

# Jar Customizations

The world is your oyster when it comes to decorating our products. Whether we are matching your brand's carefully selected Pantone or customizing with an unmistakable logo, our jars and closures are the perfect template to bring your brand to life.

All of our products can be customized with a wide range of techniques to fit your brand's unique look and feel.

## Materials

### PET Plastic

Gloss, Clear  
White, Black  
Custom Color

### Glass

Gloss: Clear, Black  
Glass, Opal Glass  
Matte: White Frosted,  
Black Frosted  
Custom Color Frosting

## Decoration Options

### Glass Spray

Adds matte, gloss or tinted color to the exterior of your glass bottles and jars.

### Silk Screen Printing

Provides a thick, even lay down of ink. Best for simple 1-2 color designs, screen printing can be achieved on glass or plastic jars and closures.

### Hot Stamp

Leaves a bold, one color metallic or matte print on jars and closures.

### Heat Transfer Labels

Heat Transfers achieve detailed, multi-color decoration on jars and closures. Labels print more complex designs with a sharp appearance for regulations and product information.

### Acid Etch

Acid etching is a glass treatment that leaves the surface of the jar with a matte frosted finish. The process does not change the color of the jar and is best used to frost a clear or black glass jar.

### Water Transfer

Allows for a high level of customization with pre-printed designs applied to 3D surfaces. Water transfer printing cannot be oriented so expect variation between products.

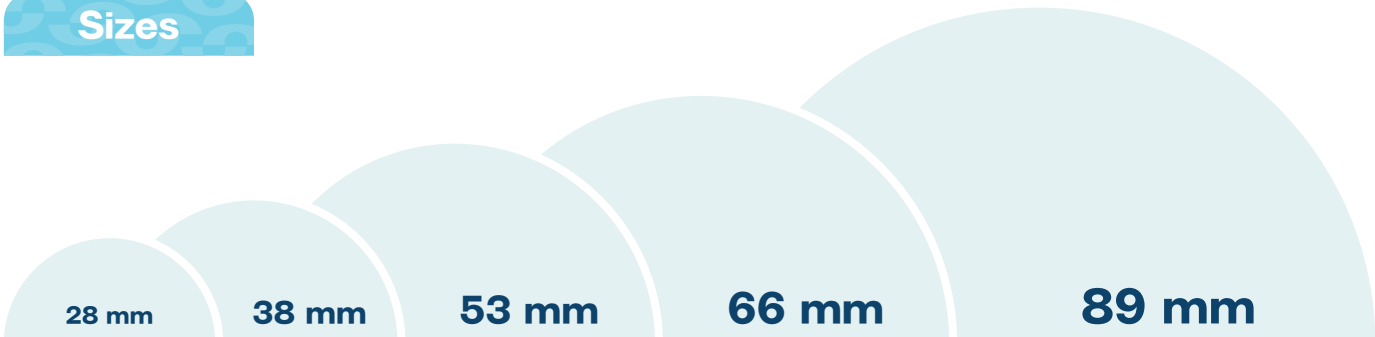

### Vacuum Metalize

Design a metalized finish on any glass or closure with vacuum metalization. The metalizing technique can be double coated with a different color base and exterior on flower and concentrate jars.

# Closure Customizations

## Sizes

## Styles & Finishes

**Smooth Sided**  
Regular / Tall / Extra Tall

**Dome**  
Regular / Tall / Extra Tall

**Ribbed**

### Patterned Closures

**Smooth Sided**  
Tamper Evident

**Ribbed**  
Tamper Evident

**Smooth Gloss**  
(Black, White, Metalized)

**Smooth Matte**  
(Black, Metalized, White)

**Ribbed**  
(Black, White, Pictorial)

**Wood Grain Printed**  
(Honey, Ash, Bamboo, Walnut, Redwood, Ebony)

## Printing & Color

**Water Transfer**

Apply pre-printed designs to 3D surfaces.

**Screen Printing**

Provides a thick, even lay down of ink for 1-2 colors.

**Hot Stamping**

Metallic or matte foil leaves a bold print.

**Heat Transfer**

Achieve detailed, multi-color decoration with labels on jars and closures.

**Debossed or Embossed Closure**

Customize with your logo built into our mold plates. Artwork is either raised or engraved into the cap for an elevated 3D touch.

**Custom Color**

Precise color matching to match your unique brand.
