Bamboo Fencing Chain Link Installation Instructions

Introduction

Installing bamboo fencing in your yard can liven up your home and give it a more relaxing, laid back atmosphere. With bamboo fencing from Sunset Bamboo, you can turn your backyard into a tropical getaway or a zen garden, and bamboo not only looks great, it's one of the most eco-friendly building materials in the world. This is because, unlike hardwood forest logging, harvesting of bamboo causes little environmental damage. Bamboo is the fastest growing kind of grass in the world and an rapidly renewable natural resource.

Tools Recommended and Supplies Needed

Installing on Existing Chain Link Fence

Before beginning read all instructions carefully.

- Make sure your chain link fence can support the installation of [bamboo fencing](#), if not, make the necessary adjustments and reinforce the existing fence. Install a spacer at the bottom of the fence. This will help reduce ground contact, in turn preserve the fence, and provide proper support when leveling.
- Unroll your bamboo along the chain link fence every 24" with the capped side up, and completely level.
- Attach one end with the galvanized wire at the top and the bottom, pull tight and attach panels to chain link fence and tighten with the pliers.
- Attach the remaining portion of the bamboo panels with wires spaced approximately every 12" - 24".
- If you need to add another roll of fencing, be sure not to overlap the two rolls by and avoid gaps. Sometimes installation requires trimming a portion of the fence. Simply untie the wires at the end and remove the number of poles need to fit. Then tie the wires, and twist the ends of the wires together.

Tip:

To maintain the longevity and the beautiful look of your new [bamboo fence](#), Sunset Bamboo recommends a sealer (urethane finish). Not only will your new bamboo fence look great, it'll maintain the color and strength for many years to come.
