MESSENGER

MESSENGER was the first spacecraft to orbit Mercury. It helps scientists to study the planet Mercury. It was the first mission to Mercury after Mariner 10, more than 30 years before.

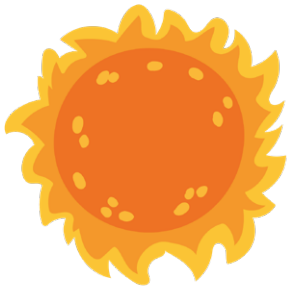

Color

Mars Reconnaissance Orbiter

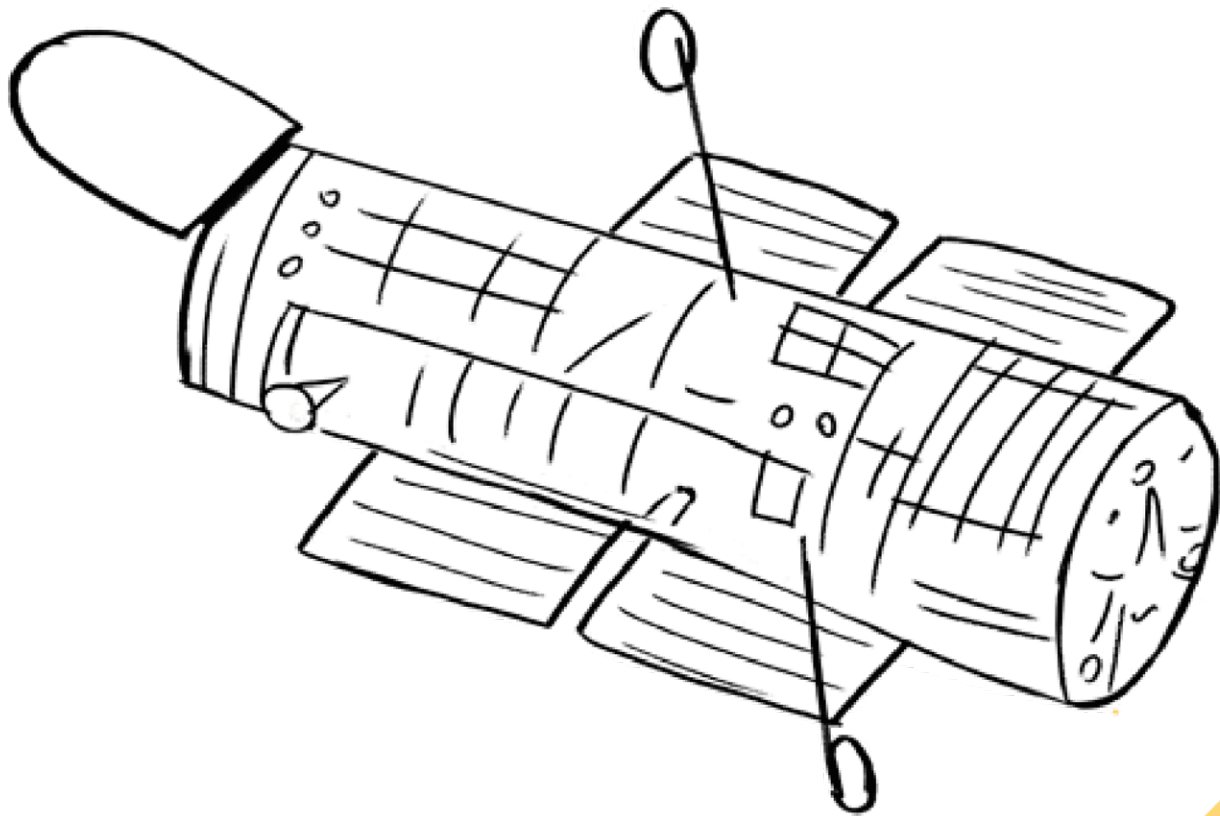

Mars Reconnaissance Orbiter (MRO) is designed to take high-resolution images of Mars. Scientists use them to study the environment to gain better knowledge of this red planet.

Color

The Hubble Space Telescope

The Hubble Space Telescope is one of the largest space telescopes. Scientists have used it to observe some of the most distant stars, galaxies, and the planets in our solar system since 1990.
