# Why use Powder Mixes?

## SHELF LIFE

Our powder mixes have a longer shelf life than liquid mixes, so you can keep them on hand and use them when needed, without worrying about ingredients going bad.

## CONVENIENT

Easy to use and requires minimal preparation. Simply add milk, mix and pour into your hopper for a consistent texture and flavour every time!

## FLAVOURS

We are always creating new flavours and keeping up with the trends. All of our mixes are completely customisable too, allowing you to add your own inclusions and ripples!

## SAVE MONEY

The best yield in the industry vs liquid mixes. Each of our 1.6Kg mixes makes up to 128 x 5oz servings (7.6Kg total product).

## ONE RECIPE

Every single flavour follows the same recipe! No extra pumps of liquid or time wasted training your team!

# Yield and profit per mix

Each 1.6Kg bag of powder mix can produce up to 128 x 5oz servings (7.6Kg total product).
