use the jewellers 10x magnifing glass to view the stone.

COLOUR

Diamond colour is all about what you can't see. Diamonds are valued by how closely they appear colourless. The less colour, the higher their value.

CARAT WEIGHT

This is the weight of a diamond, not its size in dimensions.

APPROXIMATE SIZE

.25ct 4.1mm

.50ct 5.2mm

.75ct 5.9mm

1.00ct 6.5mm

1.50ct 7.4mm

2.00ct 8.2mm
