BURUNDI GAHAHE

Varietal

Red Bourbon

Processing

Washed

Cupping Score

86

Region

Kayanza

Farm Notes

Gahahe washing station is located in Kayanza province at an altitude of 1,805 metres above sea level. Over 1,700 smallholders deliver their cherry each season to Gahahe for processing which is well equipped with fermentation tanks, sorting and drying tables.

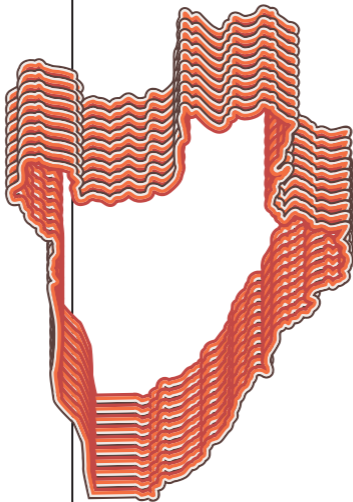

The average smallholder in Burundi has approximately 250 trees with a typical annual harvest of 200 to 300 kilos. During harvest season all coffee is selectively hand picked by the smallholder and their family. You can expect an elevated take on the classic Burundi fully washed profile with florals and citrus notes.
