

Instructions for Providing a Color Matching Sample

Leather World Technologies provides custom color matching service for Pigmented, Aniline and Nubuck leathers. We cannot match two-tone or multi-colored pigmented leathers. We need a minimum of a 2 x 2-inch swatch for color matching. The color match will be as close as possible to the sample. Please be aware the sample you send us may not be the same as the piece you are repairing due to fading and wear. If you do not have a sample, you can send in a paint chip obtained from your local paint store and we will match to the chip. We cannot match to email pictures or photos. **We are UNABLE TO ACCEPT RETURNS on custom mixes!**

Please mail swatch to:

Leather World Technologies
Color Matching
3591 Blue Ridge Blvd.
Suite 16
Blue Ridge, VA 24064
540-265-9037

We will contact you after we receive the swatch and discuss the match and repair procedure with you. If you want to proceed with the order, we will take the order at that time.

Please print this page, complete the following form, and mail with your sample swatch:
